

# The Complete Book on Construction Materials

**Author:** NPCS Board of Consultants & Engineers

**Format:** Paperback

**ISBN:** 9788190439831

**Code:** NI190

**Pages:** 672

**Price:** Rs. 1,475.00 **US\$** 150.00

**Publisher:** NIIR PROJECT CONSULTANCY SERVICES

Usually ships within **5** days

The book provide wide coverage of building materials such as stone, bricks, lime, mortars, concrete, asbestos, gray iron, cast iron, steel castings, aluminium, wood, architectural paints and so many others with their applications in building construction. The book is very useful for all professionals related to construction field, technocrats, students and libraries.

## Contents

### 1. STONE

Introduction

Rock and Stone

Formation of Rocks

Classification of Rocks

Geological classification

Metamorphism

Physical classification of rocks

Chemical classification

Classification based upon hardness of the stone

Composition of Stone (Rock-forming Minerals)

Igneous rock forming minerals

Sedimentary Rock Forming Minerals

Texture of the Rocks

Types of Fractures of Rock

Uses of Stone

Natural bed of Stone

Seasoning of Stones

Characteristics or Qualities of Stones

Characteristics of principle Building Stones

Properties

Decay or Deterioration of Stones  
Preservation of Stone  
Artificial Stone  
Important point to be Considered before Starting Quarrying  
Methods of quarrying Stone  
Various Operations of Blasting  
Precautions in Blasting  
Blasting materials  
Making of Primer Cartridge  
Storing of explosives  
Handling of misfires  
Dressing of Stone  
Machines Required for Quarrying Stone

## 2. BRICKS AND OTHER CLAY PRODUCTS

Introduction  
Brick Earth and its Constituents  
Sources of Brick Earth  
Qualities of Brick Earth  
Chemical composition of Brick Earth  
Functions of the constituents of Brick Earth  
Harmful Ingredients  
Pebbles of Stones and Gravel  
Alkaline-Salts  
Limestone and Kankar  
Vegetation and Organic Matter  
Manufacture of Clay Bricks  
Selection of site  
Preparation of Clay  
Weathering Process  
Tempering process  
Moulding of bricks  
Soft mud process  
Procedure  
Stiff Mud Process  
Semi Dry Process  
Drying of Bricks  
Natural Drying  
Artificial Drying  
Burning of Bricks  
Clamp  
Intermittent Kilns  
Continuous Kilns  
Classification of Burnt Clay Bricks  
Introduction  
Properties of Burnt Clay Bricks  
General Quality of Bricks  
Dimensions and Tolerances  
Water Absorption of Bricks  
Efflorescence  
Strength of Bricks  
Testing of Bricks  
Test for Compressive Strength

Test for Water Absorption  
Test for efflorescence  
Test for warpage  
Special Bricks  
Specially shaped Bricks  
Burnt Clay Facing Bricks  
Heavy Duty Bricks  
Perforated building bricks  
Sand lime Bricks  
Sewer Bricks  
Acid Resistant Bricks  
Refractory Bricks  
Manufacture  
Acid bricks  
Basic Bricks  
Neutral Bricks  
Building Tiles  
Process for Manufacturing Roofing Tiles  
Process for Manufacturing Flooring and Wall Tiles  
Specifications for Building Tiles  
Earthenwares  
Glazed Earthenware Tiles  
Terracotta  
Stoneware

### 3. LIME

General  
Properties of Lime  
Uses of Lime  
Source of Lime  
Some Important Terms and their Definitions  
Varieties of lime  
Classification of Lime  
Uses of fat lime  
Classification of Lime According to I.S. 712-1984  
Indian Standard Specification for Lime  
Manufacturing process  
Description of Each Stage of Operation  
Field Control Test for Assessing Quality of Lime  
Manufacture of Fat Lime  
Advantages of continuous kiln  
Manufacture of Natural Hydraulic Lime  
Manufacture of Artificial Hydraulic Lime  
Storage of Lime  
Field Slaking of Lime and Preparation of Putty  
Objective of Slaking  
Slaking Process  
Determining the Slaking Nature of Lime  
Slaking Procedure for Quick Slaking Lime  
Initial Preparation  
Methods of Slaking Lime  
General Precautions in Slaking  
Slaking Procedure for Medium and Slow-slaking Limes

Running  
Maturing  
Making Coarse Stuff and Putty from Hydrated Lime or Powder  
Coarse Stuff  
Putty  
Storage after slaking  
Testing of Lime  
Classification of binding materials  
Precautions to be taken in handling lime  
Properties of Lime

#### 4. MORTARS

Definitions  
Sand  
Classification Based on Fineness  
Bulking of Sand  
Desirable Properties of Sand  
Function of Sand in Mortars  
Fineness Modulus of Sand  
Tests for Sand  
Selection of Sand for Use  
Substitutes for Sand  
Types of Mortars  
Special Mortars  
Properties of Good Mortar  
Test for Mortars  
Precautions in using Mortar

#### 5. CONCRETE

Introduction  
Lime Concrete  
Preparation of lime Concrete  
Laying of Lime Concrete  
Properties of Lime Concrete  
Use and Precautions  
Water  
Coarse Aggregate  
Grading of Aggregate  
Proportioning of Fine Aggregate to Coarse Aggregate  
Maximum Size of the Aggregate  
Measurement of Cement Concrete Ingredients  
Significance of Bulking of Sand  
Water Cement Ratio (W/C Ratio)  
Proportioning of Concrete Mixes  
Cube strength of Concrete  
Properties of Cement Concrete  
Slump Test  
Factors Affecting Proportions of Concrete  
Strength of Concrete  
Mixing of Concrete  
Transporting the Concrete  
Placing of Concrete  
Consolidation or Compaction of Concrete

Finishing  
Curing of Concrete  
Removal of Form Work  
Joints in Concrete  
Some other Types of Cement Concretes  
Form Work

## 6. ASBESTOS

Introduction  
Commercial Focus  
Asbestos Sheets and Boards  
Asbestos Cement Pipes

## 7. ASPHALT, BITUMEN AND TAR

Introduction  
Terminology  
Asphalt/Bitumen  
Other Allied Terms  
Bituminous Materials  
Bitumen Felt/Tar Felt  
Specifications and use  
Other Bituminous Materials  
Tests for Bitumen  
Tar

## 8. GRAY IRON

The Metastable Iron-Iron Carbide System  
Solidification of an Fe-C-Si Alloy  
Chemical Composition Effects  
Carbon  
Silicon  
Silicon Content and Graphitization  
Sulfur and Manganese  
Phosphorus  
Gray-iron Specifications  
Heat-treatment of Gray Iron  
Machinability  
Wear Resistance  
Strength  
Stress Relief  
Alloying Elements  
Effect on Microstructure  
Chromium  
Molybdenum, Molybdenum-Nickel  
Nickel  
Silicon  
Copper  
Aluminum and Titanium  
Effect on Properties

## 9. CAST IRON

Definitions  
Chemical Composition

Composition and Graphitization  
Solidification Process  
Microstructure  
Graphite  
Cementite  
Ferrite  
Pearlite  
Steadite  
Austenite  
Properties of Cast Irons  
White Irons  
Chilled Iron

## 10. STEEL CASTINGS

Introduction  
Molding Processes And Sands  
Green-sand Molding  
Refractoriness  
High permeability and Low Moisture Content  
Organic and Other Additions  
Green-sand-molding Casing Defects  
Dry-sand Molds and Skin-dried Molds  
Other Types of Molds  
Molding Methods  
Cores  
Hot-tear Formation  
Metal penetration  
Burn-on  
Ceroxides  
Core and Mold Washes

## 11. ALUMINIUM AND MAGNESIUM ALLOYS

ALuminum Alloying Principles  
Copper  
Heat-treatment of Cu-Al Alloys  
Silicon  
Magnesium  
Magnesium and silicon

## 12. DUCTILE IRON

Solidification Of Ductile Iron  
Development of Graphite Spheroids  
Role of Magnesium  
Control of the Common Elements  
Carbon  
Silicon  
Sulfur  
Phosphorus  
Other Elements  
Melting Practices  
Acid Cupola Melting  
Desulfurization  
Basic Cupola Melting

Induction-furnace Melting  
Magnesium Treatment  
Inoculation  
Engineering Properties

### 13. MALLEABLE IRON

Melting  
Batch-Melting Process  
Engineering Properties  
Pearlitic Malleable Irons  
Other Malleable Irons

### 14. RESIN CHARACTERIZATION

Introduction  
Scope  
Mechanical Properties of a Partially Cured Resin – DMA Characterization  
Chemical Advancement of a Partially Cured Resin – Differential Scanning Calorimeter Characterization  
Chemical-Mechanical Relations  
Moisture Content as a Variable  
Flake Bonding  
Measurement of Pressing Environments  
Resin Penetration  
Practical Application

### 15. THERMO-GRAVIMETRY OF WOOD REACTED WITH FLAME RETARDANTS

Introduction  
Experimental Methods  
Results and Discussion  
Phosphorus And Nitrogen  
Thermogravimetry  
Flame Test  
Conclusions

### 16. WETTABILITY AND WATER REPELLENCY OF WOOD

Introduction  
Experimental  
Wood materials  
Automated surface tension analyzer  
Computer program: wood wettability study  
Graph  
Contact angle from attractive force  
Contact angle from work of adhesion  
Surface free energy estimation  
Interaction parameter calculation  
Aging effect  
Results and Discussion  
Aging effect  
Surface free energy estimates  
Interaction parameter calculation

### 17. FLAME RETARDANT TREATMENT OF WOOD

Introduction

Materials and Methods  
Preparation of specimens  
Treatment of specimens  
Leaching  
Dimensional stability tests  
Thermogravimetric analysis  
Results and Discussion  
Treatment of specimens  
Leach resistance  
Dimensional stability  
Thermal degradation  
Conclusions

## 18. FUNGAL AND TERMITE RESISTANCE OF WOOD

Introduction  
Materials and Methods  
Fungal evaluations  
Termite evaluations  
Reaction time and chemical analysis  
Results and Discussion  
Decay Resistance  
Chemical Analysis  
Conclusions

## 19. WEATHERING OF WOOD

Introduction  
Early History  
The Weathering Process  
Weathering Factors  
Property Changes  
Weathering of Wood-Based Materials  
Protection Against Weathering  
Film-forming Materials  
Penetrating Finishes  
Summary

## 20. ARCHITECTURAL PAINTS

Introduction  
Exterior Paints for Wood  
Characteristics of Wood Siding  
Binders for Exterior House Paints  
Pigments for Colored Paints  
Microorganisms in Paints and Coatings  
Formulating Exterior Paints for Wood  
Interior Paints for Plaster and Wallboard  
Exterior Emulsion Paints for Masonry  
Exterior Solution Type Paints for Masonry  
Interior and Exterior Enamels  
Enamels for Wood and Concrete Floors

## 21. BUILDING CONSTRUCTION ADHESIVES

Introduction  
Advantage of Using Adhesives in Construction

- Elastomeric Adhesives
- Gap-Filling Phenol Resorcinol Adhesives
- Polyurethane Adhesives
- Resorcinol Resin Adhesives
- Casein Adhesives
- Polyvinyl Acetate Resin Emulsion
- Phenolic Resin Adhesives
- Melamine-Urea Resin Adhesives
- Urea Resin Adhesives
- Epoxy Resin Adhesives
- Contact Cement

## 22. FLOORING

- Domestic Flooring
- Institutional Flooring
- Industrial Flooring
- Types Of Epoxy Flooring
- Self-levelling Floors
- Trowelled Floors
- Epoxy Terrazzo
- Future Developments In Epoxy Floors

## 23. MINING

- Adhesion And Grouting
- Remedial Uses
- Concrete Crack Repair
- Bonding Concrete to Concrete
- Bonding Reinforcements
- Epoxy Bonding in New Structures
- Fire Resistance
- Bulk Mechanical Properties
- Creep
- Miscellaneous Bonding Applications

## 24. GROUTS FOR LEVELLING: MISC. APPLICATIONS

- Miscellaneous Applications
- Soil consolidation
- Tile grouts
- Epoxy laminates for concrete moulds
- Resin concrete

## 25. GLASS

- Structure
- Composition
- Single-Phase Glasses
- Properties
- Manufacture and Processing
- Economic Aspects

## 26. CEMENT

- Clinker Chemistry
- Hydration

Cement Paste Structure and Concrete Properties  
Manufacture  
Portland Cements  
Special Purpose and Blended Cements  
Nonportland Cements  
Economic Aspects, Production, and Shipment  
Specifications and Types  
Uses

## 27. INSULATING MATERIALS

Introduction  
Thermal Insulation  
Terminology Related to Thermal Insulation  
Requirements of Thermal Insulating Materials  
Types of Insulating Materials  
Air Spaces  
Aerated Concrete  
Gypsum  
Expanded Blast Furnace Slag  
Sprayed Asbestos  
Vermiculite  
Coconut Fibres  
Cork Board  
Rock Wool  
Cellulose  
Cellular Plastics  
Fibre Glass  
Sound Insulation  
Terminology  
Units of Sound  
Velocity of Sound  
Acoustics  
Noise  
Requirement of Sound Insulating Materials  
Types of Acoustical Materials  
Acoustic Pulp  
Acoustical Plaster  
Unifil Acoustical Plaster  
Limpet Asbestos  
Thermacoustic  
Prefabricated Boards or Tiles  
Glass Fibres  
Composite Units

## About NIIR

**NIIR Project Consultancy Services (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project

Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry.

NPCS also publishes various technology books, directory, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureau, consultants and consultancy firms as one of the input in their research.
