

# **The Complete Book on Ferroalloys (Ferro Manganese, Ferro Molybdenum, Ferro Niobium, Ferro Boron, Ferro Titanium, Ferro Tungsten, Ferro Silicon, Ferro Nickel, Ferro Chrome)**

**Author:** B.P Bhardwaj

**Format:** Paperback

**ISBN:** 9789381039298

**Code:** NI258

**Pages:** 480

**Price:** Rs. 2,775.00    **US\$** 250.00

**Publisher:** NIIR PROJECT CONSULTANCY SERVICES

Usually ships within **5** days

The Complete Book on Ferroalloys

(Ferro Manganese, Ferro Molybdenum, Ferro Niobium, Ferro Boron, Ferro Titanium, Ferro Tungsten, Ferro Silicon, Ferro Nickel, Ferro Chrome)

An alloy is a mixture or solid solution composed of metals. Similarly, Ferroalloys are the mixture of Iron with high proportion of other elements like manganese, aluminium or silicon. Alloying improves the physical properties like density, reactivity, Young's modulus, electrical and thermal conductivity etc. Ferroalloys thus show different properties as mixture of different metals in different proportion exhibit a wide range of properties. Also, Alloying is done to alter the mechanical properties of the base metal, to induce hardness, toughness, ductility etc.

The main demand of ferroalloys, nowadays is continuously increasing as the major use of such products are in the field of civil construction; decorative items; automobile; steel industry; electronic appliances. The book provides a wide idea to readers about the usage of appropriate raw material and the treatment involved in the processing of raw material to final produce, safety, uses and properties of raw material involved in the processes.

This book concisely presents the core principles and varied details involved in processing of ferroalloys. The work includes detailed coverage of the major products like ferroaluminium, ferrosilicon, ferronickel, ferromolybdenum, ferrotungsten, ferrovanadium, ferromanganese and lesser known minor ferroalloys. Progress in thermodynamics and physico-chemical factors in ferroalloy production has developed rapidly during the past twenty-five years or so. The book presents the principles and current knowledge of processes in the production of various ferroalloys.

The production of a particular ferroalloy involves a number of processes to be followed in order to give the alloy desired physical and mechanical properties. The slight difference in the temperature or heating or composition can lead to entirely different alloy with different properties. This book is not only confined to the different processes followed in the production of ferroalloys but also describes the processes used and other information related to product, which are necessary for the manufacturer's knowledge. Also, the book gives the reader appropriate knowledge regarding the selection the best of available raw materials.

# Contents

## 1. INTRODUCTION

- Theory
- Terminology
- Interstitial Alloy
- Classification of Alloys

## 2. FERROALLOYS

- Ferroalloys
- Ferro Aluminium
- Ferro Boron
- Ferro Chromium
- Ferro Manganese
- Ferro Molybdenum/Molybdic Oxide
- Ferro Molybdenum
- Molybdic Oxide
- Ferro Niobium
- Ferro Phosphorus
- Ferro Selenium
- Ferro Silicon
- Ferro Silico Manganese
- Ferro Silicon Magnesium
- Ferro Silicon Zirconium
- Ferrous Sulphide
- Ferro Titanium
- Ferro Vanadium
- Calcium Silicon Manganese
- Calcium Silicon
- Ferro Tungsten
- Iron

## 3. PRODUCTION OF FERROALLOYS

- Primary Processes
- Secondary Processes
- Applied Processes and Techniques
- Ferro-chrome
- Raw Materials
- Pre-treatment Techniques
- Production of Ferro-chrome and Silico-chromium
- High-carbon Ferro-chrome

## 4. PRODUCTION OF FERRO MANGANESE

- Raw Materials
- Pre-treatment Techniques
- Production of Ferro-manganese and Silico-manganese
- High-carbon Ferro-manganese
- Medium-carbon Ferro-manganese
- Low-carbon Ferro-manganese
- Silico-manganese
- Types of Ferromanganese
- Production of Ferromanganese
- Production of High Carbon Ferromanganese
- Blast Furnace Production
- Electric Furnace Production

High Manganese Slag Practice  
Discard Slag Practice  
Production of Medium-Carbon Ferromanganese  
Silicothermic Production of Medium-Carbon Ferro-manganese  
Production of Medium-Carbon Ferromanganese by Oxygen Refining of High-Carbon Ferromanganese  
Production of Low-Carbon Ferromanganese  
Thermodynamics of Reduction of Manganese Oxides  
High Carbon Ferromanganese Slags  
Refining of Ferro Manganese  
Introduction  
The Sintering Pilot Facility  
Preparation of the Sinter Mix  
Sintering  
Characterization  
Performances  
Eramet Research Mn Alloys Smelting Pilots  
Background  
Pilot Campaign Approach  
Transfer of the Pilot Results to the Plants  
The New Pyrometallurgy Piloting Facility  
Constraints and Stakes for the New Facility  
Definition of the Power Supply Characteristics  
Design of the New Power Supply  
Design of the Furnace  
Furnace Diameter  
Furnace Height  
Side Wall Furnace Lining  
Hearth Lining and Bottom Electrode  
5. PRODUCTION OF FERRO MOLYBDENUM  
Production of Ferro-molybdenum  
Raw Materials  
Carbo-thermic Production of Ferro-molybdenum  
Metallo-thermic Production of Ferro-molybdenum  
6. PRODUCTION OF FERRO NIOBIUM  
Introduction  
Basic Technology of FeNb Manufacturing  
The Evolution of Ferro-niobium Manufacturing  
Recent Developments in Ferro-niobium Manufacturing  
Pyrometallurgical Refining of Concentrate  
Sintering  
Electric Arc Furnace Smelting  
Ferro-Niobium Production  
Crushirm and Packaging  
Future Developments in Ferro-niobium Manufacturing  
7. PRODUCTION OF FERRO BORON  
Ferro-niobium  
Production of Ferroalloys from Secondary Raw Material  
Raw Material and Raw Material Preparation  
8. PRODUCTION OF FERRO TITANIUM  
Transferred-arc Plasma Furnaces  
The Reduction of TiO<sub>2</sub>  
Enthalpy Considerations  
Constitution of the Charge

Choice of Raw Material  
Reasons for the Choice of a d.c. Transferred-arc Plasma Furnace  
Small-scale Batch Tests in a 50 kVA Water-cooled Furnace  
Equipment and Procedures  
Objectives of the Experimental Work  
Interpretation of Results of the Small-scale Tests  
Large-scale Continuous Tests  
Further Experimental Work  
Melting Point of the Alloy  
The Addition of Iron to the Charge  
Further Furnace Modifications  
Small-scale Sealed Furnace  
9. PRODUCTION OF FERRO TUNGSTEN  
Production of Ferro-tungsten and Tungsten Melting Base  
Tungsten Melting Base (TMB)  
Ferro-titanium  
10. PRODUCTION PROCESS OF FERRO SILICON  
Raw Materials  
Production of Ferro-silicon, Silicon Metal and Silico-calcium  
Ferro-manganese and Manganese Alloys  
Refining of Ferro-silicon  
Introduction  
Processes for the Refining of Ferro-silicon  
Solid/Liquid Oxide Method  
Oxidising Treatment with Gaseous Oxygen/Enriched Air  
Refining with Chlorine Gas  
Purification by Carbon Dioxide Injection Method  
Typical Results from Studies on the Refining of Ferrosilicon Carried Out at NML  
The Chlorine Donor Method  
The Carbon Dioxide Injection Method  
The Oxygen Injection Method  
Conclusions  
Ferro Silicon Operation at IMFA—A Critical Analysis  
Introduction  
Quality Norms of Raw Materials at IMFA  
Quality Deviations Experienced By IMFA  
Ferro Silicon Process Description  
Formation of Slags in Ferro Silicon  
Types of Slag  
Characteristics of Different Kinds of Slags  
Incompletely converted charge (Slagging)  
SiC with Si at the Bottom  
Crusts of Sintered Charge Materials in the Upper Parts of the Furnace  
Description of the Furnace  
Operating conditions of the Furnace  
Problems in the Furnace  
Observations on the Deteriorating Conditions  
Introduction of Lime Stone in the Burden  
Variation in the Slag Properties  
Operating Data  
Improvements in the Furnace Performance  
Comparison of Output Alloy Analysis  
Detrimental Effects of CaO in the Burden Charge

Overcoming the Problem of Alloy Disintegration

Remarks and Conclusion

Controlled solidification of Ferrosilicon

Conclusions and Outlook

## 12. PRODUCTION PROCESS OF FERRO CHROME

Medium-Carbon Ferro-Chrome

Low-Carbon Ferro-Chrome  
 Silico-Chromium  
 Ferro-Silicon and Silicon Alloys  
 Various Techniques to Produce Low Carbon Ferrochrome  
 Introduction  
 Problems of Carbon  
 Decarburization  
 Decarburization Techniques  
 Conventional Techniques  
 Refining of Ferrochrome by Chromium Ore  
 Refining of Ferrochrome by Blowing Oxygen  
 Refining of Ferrochrome with the Presence of Silica  
 Silicothermic Process for the Production of Low Carbon Ferrochrome  
 Production of Carbon Free Ferrochrome by Aluminothermic Method  
 Non Conventional Techniques  
 Decarburization of Solid Ferrochrome  
 Decarburization using Oxidizing Gas Mixture  
 Production of Low Carbon Ferrochrome from Chromite Ore  
 Khalafala's Method  
 Other Methods  
 Conclusion  
 Modern Practices of Post Taphole Operation in Ferro Chrome Production and its Advantages  
 Introduction  
 Mechanized Flow Sheet for Handling High Carbon Ferro Chrome Metal 62000 T/Y and Corresponding Slag  
 Post Taphole Concept  
 Taphole Installation  
 Conventional and Freeze Lining Concept  
 Taphole Configuration  
 Taphole Lining  
 Taphole Operation  
 Temperature Monitor and Control  
 Important Aspect for Effective Taphole Operation  
 Movable Tapping Platform  
 Receptacles  
 Skimming System  
 Casting, Crushing, Screening & Handling of Finished Product  
 Liquid Slag Handling and Disposal  
 Granulation Process  
 Recovery of Entrapped Metal from the Slag  
 13. PRODUCTION OF FERROALLOY FROM  
 SECONDARY RAW MATERIALS  
 Raw Material and Raw Material Preparation  
 Preprocessing  
 Mixing and Drying (Plasma Dust Process only)  
 Submerged arc Furnace Process  
 Plasmadust Process  
 14. PRODUCTION TECHNIQUES OF  
 FERROALLOYS  
 General  
 Process Description  
 Submerged Electric Arc Process  
 Exothermic (Metallothermic) Process  
 Electrolytic Processes

Emissions and Controls  
Aluminothermic Reduction of Oxides with Liquid Start  
Description  
Innovative Aspect and Main Advantages  
Areas of Application  
Atomisation of Ferroalloys  
The Atomisation Process  
Why Atomise (or Granulate)?  
To Produce a Saleable, Dust-free Brittle Product  
To Produce a Small-sized Ductile Product  
To Produce a Reactive Intermediate Product  
To Produce a "Rapidly Solidified" Product  
To Produce Special Powder Products  
Atomisation Processes  
Water Atomisation  
Gas/Air Atomisation  
Centrifugal Atomisation  
Atomised Products and Their Markets  
Ferrosilicon 15% Dense Medium  
Ferrosilicon 45% for the Welding Industry  
Ferromanganese for the Welding Industry  
Injectables  
Higher Melting Alloys  
Silicon  
Process Selection  
The Improvements to Copper Casting Machine for Ferroalloys  
Brief Description of Casting Machine  
Artificial Vision System  
Monitoring of Main Parameters of the Casting  
New Improvements of the Casting Machine  
Advantages of the Casting Machine  
From the Metal Quality Point of View  
From the Economical Point of View  
Application of Fluid Bed in Ferroalloy Industry  
Introduction  
Particle Characterization and Flow Regimes  
Fluidized Beds in the Ferroalloy Industry  
Ferrochromium Production  
Ferronickel Production  
Ferromanganese Production  
Conclusions  
Low Cost Ferroalloy Extraction in DC-ARC Furnace at Middleburg Ferrochrome  
Introduction  
The Process Principle of Ferroalloy Recovery  
Description of Electrical System in Place  
Designing the Electrical System According the Process' Need  
Keeping the Arc under Control  
Advantage of the DC-arc for Ferroalloy Recovery  
The Furnace' Conductive Bottom  
The Merits of the DC-arc  
Optimized Furnace Design  
Refractory Lifetime and General Maintenance  
Power Quality Considerations

System Overview  
What is Flicker?  
Flicker Calculation and Measurements  
Harmonics  
Power Factor  
DC Reactor Size  
Flicker Mitigation  
Production Increase  
Thermodynamics Applied to Ferroalloys Smelting  
Introduction  
Thermodynamic Data  
Chromium  
Titanium  
Niobium  
Vanadium  
Thermodynamic Slag Models and Computer Software  
Regular Solution Models  
Sublattice Models  
Quasi-chemical Models  
Other Models  
Optical Basicity  
Industrial Applications  
Dephosphorization of Ferromanganese Alloys  
Effect of Slag Composition  
Effect of Ferroalloy Composition  
Effect of Temperature  
Dephosphorization under Reducing Conditions  
Titanium Behavior Description in Silico-manganese Alloys  
Thermodynamic Modeling  
Industrial Application  
Conclusions  
Techno Economics of Recovering Ferroalloys from Dust and Slag  
Introduction  
Technology  
Metal Recovery from Slags  
Metal Separation  
Metal Fines Remelting/Refining  
Metal Recovery from EAF Dust  
Hydrometallurgical Processes  
Pyrometallurgical Processes  
Carbon Steel Dusts  
Stainless Steel Dusts  
Metal Fines Remelting/Refining  
Metal Recovery from EAF Dusts  
Pyrometallurgical Processes  
Carbon Steel Dusts  
Stainless Steel Dusts  
Conclusion  
Atomisation of Ferroalloys  
The Atomisation Process  
Why Atomise (or Granulate)?

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services

bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
