

The Complete Technology Book on Textile Spinning, Weaving, Finishing and Printing (3rd Revised Edition)

Author: NIIR Board of Consultants & Engineers

Format: Paperback

ISBN: 9788178331638

Code: NI107

Pages: 564

Price: Rs. 1,725.00 **US\$** 46.62

Publisher: Asia Pacific Business Press Inc.

Usually ships within **5** days

Textile industry is one of the few basic industries, which is characterised as a necessary component of human life. One may classify it as a more glamorous industry, but whatever it is, it provides with the basic requirement called clothes. Spinning is the process of converting cotton or manmade fibre into yarn to be used for weaving and knitting. Weaving is a method of textile production in which two distinct sets of yarns or threads are interlaced at right angles to form a fabric or cloth. Finishing refers to the processes that convert the woven or knitted cloth into a usable material. Printing is the process of applying colour to fabric in definite patterns or designs.

The textile industry occupies an important position in the total volume of merchandise trade across countries. Developing countries account for little over two-third of world exports in textiles and clothing. It is the second largest employer after agriculture, providing employment to over 45 million people directly and 60 million people indirectly. The future for the textile industry looks promising, buoyed by both strong domestic consumption as well as export demand.

This book is based on the latest technology involved in textile industry, which describes the processes available at the spinning and fabric forming stages coupled with the complexities of the finishing and colouration processes to the production of wide ranges of products.

The major contents of the book are dyeing of textile materials, principles of spinning, process preparatory to spinning, principles of weaving, textile chemicals, yarn preparation, weaving and woven fabrics, knitting and knit fabrics, nonconventional fabrics, cellulosics, mixed fibers, printing compositions, printing processes, transfer dyes, transfer inks etc. It describes the manufacturing processes and photographs of plant & machinery with supplier's contact details.

It will be a standard reference book for professionals, entrepreneurs, textile mill owners, those studying and researching in this important area and others interested in the field of textile industry.

Contents

1. THE DYEING OF TEXTILE MATERIALS

Mordants
Assistants
Dyestuffs
Indigo
The Ingrain Dyes
Water Used in Dyeing
Interdependence of Processes
Processes Preliminary to Dyeing
Wool Scouring
“Boiling-off” Silk
Cotton Bleaching
Wool Dyeing Processes
Dyeing of Loose Wool
Slubbing (Silver)
Yarn Dyeing
Piece Dyeing
“Woaded Colours”
Blacks on Wool
Dark Blues, Greens, and Browns on Wool
Cotton Dyeing Processes
Fast Blacks on Cotton
Fast Colours on Cotton
Basic Colours on Cotton
Dyeing of Mercerized Cotton
Union Dyeing Processes
Silk Dyeing Processes
The Dyeing of Artificial Silk
Colour Matching
Fastness Properties of Dyes

2. THE PRINCIPLES OF SPINNING

Long Fibre Spinning
Short Fibre Spinning

3. PROCESS PREPARATORY TO SPINNING

Four Methods of Preparing Vegetable Fibres for Spinning
Four Methods of Preparing Animal Fibres for Spinning
Two Methods of Silk Preparation
Typical Example of the Method of
Preparing and Spinning
A Textile Material (China-grass or Ramie)
Preparatory Machines
The Cotton Gin
The Washing or Scouring Machine
The Dryer
The Cotton Scutcher
The Flax Scutcher
The Backwasher
The Preparing Gill-box
The Carder
The Dresser
The Comb
The Drawing-box

The Cone Drawing-box.
The French Drawing-box

4. THE PRINCIPLES OF WEAVING

Group-unit Weaving

Shedding

Picking

Beating-up

Letting-off and Taking-up

The Boxing Mechanism

The Stop-rod and Loose-reed Mechanism

The Weft-fork Mechanism

The Warp-stop Mechanism

The Spooling or Shuttling Mechanism

5. THE PRINCIPLES OF DESIGNING AND COLOURING

Materials

Interlacing

The Use of Point-paper

Colour

Figure Designing

6. THE PRINCIPLES OF FINISHING

Finishing Processes and Machines

Mending, Knotting and Burling

Scouring

Milling

Crabbing

Steaming

Dyeing

Washing-off

Drying

Tentering

Brushing and Raising

Cropping or Cutting

Singeing

Pressing

Calendering

Schreincring

Filling

Conditioning

Waterproofing

General Notes

7. TEXTILE CHEMICALS

Indian Demand

Demand for Bleaching Agents

Textile Bleach Formulation

Industry Trends and Success Factors

Outlook and Opportunities

Fluorescent Whitening Agent

Sector of Applications

Usage Pattern
 Industry Trends and Success Factors
 Outlook and Opportunity
 Flame Retardants
 Halogenated Compounds
 Non Halogenated Compounds
 Application
 Sector of Applications
 Bleaching Agents
 Use of Various Bleaching Agents on
 Textile Fibres
 Hydrogen Peroxide
 Sodium Hydrosulphite (Hydros)
 Sodium Hypochlorite
 Application and Formulations
 Bleaching Assistants
 Chelating Agents
 Fatty Alcohol Ethoxylate
 Carboxy Methyl Cellulose
 Demand
 Acrylates
 Industry Trends and Success Factors
 Pattern of Use and Formulation - Starch/
 Modified-Starch
 The Spin Finish Compositions for Polyester and Polyamide Yarn
 White Oil
 Industry Trends and Success Factors
 Warp Sizes
 Sector of Applications for Sizing Agents
 Filament Yarns
 Staple or Spun Yarn
 Starch/Modified Starch
 Demand
 Polyvinyl Alcohol
 Operations Involved in the Use of the
 Textile Chemicals
 Classification of Textile Chemicals
 Classification Based on Use Pattern
 Group Classification
 Yarn Lubricants
 Spin Finishing Agent

8. GLOBAL SCENARIO FOR TEXTILE CHEMICALS

Consumption Pattern of Textile Chemicals
 Estimated Global Market for Textile
 Chemicals
 Estimated Markets for Textile Chemicals in the Asia-Pacific Region (2001)
 Estimated Consumption of Textile Chemical in Different Regions
 Categories of Textile Chemicals Value
 (In Millions of Dollars)
 US Market for Textile Chemicals

Industry Trends and Success Factors
Outlook and Opportunities
Oxalic Acid
Polyethylene Glycol
Applications in Textile Industry
Silicone Oil/ Silicone Emulsion
Indian Demand for Silicone Oil/ Emulsion in
Textile Sector
Industry Trends and Successful Factor
Outlook and Opportunities
Emeu/Dmdheu
Industry Trends and Success Factors
Sulphur Black
Industry Trends and Outlook
Textile Enzymes
Cellulase/Amylase
Classification of Thickening Agent
Pigment Binders
Guar Gum
Sodium Alginate
Sodium/Zinc Formaldehyde Sulphoxylate
Styrene Butadiene Rubber - Lattices
Formaldehyde Based Resins
Industry Trends and Outlook
Indian Scenario
Consumption Pattern of Flame Retardent
Printing Auxiliary

9. YARN PREPARATION

Introduction
Winding
Quill Winding
Warping
Slashing or Warp Sizing
Drawing-In and Tying-In

10. WEAVING AND WOVEN FABRICS

Introduction
Woven Fabrics
Plain Weave
Rib Weaves
Basket Weaves
Twill Weaves
Satin Weaves
Drawing-In Draft, Chain and Reed Plans
Cover Factor
Other Terms Related to Single Fabrics
Weaving
Shedding
Filling Insertion
Beat-up
Warp and Fabric Control
The Weaving Cycle

Woven Fabric Production
Secondary Mechanisms (Motions) In A
Power Loom
Warp Stop Motions
Filling Stop Motions
Warp Protector Motion
Selvage Motion
Box Motion
Automatic Filling Transfer
Shuttleless Looms
Introduction
Rapier Looms
Projectile (Gripper) Looms
Fluid Jet Looms
New Weaving Technologies - Multiple
Shed Looms
Filling Accumulation Systems
Modification of the Salvage

11. KNITTING AND KNIT FABRICS

Introduction
Knitting Elements
Needles and Knitting Action
Sinkers
Weft Knitting
 Single Knitting
Single Knit Fabrics
Double Knitting
Double Knit Fabrics
Purl Knit Fabrics
Knit, Tuck and Float Loops
Weft Knit Design
Stitch Notation
Weft Knit Fabrics
Weft Knitted Fabric Production
Warp Knitting
Introduction
Major Machine Classification
Knitting Elements
Warp Knitting Action
Comparison between Tricot and Raschel
Warp Knit Design
Point Paper Notation
Single Bar Fabric
Two Bar Fabrics
Warp Knit Fabric Production

12. NONCONVENTIONAL FABRICS

Introduction
Nonwoven Systems and Fabrics
Chemically or Adhesively Bonded Fabrics
Mechanically Bonded Fabrics
Tufting

Flocking
Laminated and Bonded Fabrics
Wet Adhesive Bonding
Foam Flame Bonding

13. SYNTHETIC SUBSTRATES

Anthraquinones
Diverse synthetic substrates
Monoazo Dyestuffs
Water-Insoluble Monoazo Dyestuffs
Mixture of Monoazo Dyestuffs for
Polyesters
Azo Containing Compounds
Water-Soluble Disazo Dyestuffs for
Polyamides
Gold and Orange Prints on Polyamides
Azocoumarinic Dyes for Hydrophobia
Synthetics
Dyestuffs Tolerant to Temperature and pH
Variations
Printing of Nickel-Containing Polyolefins

14. NATURAL AND SYNTHETIC SUBSTRATES

Anthraquinones
Polyfluoro Acid Anthraquinone Dyestuffs for
Polyamides
Fibre Reactive Anthraquinone Compounds
Aminoan Thraquinone Reactive Disperse
Dyes
Azo Compounds
Naphtheylene and Tetrahydronaphthylene- containing Azo Dyestuffs
Monoazo Dyestuff Containing Fiber-
Reactive Group
Cold Water soluble Acid Dye Compositions
Polyvalent Metal and Azo-Barbituric Acid
Anionic and Cationic Dyes
Fluid and Stable Dispersions of Anionic
Dyes
Heterocyclic Cationic Dyestuffs
Water-soluble Quaternary Ammonium
Phenylazo Cationic Dyes

15. CELLULOSICS

Reactive Dyes
Organic Dye with Phosphonic Acid
Monofluoride
Aminonaphthyl Azobenzene Vinyl Rective
Dyes
Phthalocyanine Reactive Dyestuffs
Water-Soluble Fiber-Reactive Dyestuffs
Disperse Dyes
Fixation with Aliphatic Alcohols, Amines, or

Aminoalcohols
Azo Dyes having Substituted 2, 6-Diaminopyre
Coupling Component
Acyating Cellulose Fibers

16. MIXED FIBERS

Polyester and Wool
Tone-in-Tone Dyeing of Polyester-Wool
Blend
Cellulosics and Synthetic Polyamides
Marked Reactive Dyestuff
Swellable Cellulosics and Synthetics
Ethoxylated Condensate of Monocarboxylic
Acid and Hydroxyalkylamine
Water-soluble Solvent and Swelling Agent
Disazo Dyes Derived from Amino-pyrazole
Unformed Disperse Dye and Swelling Agent
Cellulosics and Synthetics
Unformed Disperse Dye with Reactive Dye
Textile Treated with Epoxy-group-containing
Compounds
 Impregnation with an Aqueous
Composition
Blends of Natural and Synthetic Fibers

17. PRINTING COMPOSITIONS

Printing Pastes with Developing Dyes
Improved Base Printing Process
Formic Acid as Developing Medium for
Azo Dyes
Auxiliary Agents in Print Formulations
Hydroxyalkyl Carboxyalkyl Cellulose
Thickening Agent
Sodium Cellulose Sulfate as Thickening and Acid Fixing Agent
Additive for Pigmentary Printing Pastes
Salts of Diaryl Ether Sulfonic Acids
Carrier for Cationic Dyes
Dye Carrier Comprising Phenyl Cyclohexane and Derivatives

18. PRINTING PROCESSES

Fixation
Fixation with Vapor of Organic Solvent
Dyestuffs for Methylene Chloride Fixation
Processes
Improved Fixation of Reactive Dyes on
Cellulose Fibers
Continuous Dyeing and Printing of Piece
Goods
Printing Heavy Pile Fabrics with Powder
Preparations
Improved Alignment of Printed Patterns
Uniform Heat-setting of Continuous Synthet

Filament Groups
Voluminous Substrate Rolled up with
Foramed Dye
Continuous Printing Process by Direct Liqui
Film Transfer Method for Printing and Flocking
Simultaneously
Sprayed Carriers for Continuous Print
Fixation

19. TRANSFER DYES

Anthraquinones
Anthraquinone Ink Formulation
Anthraquinone Dyes for Synthetics
Deep Yellow Colors on Polyesters
Indolenine Methines for Acid-modified
Synthetics
Heterocyclic Naphthalene Derivatives
Printing Polyacrylonitriles with Disperse
Dyes
Disperse Dyes Containing Carboxylic Acid
Groups
Hydrolyzable Silyl-substituted Dye stuffs
Nitroacridone Dye stuffs
Heat Transfer Black Dye stuff A
Heat Transfer Black Dye stuff B
Dye stuff Combinations for Long-Pile
Fabrics

20. TRANSFER INKS

Organic Base
Cationic Dyes in Organic Solvents
Carbinol Base of Cationic Dye stuff as
Dye stuff Intermediate
These Inks are characterized in that they contain at Least
Sublimable Dye stuff Base on Acid-Modified
Fibres
Aqueous and Oil in Water
Aqueous Preparations of Sparingly Soluble
Dye stuffs
Organic-aqueous Printing Inks
Water-dilutable Transfer Ink Compositions
Dry Preparation
Hot-Melt and Hot-Stamp Inks
Hot-Melt Ink Composition
N-Methoxymethylated Nylon Copolymer for
Hot-Stamp Ink
Production of Transfer Paper by Rotary
Screen Printing
Transfer Inks for Household Use
Inks of High Filler Content
UV-curable Inks For Offset-printing
Transfers

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

NIIR PROJECT CONSULTANCY SERVICES , 106-E, Kamla Nagar, New Delhi-110007, India. **Email:** npcs.india@gmail.com **Website:** NIIR.org
