

Handbook on Oleoresin and Pine Chemicals (Rosin, Terpene Derivatives, Tall Oil, Resin & Dimer Acids)

Author: H Panda
Format: Paperback
ISBN: 8178330199
Code: NI207
Pages: 608
Price: Rs. 2,200.00 **US\$** 200.00
Publisher: Asia Pacific Business Press Inc.
Usually ships within **5** days

Pines are known to mankind from the time immemorial. It offers both direct uses, as well as indirect uses specially soil conservation. Initially it was used mainly for fuel; their branches were used for festivals etc. However, now pine trees are used as a source of resin which on distillation yields gum rosin and turpentine oil. The genus pine species tapped for their oleoresin in different countries.

The present book has been published having in views the important uses of pines. The book contains manufacturing process of different products extracted from pines like oleoresin, rosin, turpentine derivatives, tall oil, resins and dimer acids etc.

This is the first book of its kind which is very useful for all from researchers to professionals.

Contents

1. PINUS
 - Introduction
 - Distribution
 - Distribution in India
 - Morphology
 - Key to the Identification of Indian Species
 - Anatomy
 - Root
 - Root-Stem Transition
 - Shoot Apex

Stem
Leaf
Embryology
Male Cones
Female Cones
Pollination
Receptive Spot
Fertilization
Embryogeny
Seed Coat
Wing
Germination
Cytology
Seed Testing
Seed Production and Dormancy
Breeding
Diseases
Mycorrhiza
Pests

2. PINE OLEORESIN EXTRACTION METHODS

Introduction
Cup the Larger-Diameter Trees for Increased Yields and Greater Profits
Double-Facing
Gum Yield from Shoulders
Use Currect Tin Lengths
First-Year Installation of Spiral Gutters with Double-Headed Nails
Shaving the Bark
Attach the Apron First
Attaching the Spiral Gutter
Completed Installation
Use of the Advanced Streak
Turpentine and Growth
Bark Chipping
Mounting and Sharpening the Bark Hack
Treating the Streak
Acid Penetration Above the Streak
Wounding the Tree for Gum Production
Metal Cups, Acid Corrosion and Gum Grades
Raising Tins Installed with Double-Headed Nails
Bark Pulling and Acid Treatment
How to Use the Spray-Puller
Acid Paste Method
Applying the Paste
Chipping and Paste Treatment
Streak Height
Turpented Section Suitable for Other Wood Products
Beetle Attacks and Control Measures
The Black Turpentine Beetle
The Ips Beetle
Solutions for Beetle Control

3. PINES FOR THEIR OLEORESIN

Occurrence, Formation and Exudation of Oleoresin in Pines
Oleoresin Tapping

French Methods
Spanish Method
Greek Method
Indian Method
Mexican Method
American Bark-Chipping Method
The Austrian and German "Herringbone" Methods
Russian Methods
Methods in Other Countries
Felled Pine Wood as Source of Rosin and Turpentine
Composition of Oleoresin
Summary
4. PROCESSING OF OLEORESIN
Processing of Oleoresin
Olustee Gum Cleaning Process
Recovery of Turpentine and Rosin
Stripping Column
Multiple Tube Column
Luwa Columns
Fractionation of Turpentine
Batch Operation
Semi-Continuous Operation
Continuous Operation
Column Packings
Isomerisation of α -Pinene
Camphene Via Bornyl Chloride
Catalytic Isomerisation of α -pinene
Reaction Mechanism
Design Aspect of an Isomerisation Reactor
Liquid Phase
Vapor Phase
5. ROSIN DERIVATIVES AND ITS POTENTIAL
6. HYDROGENLESS HYDROGENATION OF RESIN
ACIDS
Experimental
Results and Discussion
Transfer Hydrogenation of Isopimaric/Pimaric Acids
Transfer Hydrogenation of Abietic Acids
Reaction Mechanism
7. NEW DEVELOPMENTS IN ROSIN ESTER AND
DIMER CHEMISTRY
New Rosin Esters
Chemistry of Rosin Dimers
8. TERPENE RESINS
Physical Properties
Chemical Properties
Manufacture
Uses
9. TERPENE BASED ADHESIVES
Introduction
Chemistry
Beta-Pinene Resins
Initiation

Propagation
Termination
Dipentene Resins
Alpha-Pinene Resins
Physical Characteristics of Resins
Pressure Sensitive Adhesives
Hot Melt Adhesives
Analytical Methods
Commercial Resins and Their Uses
Commercial Production
Applications in Pressure Sensitive Adhesives
Applications in Hot Melt Adhesives
10. OZONOLYSIS OF ALPHA-PINENE
Effect of Solvent, Ozone Concentration and Temperature on Yields were Investigated
Experimental Conditions are Discussed
11. α -BROMOLONGIFOLENE
Steam Distilled Products
Residue
Chromic Acid Oxidation of Dilongifolenyl Ether
Lead Tetraacetate Oxidation of Longifolene
12. PEROXIDES FROM TURPENTINE
Peroxide Number and Degree of Unsaturation are Tests of Product Quality
Catalytic Hydrogenation of Pinene to Pinane is First Step in Hydroperoxide Production
Small and Large Scale Techniques of Pinane Oxidation are Investigated
Cold-Rubber Polymerization
Decomposition of Pinane Hydroperoxide
Over-all Yield of 85% is Realized in Production of High Purity Hydroperoxide
Peroxidation
Stripping of Oxidates
Polymerization
Heavy Metal Salts Accelerate Decomposition of Pinane Hydroperoxide
Decomposition
Summary
13. PINONIC ACID
Ozonolysis of β -Pinene in Acetic Acid Solution Proved Best Method
Yields were Determined by Partition Chromatography
Ozone Source
Reagents
Ozonization
Calculations and Analyses
Direct Ozonolysis was not Successful
Ozonization in Methanol
Ozonization and Decomposition in Aqueous Acetic Acid at Room Temperature
Ozonization in Aqueous Acetic Acid at 0°C. Decomposition in the Presence of Oxidants
Ozonization in Nitromethane
14. SYLVESTRENE AND SOME OF ITS DERIVATIVES
Sylvestrene
Sylvestrene Nitrosochloride
Sylvestrene Oxide
m-Terpeneols
Sylvedihydrocarvone
15. 8-ACETOXYCARVOTANACETONE
16. RECOVERY OF 3-CARENE FROM CHINESE

TURPENTINE AND SYNTHESIS OF ACETYLCARENES

Introduction

Distillation of Wood and Sulfate Turpentine

Material and Methods

Distillation Results

Synthesis of Acetyl-Carene

Materials and Methods

Results and Discussion

Synthesis Products

17. HOMOPOLYMERS AND COPOLYMERS OF ACRYLATES

Introduction

Results and Discussion

Monomers

Homopolymerization

Copolymerization

Terpolymerization

Epoxidation

Curing

Hydrolysis of Polymethacrylate of I

Experimental

Reduction of α -Campholene Aldehyde

Typical Preparation of a Monomer: Methacrylate of II

Typical Homopolymerization Recipe: Homopolymer Methacrylate of II

Typical Copolymerization Recipe: Copolymer of the Methacrylate of II and Acrylate of I

Solution Copolymer of the Methacrylate of II and Fumaronitrile

Typical Terpolymerization Recipe: Terpolymer of the Acrylate of I, Acrylonitrile and Butadiene

Typical Epoxidation Procedure

18. POLYMERS AND COPOLYMERS OF VINYL PINOLATE

Preparation of Vinyl Pinolate

Polymerization

Reaction of Vinyl Pinolate Copolymers with Isocyanates

Experimental

Preparation of Vinyl Pinolate

Polymerization of Vinyl Pinolate in Solution

Polymerization of Vinyl Pinolate in Suspension

Polymerization of Vinyl Pinolate in Emulsion

Copolymerization of Vinyl Pinolate and Vinyl Acetate in Solution

Copolymerization of Vinyl Pinolate and Vinyl Chloride in Solution

Copolymerization of Vinyl Pinolate and Vinyl Chloride in Emulsion

Reaction of Polymers with Isocyanates

Evaluation of Vinyl Pinolate and Vinyl Chloride Copolymers

19. HOMOPOLYMERIZATION OF HYDRONOPYL VINYL ETHER

Discussion

Experimental

Materials

Preparation of 2-Hydronopoxyethyl Vinyl Ether

Polymerization of HVE and HEVE

X-Ray Analysis of Poly (HVE)

Evaluation of Poly (HEVE)

20. TERPOLYMERS OF ETHYLENE AND PROPYLENE
WITH d-LIMONENE AND α -PINENE

Introduction

Results and Discussion

Experimental

Materials

Preparation of EPT Rubber

Analysis of Unsaturation

Determination of Gel Content

Determination of Methyl Group Content in Polymer

21. LOW MOLECULAR WEIGHT POLYMERS OF
d-LIMONENE

Experimental

Materials

General Procedure

Results

Infrared Spectra

Nuclear Magnetic Resonance Spectra

Optical Activity

Perbenzoic Acid Oxidation

Discussion

22. BASE-CATALYSED ISOMERISATIONS OF
TERPENES

Hydrocarbons

Alcohols

Aldehydes

Ketones

Acids

Esters

Epoxides

Conclusion

23. COPOLYMERS OF VINYL CHLORIDE OF PINENE

Experimental

Homopolymerization

Copolymerization

Test of Heterogeneity of a Copolymer

Evaluation of New Polymers

24. POLYALLOÖCIMENE

Experimental

Monomer

Polymerizations

Polymer

Ozonolysis

Discussion of Results

25. ESSENTIAL OIL IN CHLOROPHYLL-CAROTENE
PASTE FROM PINE NEEDLES AND TWIGS

Abstract

26. ESSENTIAL OIL OF THE CONE OF PINUS
SYLVESTRIS VAR. MONGOLICA

27. COMPONENTS OF PINE ROOTS

Conclusions

Composition of the Remaining Neutral Fraction

Composition of the Carbonyl Fraction

Composition of the Hydroxyl Fraction

Results and Discussion

Composition of Turpentine

Composition of the Resin Acid Fraction

28. WOOD TURPENTINE OIL FROM PINE STUMPS

29. BLENDING OF TURPENTINE PRODUCTS

Lilac

Pine Bouquet

Cuir De Russe (for leather)

Violet

Lavender Bouquet

Oriental

Gardenia

Fougere

Eau De Cologne

Amber

Chypre

Ylang Syn

Sweet Pea

30. BIOLOGICALLY ACTIVE COMPOUND FROM
TURPENTINE

Terpenoids as Antimicrobials

Terpenoids as Anthelmintics

Terpenoids as Insecticides

Terpenoids as Plant Growth Hormones

Terpenoids as Anticancer Agents

Terpenoids as Pharmacological Agents

Terpenoid Derivatives as Biodynamic Agents

Terpenoids as Intermediates for Synthesis of Bio-dynamic Agents

31. INSECTICIDES BASED ON TURPENTINE

Toxaphene (C₁₀H₁₀Cl₈)

Strobane (C₁₀H₁₁Cl₇)

32. TALL OIL

History of Tall Oil

Production Processes for Tall Oil

Recovery of Tall Oil

Acid Refining of Tall Oil

Fractionation of Tall Oil

Composition and Properties of Tall Oil

Crude Tall Oil

Distilled Tall Oil

Acid Refined Tall Oil

Fractionated Tall Oil

Analysis and Testing of Tall Oil Products

Shipping, Storage and Handling of Tall Oil Products

Crude Tall Oil

Acid Refined Tall Oil

Tall Oil Fatty Acids and Distilled Tall Oils

Tall Oil Heads

Tall Oil Pitch

Tall Oil Rosin

Safety Notes

Applications of Tall Oil

The Chemistry of Tall Oil Fatty and Rosin Acids

Chemical Composition of Tall Oil Fatty Acids

General Reactions of Tall Oil Fatty Acids

Chemical Composition of Tall Oil Rosin

General Reactions of Tall Oil Rosin

Tall Oil Products in Surface Coatings

Tall Oil in Alkyd Resins

Tall Oil Formulations in Alkyd Resins

Esters of Tall Oil Products

Tall Oil Formulations in Esters

Other Uses for Tall Oil Products

Tall Oil in the Plasticizer Field

Esterification of Tall Oil for Plasticizers

Tall Oil in Adhesives and Linoleum Cement

Tall Oil in Rubber-based Adhesives

Tall Oil in Hot-Melt Adhesives

Tall Oil Products in Linoleum Cements

Formulation with Tall Oil

Formulation with Tall Oil Esters

33. DIMER ACIDS

The General Characteristics of Dimer Acids

Introduction

Dimer Acids Manufacture and Feedstock

By Products of the Dimerization Reaction

Monomer Acids

Trimer Acids

Structure and Properties of Dimer Acids

Structure of Dimer Acids

Analysis of Dimer Acids

Physical Properties of Dimer Acids

Chemical Reactions of Dimer Acids

Reactions of the Double Bonds and at the α -Carbon Atoms

Reactions of the Carboxyl Groups to Produce Monomeric Derivatives

Reactions of the Carboxyl Groups to Produce Polymeric Derivatives

Commercial Applications of Dimer Acids and Their Derivatives

Introduction

Applications of Dimer Acids

Applications of Monomer Acids and Derivatives

Applications of Trimer Acids and Derivatives

Applications of Low-Molecular Weight Derivatives of Dimer Acids

Applications of High-Molecular-Weight Dimer Acids Derivatives

Applications of Other Polymeric Nitrogen Derivatives of Dimer Acids

About NIIR

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of

Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry.

NPCS also publishes various technology books, directory, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureau, consultants and consultancy firms as one of the input in their research.

NIIR PROJECT CONSULTANCY SERVICES , 106-E, Kamla Nagar, New Delhi-110007, India. **Email:** npcs.india@gmail.com **Website:** NIIR.org
