

Manufacture of Thinners & Solvents (Properties, Uses, Production, Formulation with Machinery Details) 2nd Edition

Author: NPCS Board of Consultants & Engineers

Format: Paperback

ISBN: 9789381039960

Code: NI306

Pages: 296

Price: Rs. 1,875.00 US\$ 50.67

Publisher: NIIR PROJECT CONSULTANCY SERVICES

Usually ships within 5 days

Solvents are defined as chemicals compound that are introduced during manufacture of the paint itself and before packaging, in order to maintain all components of the paint in a liquid / viscous state such as we know it. A solvent is usually a liquid but can also be a solid or a gas. Solvents find various applications in chemical, pharmaceutical, oil, and gas industries, including in chemical syntheses and purification processes.

Thinners are defined as chemical compounds that are introduced into the paint prior to application, in order to modify the viscosity and other properties related to the rate of curing that may affect the functionality and aesthetics of the final layer painting. Paint thinner, a solvent used in painting and decorating, for thinning oil-based paint and cleaning brushes. A Thinner may be a single solvent or a combination of solvent types. Often, specific thinners are required by the manufacturer of a coating to prevent damage to coating properties that may occur when an inappropriate thinner is used.

Solvents (for cleaning up or softening) and Thinners (for diluting or extending) are useful not only in painting but in other areas such as Wooden Furniture industry, Automobile industry, Ink industry, Rubber industry. As the paint industry is a major consumer of Thinners & Solvents, and is expanding at a tremendous speed, it is very obvious that the demand of thinners, too, will increase tremendously. The paints & coatings accounts for the largest share in the aliphatic hydrocarbon Thinners & Solvents market. It is also projected to be the fastest-growing application of the aliphatic hydrocarbon Thinners and Solvents market.

The book contains Properties, Uses, manufacturing of Thinners & Solvents and providing information regarding thinner formulation. It also covers raw material suppliers, photographs of plant & Machinery with supplier's contact details. Some of the fundamentals of the book are thinner in Paint Industry, Health and Safety Measures of Chemicals, Pollution Control, Waste Disposal of Hazardous Chemicals and Storage, Labelling and Packaging of Chemicals etc.

It will be a standard reference book for professionals and entrepreneurs. Those who are interested in this field can find the complete information from manufacture to final uses of Solvents and Thinners. It will be very helpful to consultants, new entrepreneurs, technocrats, research scholars, libraries and existing units.

Contents

Table of Contents

1. SOLVENTS

Classification of Solvents

Boiling Points
Rates of Evaporation
Polarity
Industrial Applications
Use
Chemical Composition
I. Organic Solvents
II. Inorganic Solvents
Chemical Structure
Behavior Toward Magdala Red

2. APPLICATION OF SOLVENTS

3. PROPERTIES OF SOLVENTS

Introduction
Molecular Weight
Boiling Point
Freezing Point
Density
Liquid Expansion Coefficient
Surface Tension and Absolute Viscosity
Flash Point and Explosive Limits
Autoignition Temperature
Electrical Conductivity
Immediate Danger to Life and Health

4. ENVIRONMENTAL, HEALTH AND SAFETY REGULATION

FireExplosive Peroxide Formation
Health Effects
Ways Solvents Can Enter Your Body
Absorption
Swallowing
What Are the Warning Signs?
Acute Poisoning
What to Do
Chronic Poisoning After Years of Repeated
Exposures, the Typical Later Effects are
What to Do
How Solvents Affect the Skin
What to Do
How Much Exposure is Bad for You?
Environmental Contamination
Duties of Employers and Employees
Material Safety Data
Training

5. MANUFACTURING PROCESS OF SOLVENT

6. USES OF SOLVENT IN VARIOUS INDUSTRIES

Adhesives and Sealants
Common Use of Adhesive in Various Industry
Sealants
Common Use of Sealants in Various Industry

Aerospace
 Acetone
 Alcohol
 Benzene
 Methyl Ethyl Ketone (MEK)
 Methylene Chloride
 Toluene
 Turpentine
 Mineral Spirits
 Naphtha
 Linseed OilAsphalt Compounding
 Biotechnology
 Biotransformation Using Solvent-Tolerant
 Microorganisms
 Solvent-Resistant Microorganisms
 Process of Solvent Toxicity for Microorganisms
 Choice of Solvent for Enzymatic Reaction in
 Organic Solvent
 Low Water Systems
 Classification of Organic Solvents
 (1) Water-Miscible Organic Solvents
 (2) Water-Immiscible Organic Solvents
 (3) Water-Insoluble Organic Solvents
 Classification of Solvents Commonly Used for
 Enzymatic Reactions in Organic Media

 Properties of Enzymes Affected by Organic
 Solvents
 Thermal Stability (Half-Life), $t_{1/2}$
 Specificity and Selectivity, K_{cat}/K_m
 Coil Coating
 Cosmetics and Personal Care Products
 Electronic Industry
 Cleaning in Electronics Manufacturing
 Factors Affecting Cleaning
 Dry Cleaning
 Drycleaning Solvents
 Petroleum Drycleaning Solvents
 Dry Cleaning Processes
 Solvent Storage Tanks
 Detergents
 Process of Cleaning
 Textile Finishing
 Waterproofing
 Milling
 Antistatic Finishing
 Fabricated Metal Products
 Machining OperationsMetal Parts Cleaning and Stripping
 Solvent Cleaning
 Aqueous (Alkaline and Acid) Cleaning and
 Stripping
 Abrasive Cleaning and Stripping
 Water Cleaning

Waste Streams
Food Industry
Mechanical Extraction
Solvent Extraction
The Solvent Extraction Process
Flow diagram of Oilseed Extraction Process
Review of Solvents Studied for Extraction
Efficiency
Iron Steel Industry
List of Solvents Releases from the Iron and Steel
Industry
Uses of Solvent in Ship Industry
Cleaning Operations Using Organic Solvents
Pulp and Paper

Printing Industry
Pharmaceutical Industry

7. ACETONE

Uses
Older Production Methods
Uses of Acetone
Uses of Acetone in Cosmetics
Uses of Acetone in Laboratory
Uses of Acetone in Electronics
Uses of Acetone in Domestic Purpose
Acetone Manufacturing Process
Production
Wacket-Hechst Direct Oxidation of Propene
Co-production in Hock Phenol Process

8. CITRUS TERPENES

Properties of Terpenoids
Citrus Terpenes for Cleaning
d-Limonene
Manufacturing Process

9. ETHYL ACETATE

Production
Formula and Structure
Applications
Technical Overview
Production of Ethyl Acetate

10. INDUSTRIAL ALCOHOL

Introduction
Manufacture
1. Bymalt Fermentation
Manufacture Process

11. TETRACHLORETHYLENE

Manufacturing Process
Chlorination of Ethylene Dichloride
Physical and Chemical Properties

Structural and Molecular Formulae and Relative
Molecular Mass

12. TOLUENE (METHYL BENZENE)

Structure and Formula

Various Manufacturing Process of Toluene

Alternate Catalytic Reforming Processes

Physical and Chemical Properties of Toluene

13. TURPENTINE

Extraction of Turpentine from the Wood Chips

Uses

1. Increases Efficacy of Paints and Varnish

2. Cleaning Agent

3. Stain Remover

4. Healthier Choice of a Solvent

5. Works Well as a Furniture Polish6. Eco-Friendly

The Turpentine Value Chain

14. SOLVENT RECYCLING, REMOVAL AND DEGRADATION

Introduction

Process Description and Emissions

General Processes in Solvent Recycling Operations

Solvent Recycling Operations

Solvent Storage

Solvent Handling

Initial Treatment

Typical Fixed-Bed Activated Carbon Solvent

Recycling System

Distillation and Purification

Distillation Process for Solvent Recycling

Spills

Equipment Leaks

Emission Estimation Techniques: Acceptable

Reliability and Uncertainty

Direct Measurement

Mass Balance

Engineering Calculations

Emission Factors

15. SOLVENTS MARKET

Industrial Solvent Market

Green Solvent and Bio-Solvents Market

16. THINNERS

Introduction

Uses of Thinners

Types of Thinner Used in industries

Types of Thinner Based on the Paint with which it is Mixed

17. MANUFACTURING PROCESS

Thinner Formulation

18. FORMULATION OF THINNERS

Epoxy Thinner

Composition of Ingredients

Handling and Storage

Physical and Chemical Properties

Paint Thinner

Composition of Thinner

Handling and Storage

Precautions to Be Taken in Handling

Precautions to be Taken in Storing

Physical and Chemical Properties

Acrylic Thinner

Composition/Information on Ingredients

Handling and Storage

Physical and Chemical Properties

Varnish Thinner

Composition/Information on Ingredients

Handling and Storage

Handling Precautions

Incompatible Materials

Storage Conditions

Physical and Chemical Properties

19. THINNER IN PAINT INDUSTRY

Odorless Paint Thinner

Requirements of the Thinners

Functions of the Thinners

Properties of Paint Thinner

Solvents Used as Paint Thinners Include

Other Solvents Sometimes Used in the Production of Paint Thinners Include

20. HEALTH AND SAFETY MEASURES OF CHEMICALS

Health Hazards

Solvents – Thinners

How to Control Health Hazards Environmental Control

Use Appropriate Personal Protection

Respirators

Eye and Hearing Protection

Protective Clothing

Handling and Storage

Accidental Release Measures

Precautions

Spill or Leak

Do Not Get Water Inside Containers

Fire and Explosion Hazards

Things to Do and Not to do Before Mixing Thinner in Paint

Material Safety Data Sheet

What is a Material Safety Data Sheet (MSDS)?

What is the Purpose of an MSDS?

What information is on the MSDS?

Reactivity Data

Why is an MSDS Hard to Read?

When Would We Use an MSDS?

Hazard Communication Standard

Solvents

21. POLLUTION CONTROL

Environmental Concerns

Pollution Caused by Thinner

Major Emissions

Impacts on Human Health and Environment

What is Pollution Prevention?

Methods for Reducing the Pollution

22. WASTE DISPOSAL OF HAZARDOUS CHEMICALS AND STORAGE

General Requirements for Storage of Chemicals

Prohibited and Restricted Hazardous Chemicals

Exposure Standards

Identifying Hazards Hazardous Chemicals Generated or Manufactured in the Workplace

Segregate Incompatibles

Segregate Families

Flammable Liquid Storage

Classifications of Flammable and Combustible

Liquids

Flammable Liquids

Combustible Liquids

Corrosive Storage

Transporting Chemicals

Hazardous Waste Disposal

General Requirements for Waste Disposal

Standard of Containers

Containers to be Resistant to the Contents

Containers should be in Good Condition

Containers to be Securely Closed

No Mixing of Incompatible Wastes in a Container

Sufficient Air Space in Containers When Storing

Liquid Wastes

Disposal of Paint Related Materials

Hazardous Waste Minimization

Process Level Impacts

23. B.I.S. SPECIFICATIONS OF SOLVENTS AND THINNERS

Solvents

Thinner

24. LABELLING AND PACKAGING OF CHEMICALS

Introduction

General Requirements of Labelling and Packaging in Accordance with the Chemical Labelling &

Packaging (CLP) Regulation

General Labelling Rules

Elements of the CLP Hazard Label

CLP Labelling Requirements Versus Discretion of the Supplier Classification of Hazardous Substance/Mixtures
Updating the Hazard Label
Labelling of Workplace Chemicals
Hazard Labels for Supply and Transport Outer and

Inner Packaging Classified for Supply but not for Transport
Outer and Inner Packaging Classified for Both
Transport and Supply
Single Packaging Classified Under Both Supply and Transport
CLP Rules on Packaging of Substances and Mixtures
Child-Resistant Fastening and Tactile Warnings of Danger
Child-Resistant Fastening (CRF)
Tactile Warning of Danger (TWD)
Hazard Pictograms
Shape, Colour and Dimensions
Precedence Rules
Blank Pictograms
Signal Words
Hazard Statements
Precautionary Statements
Codes for Hazard and Precautionary Statements
Code Ranges of Hazard and Precautionary Statements Under CLP
Guidance on Particular Aspects of CLP Hazard Labelling
Further Aspects to Consider for the CLP Hazard Label
Size of the Label and of the Label Elements
Minimum Dimensions of Labels and Pictograms Under CLP

25. PROCESS FLOW DIAGRAM

26. SAMPLE PLANT LAYOUT

27. PHOTOGRAPHS OF MACHINERY WITH SUPPLIER'S CONTACT DETAILS

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery,

Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
