

The Complete book on Natural Dyes & Pigments

Author: NIIR Board of Consultants & Engineers

Format: Paperback

ISBN: 8178330326

Code: NI160

Pages: 448

Price: Rs. 1,100.00 US\$ 125.00

Publisher: Asia Pacific Business Press Inc.

Usually ships within **5** days

Natural dyes are dyes or colorants derived from plants, invertebrates, or minerals. The majority of natural dyes are vegetable dyes from plant sources. Dyeing is the process of imparting colors to a textile material. Different classes of dyes are used for different types of fiber and at different stages of the textile production process, from loose fibers through yarn and cloth to completed garments. There are technologies that manufacture the pigments for plastics, rubber and cosmetics. Therefore; dyes and pigments have a vast area of applications and have a huge demand in industry. Contrary to popular opinion, natural dyes are often neither safer nor more ecologically sound than synthetic dyes. They are less permanent, more difficult to apply, wash out more easily, and often involve the use of highly toxic mordant. Of course, the colour possibilities are far more limited; the color of any natural dye may be easily copied by mixing synthetic dyes, but many other colors are not easily obtained with natural dyes. However, some mordant are not very toxic, and the idea of natural dyestuffs is aesthetically pleasing. Applying natural dyes in your fabric production using enzymes will reduce your production cost and improve control. There are various kind of natural dyes; quinonoid dyes, cyanine dyes, azo dyes, biflavyonyl dyes, omochromes, anthraquinone, coprosma gesus etc. The use of natural dyes in cloth making can be seen as a necessary luxury to trigger off a change in habits. Dyes which stand out for their beauty and ecological attributes would never be employed on just any material but on noble fabrics such as wool, silk, linen or cotton, made to last more than one season. Market value will benefit from consumer preferences for environmentally friendly products, which will support consumption of high performance dyes and organic pigments.

This book basically deals with the use of carotenoids as food colours , bianthraquinones and related compounds, intermediate degradation products of biflavonyls, dyestuffs containing nuclear sulphonic and carboxylic acid groups, quinonoid dyes, cyanine dyes, optical whitening agents, natural dyes for food, stability of natural colourants in foods effect of additives, pyrimidine pigments, the total synthesis of the polyene pigments, red pigment from geniposidic acid and amino compound, effect of acid and amine on the formation of red pigment from geniposidic acid, effect of the substituted position of amino group and chain length of amino compound etc.

Due to pollution problems in synthetic dyes and pigments industry, the whole world is shifting towards the manufacturing of natural dyes and pigments. The present book contains techniques of producing different natural dyes and pigments, which has huge demand in domestic as well as in foreign market. It is hoped that entrepreneurs, technocrats, existing units, institutional libraries will find this book very useful.

Contents

1. Ommochromes

Distribution
A. Ommatins
B. Ommins
Isolation and Purification
A. Ommatins
B. Ommins
Structure of the Ommochromes*
Xanthommatin
Ommatin D
Rhodommatin
Ommin A X
Biogenesis
2. Bisdehydrocanthaxanthin
3. Carotenoids Field
Carotenoid Biogenesis
Carotenoid Total Syntheses
The use of Carotenoids as Food Colours
4. Black pigments
Animal Pigments
Melanins
Sclerotization
Plant Pigments
Humic acids
1,8-Dihydroxynaphthalene polymers
5. Anthraquinone
Plant Pigments
Insect Pigments
6. Coprosma genus
7. Bianthraquinones and related compounds
Skyrin
Oxyskyrin
Skyrinol
Iridoskyrin
Rugulosin
Luteoskyrin and Rubroskyrin
Lumiluteoskyrin
Flavoskyrin
Biogenesis
8. The Biflavonyl Pigments
The First Investigations
The Work of Nakazawa on Ginkgetin
The Work of the Bristol Group
On Ginkgetin and Isoginkgetin
The Work of Kariyone and Kawano on
Sciadopitysin, 1956
Further Work of Brispol Group on
Ginkgetin and Sciadopitysin
The Work of Kawano on Sciadopitysin and GINKGETIN, 1959
The Synthesis of Ginkgetin Tetramethyl ether, Nakazawa, 1959
The Structure of Ginkgetin
The Structure of Isoginkgetin
The Structure of Kayafyavone
The Structure of Sotetsuflavone

Summary of Biflavonyl Structures

Intermediate Degradation Products of Biflavonyls

Optical Inactivity of the Biflavonyls

The Structure of Hinokiflavone

Natural Occurrence of Biflavonyls

9. Azo dyes

10. Dyestuffs

Introduction

Primary Products for VS-Dyestuffs

1. Methods of preparation

2. Reactions

Processes for the Manufacture of VS-Dyestuffs

Fastness and Dyeing Properties of VS-Dyestuffs

1. VS-Dyestuffs free from nuclear sulphonic and carboxylic acid groups

2. Dyestuffs containing nuclear sulphonic and carboxylic acid groups

Summary

11. Disperse dyes

Light Fastness

Gas Fastness

Sublimation Fastness

Wash Fastness

Structural Modifications Leading to All-Round Fastness

12. Quinonoid dyes

13. Cyanine dyes

Chemistry of 2, 3-Dichloro-1,4-Naphthoquinone (I)

Chemistry of Chloranil (II)

Vat Dyes from Chloranil

Benzodipyrrocolinequinones Pyrrocolinequinones,

Unsymmetrical Dipyrrocolinequinones and Naphth of Uranopyrrocolinequinones

2-alkylamino-(arylamino)-3-chloro-1,

4-naphthoquinones And Di-3-(2-chloro-1,

4-naphthoquinonyl)-alkylamines And Arylamines

Cellulose Acetate Dyes From (i) And (ii)

Synthesis Of Non-coplanar Quinonoid Dyes

14. Fluorescent brightening agents

15. Optical whitening agents

Introduction

Physical Considerations of Fluorescence and Optical Whitening

Chemical constitution of Optical Whitening Agents

1. Stilbene derivatives

2. Benzidine derivatives

3. Benzthiazole, benzoxazole and benzimidazole derivatives

4. Coumarins

5. Pyrazolines

6. Other types

Some Specific Applications of Optical

Whitening Agents

1. Soaps and detergents

2. Textile applications

16. Natural dyes for Food

- Natural Colourants
 - Natural Colours Presently Used in Food
 - Methods of Improving Natural Colourants
- Novel Sources of Natural Colourants
 - Microbial Sources
 - Animal Sources
 - Plant Source
 - General Reviews
 - Colourants from By-products
 - Gardenia Extracts
 - Other Sources
 - Feasibility of Novel Sources
- Stability of Natural Colourants in Foods Effect of Additives
 - Ascorbic Acid and Derivatives
 - Effect of Metal Ions
 - Effect of Neutral Salts
 - Effect of Organic Acids
 - Photoprotection
 - Miscellaneous Additives
 - Conclusion
- Stable Forms of Natural Colourants Found in Vivo
- Stabilised Forms Of Natural Colourants Flavonoids
 - Chemical Features Affecting Stability
 - Self association
 - Complex formation
 - Copigmentation
 - Condensation
 - Chemical modifications
- Porphyryns
- Others
- 17. Pyran Pigments : I. Flavones and Flavonols
- Flavones
 - Chrysin (IV)
- General Methods of Synthesis of Flavones
 - A. From Aromatic Diketones
 - B. From o-Hydroxyacetophenones
 - C. From o-Hydroxychalkones
 - D. From Phenols
- Flavonols
 - The Wessely-moser and Related
 - Rearrangements of Flavones
 - The Formation of Salts by Flavones and Flavonols
 - The Reduction of Flavones
- Isoflavones
 - The Synthesis of Isoflavones
- 18. Pyran Pigments : II. Anthocyanins and Anthocyanidins
- Cyanidin (III)
 - The Synthesis of Anthocyanidins
 - The Synthesis of Anthocyanins
 - Color Reactions of The Anthocyanidins and Anthocyanins
- Anhydrobases
 - Carajurin (XCIX)
 - Dracorubin (CXXV)

19. Pyran Pigments : III. Xanthones
 Ravenelin (II)
 Mangostin (XI)
 Pyran Pigments : IV. Rottlerin
 Pyran Pigments : V. Brazilin and Hematoxylin
 Brazilin (XXXII)
 Hematoxylin (XL)
 Trimethylbrazilone (XLI)
 Brazilein (LXXIX, R - H)
 The Synthesis Of Brazilin
 Pyrrole Pigments : I. The Porphyrins
 Hemin (cxxxvii)
 The Synthesis of Dipyrromethenes
 The Synthesis of Porphyrins
 The Structure of Hemin
 Pyrrole Pigments : II. Chlorophylls
 Pheoporphyrin, Chloroporphyrin, and Phylloerythrin
 The Vinyl Group in Chlorophyll
 The Structure of Chlorophyll
 Position of the Phytol Group in Chlorophyll
 The Phase Test
 Allomerization
 Approaches to the Synthesis of Chlorophyll
 Chlorophyll-b
 Bacteriochlorophyll
 20. Pyrrole Pigments : III. The Bile Pigments
 Bilirubin (XXXII)
 Verdins
 Violins
 Bilenes
 Bilanes
 Stereochemistry and Tautomerism
 Complex Salts of the Bile Pigments
 Pyrrole Pigments : IV. Prodigiosin
 21. Pyrimidine Pigments : The pterins
 The Gmelin Reaction
 Pterorhodin
 22. Quinonoid Pigments
 Benzoquinonoid Pigments
 Perezone (XII)
 Polyporic Acid (XIV)
 Astromentin (XXVIII)
 Phoenicin (LXI)
 Napthaquinonoid Pigments
 Lapachol (LXXI)
 Eleutherin (CXXI)
 Alkannin and Shikonin (CXLIX)
 Anthraquinonoid Pigments
 Helminthosporin (CLVIII)
 Kermesic Acid (CLXI)
 Skyrin (CLXXVIII)
 Extended Quinone Pigments
 The Aphin Pigments

Erythroaphin-fb (CCXVI) or (CCXVII)
Hypericin (CCXXV)

23. Polyene Pigments
Bixin (X) and Crocetin (XI) the Carotenes
b-Carotene (LV)
Lycopene (LXXIII)
The Total Synthesis of the Polyene Pigments
Combination of Units in the Order C19 + C2 + C19
Combination of Units in the Order C16 + C8 + C16
Combination of units in the Order C14 + C12 + C14
Combination of Units in the Order C10 + C20 + C10
The Dehydro - Retrodehydrocarotenoids Epoxides
and Furanoid Oxides

24. Anthocyanins from Indian varieties of Grapes
Material and Methods
Extraction
Purification
Total anthocyanins
Separation
Partial hydrolysis of anthocyanin
Aglycone and sugar
Acyl moieties
Spectral measurements
Thin layer chromatography
Results and Discussion
Recovery of anthocyanin
Separation of pigments by paper chromatography
Absorption spectra of pigments
Partial hydrolysis of anthocyanins
Aglycones
Sugar identification
Acyl moieties

25. Red pigment from Geniposidic Acid and Amino Compound
Materials and Methods
Preparation of geniposide (GS) and GSA solution
Preparation of other iridoid compounds
Enzyme and reagents
General method of preparation of pigment
Evaluation of pigment
Identification and quantification of carbon dioxide
HPLC and NMR measurement
Structural relationship of iridoids to red pigment production
Acidity and evolution of carbon dioxide
Time course of enzymic reaction
Acidity and atmosphere on the reaction
HPLC monitoring of the pigment formation from GAA
and α -alanine
NMR monitoring of the pigment formation from GAA
and methylamine
Results and Discussion
The relationship between the evolution of carbon dioxide
and reaction pH
The process of formation of red pigment

Molecular mass and colour evaluation of red pigment derived from GAA and α -alanine

NMR spectroscopy of red pigment formed from GAA and methylamine

Monitoring of the reaction by NMR

The formation mechanism of red pigment

26. Effect of Acid and Amine on the formation of Red Pigment from Geniposidic Acid

Materials and Methods

Preparation of geniposide (GS)

Preparation of geniposidic acid (GSA) solution

Enzyme and reagents

General procedure for the red pigment formation

Evaluation of pigment

Kind of acid

The concentration of organic acid

The substituted position of amino group and chain length of amino compound

Kind of amino compound

Results and Discussion

Effect of acidz

Effect of the substituted position of amino group and chain length of amino compound

Kind of amino compound

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

NIIR PROJECT CONSULTANCY SERVICES , 106-E, Kamla Nagar, New Delhi-110007, India. **Email:** npcs.india@gmail.com **Website:** NIIR.org
