

# Handbook on Pulp and Paper Processing

**Author:-** NPCS Board of Consultants & Engineers

**Format:** hardcover

**Code:** NI212

**Pages:** 704

**Price:** Rs.1875US\$ 150

**Publisher:** NIIR PROJECT CONSULTANCY SERVICES

Usually ships within 5 days

The pulp and paper industry comprises companies that use wood as raw material and produce pulp, paper, board and other cellulose based products. The pulp and paper sector presents one of the energy intensive and highly polluting sectors within the Indian economy and is therefore of particular interest in the context of both local and global environmental discussions. Increases in productivity through the adoption of more efficient and cleaner technologies in the manufacturing sector will be most effective in merging economic, environmental, and social development objectives. Papers are mostly used product starting from writing to packaging. It plays an important role in commercial field as well as in academic field also. Without paper nothing is expressible and reliable, so paper is part and parcel of our life. Adequate amount of raw materials for processing paper and pulp is available. Bamboo is the main raw material for Indian paper industry. New bamboo areas even at high cost are being trapped. Some of the examples of high yield pulping process are mechanical process, semi chemical process, alkaline chemical process, sulfite process, etc. Physical strength properties of paper depend on the quality of raw material, its pulping, bleaching and subsequent paper making processes. Technology has made it easy to process these raw materials in an economic and lucrative way to meet the global demand. Raw materials like, straw, bagasse, wood, bamboo is almost available in most of the places. So it is great opportunity for the entrepreneurs to start up such kind of industry. Paper Industry has tremendously increased in India in the last 20 to 30 yrs. The Paper industry is a priority sector for foreign collaboration and foreign equity participation up to 100% receives automatic approval by Reserve Bank of India. Several fiscal incentives have also been provided to the paper industry, particularly to those mills which are based on non conventional raw material.

Some of the fundamentals of the book are bleaching of bamboo cold, high yield semi chemical pulping of mixture of bamboo and mixed hardwoods, sulphate semi chemical process, kraft green liquor semi chemical process, neutral sulphite semi chemical process, thermo mechanical pulps for newsprint, zeta potential concept in paper sizing, sodium carbonate in alkali extraction during bleaching bamboo, maintenance engineering in pulp and paper industry, design and application of refiners in stock preparation, paper machine effluent etc.

This book explains about the various raw material, their processing and utilizations and also the possible waste treatment of such paper and pulp making industry. To draw attention for manufacturing quality product with all possible latest technologies is the main purpose of this book. The book is very resourceful for new entrepreneurs, technocrats, existing units and research scholars.

## 1. BLEACHING OF BAMBOO COLD

### SODA PULPS

#### Results and Discussions

#### Constant Conditions

#### Pretreatment with Acid

#### Pretreatment with Alkali

#### Bleaching Conditions in Different Stages

#### Effect of Peroxide in Alkali Pretreatment

#### Pretreatment with Dye

#### Bleaching Conditions in Different Stages

#### Conclusions

#### Experimental

#### Raw Materials

#### Bleaching

## 2. HIGH YIELD SEMI-CHEMICAL PULPING OF

### MIXTURE OF BAMBOO AND

### MIXED HARDWOODS

#### Raw Material

#### Experimental and Results

#### Sulphate Semi-Chemical Process

#### Kraft Green Liquor-Semi-Chemical Process

#### Neutral Sulphite Semi-Chemical Process

#### Discussion

#### Sulphate Semi-Chemical Process

#### Green Liquor Semi-Chemical Process

#### Neutral Sulphite Semi-Chemical Process

#### Conclusion

## 3. DEVELOPMENT IN HIGH YIELD PULPING PROCESS

#### Mechanical Process

#### Semichemical Process

#### Chemical Process

#### Alkaline Chemical Process

#### Sulfite process

#### Organic Catalyst to High Yield Pulping

#### AQ Pulping Technology

#### Polysulfide-AQ Process

#### Alkaline Sulfite-AQ Pulping

#### Experimental

## 4. THERMO-MECHANICAL PULPS FOR NEWSPRINT

### MANUFACTURE FROM TROPICAL PINES

#### Raw Materials

#### Experimental

#### Preparation of Thermo-Mechanical Pulps

#### Results and Discussions

## 5. A STUDY ON REPLACEMENT OF SODIUM

### SULPHATE BY AQ-LARGE SCALE TRIAL

#### Anthraquinone an Aid to Pulping

#### Laboratory Scale Investigations at Central Research Laboratory, Dalmianagar

#### Plant Trial with AQ

#### Evaluation of Mill Pulp

#### Discussion and Results

#### Conclusions

## 6. ZETA POTENTIAL CONCEPT IN PAPER SIZING

Electro Kinetic (Zeta) Potential-A Concept  
The Theory of Electrical Double Layer  
Stern's Modified Double Layer  
The Meaning and Limitations in the Application of  
Electro Kinetic Theory  
to the Paper Sizing  
Behaviour of Alum in Water  
Electro Kinetic Properties of Alum-rosin  
Size Precipitate and the Sized Fibre  
Conclusion  
Nomenclature  
Greeks

## 7. ECONOMICS OF BAMBOO AND HARDWOOD PULPING BY ANTHRAQUINONE CATALYSED-KRAFT-PROCESS

Experimental Design & Observations  
Results & Discussions  
Conclusion

## 8. EFFECT OF BLEACHED PULP VISCOSITY ON STRENGTH PROPERTIES OF BAMBOO SULFATE PULP

Experimental  
Pulping  
Bleaching  
Physical Strength Properties  
Chemical Analysis  
Observations and Discussions  
Conclusion

## 9. ALKALI/OXYGEN DELIGNIFICATION AND BLEACHING OF SODA BAMBOO PULP

Experimental  
Discussions  
Conclusions

## 10. ALKALI/OXYGEN DELIGNIFICATION AND BLEACHING OF SODA BAMBOO PULP, BAMBOO + MIXED HARD WOOD PULP (70 : 30) AND MIXED HARDWOOD PULP

Experimental and Results  
Discussions  
Conclusion

## 11. SODIUM CARBONATE IN ALKALI EXTRACTION DURING BLEACHING BAMBOO (D. STRICTUS) PULP

Experimental  
Study on Sequentially Chlorinated (H/C) Pulp  
Study on Chlorinated Pulp  
Results and Discussion  
Conclusions

## 12. EFFECT OF HEMICELLULOSES ON UNBLEACHED SOFTWOOD KRAFT PULP

Materials and Methods  
Enzyme Treatments  
Bleaching Experiments  
Chemical Composition and Kappa Number Analyses  
Microscopic Analysis  
Numerical Measurement of Colour  
Results and Discussion

Chemical Changes After Enzyme Treatment

Bleaching Experiments

Graff's Stain

Numerical Measurement of Colour

Accessibility Changes and Simons's Stain

Deuterium Oxide Exchange

Simons's Stain

Conclusions

### 13. THERMODYNAMIC FUNCTIONS OF THE REACTION BETWEEN LIGNIN AND HYDROGEN PEROXIDE DURING BLEACHING

Experimental

Isolation of Thioglignin

Preparation of Hydrogen Peroxide Solution

Reaction of Thioglignin with Hydrogen Peroxide

Results and Discussion

Analysis of Kinetic Data

Order of the Reaction and Variation of Rate

Constant with Reaction Parameters

Validity of Arrhenius Equation (Reaction Rates and Temperature Changes)

Estimation of various Thermodynamic Functions

Conclusions

### 14. SEQUENTIAL BLEACHING

Experimental Procedure

Discussions of the Results

Bleach Consumption

Physical and Chemical Properties

Pollution Load of the Filtrate

Conclusion

### 15. MANUFACTURE OF CORRUGATING MEDIUM PAPER UTILIZING 100% BAGASSE FURNISH

Process Suggested for Making

Corrugating Medium from 100% Bagasse

Fibre Preparation

Depithing at Paper Mills

Digestion Cycle

Stock Preparation

### 16. EFFECTIVE UTILIZATION OF CHEMICALS IN PULP AND PAPER MILLS

Digester House

Chemical Recovery Section

Bleach Plant

Chemical and Stock Preparation

Effluents

### 17. EFFECTIVE USE AND RECOVERY OF CHEMICALS IN COLD SODA PULPING

Experimental

Chemical Treatment of E. Tereticornis

Eta Reed Sulphate Pulping

Evaporation and Burning Properties of Kraft and

Cold Soda Spent liquors

Results and Discussions

Chemical Consumption

Pulp Properties

Composition of Liquors

Pollution Loads

Properties of Spent Liquors

Material Balances

Conclusions

## 18. EFFECTIVE USE AND RECOVERY OF CHEMICALS IN COLD SODA PULPING WITH PARTIALLY CLOSED SYSTEM

Chemical Treatment of E. Tereticornis

Results and Discussions

Conclusions

## 19. MAINTENANCE ENGINEERING IN PULP AND PAPER INDUSTRY

Inspection

Lubrication

Servicing

Maintenance Problems

## 20. LIMITATION TO SATISFACTORY OPERATION OF WET END OF PAPER MACHINE

Basis Weight Profile

Head Box Pulsation

Drainage Formation and Sheet Structure

The Head Box

Rectifier Roll Head Boxes

Micro Turbulence Head Boxes

Web Formers

Twin Wire Forming

Schmidt Classification

Norman Classification

High Consistency Forming

Ancillary Equipments

Wet Web Strength

Limitations of Water Removal on Pressing

Conclusion

## 21. DESIGN AND APPLICATION OF REFINERS IN STOCK PREPARATION

Conical Refiners

Shallow Angle Refiner

Steep Angle Refiners

Double Disc Refiners

Safety Devices

Influence of Machine Variables on Refining

Batch Refining

Machine Refiners

## 22. WET FELT DESIGNING TECHNIQUES

Pressing

Case Study

Recommendations

## 23. MODERNIZATION AND OPTIMUM UTILIZATION OF EVAPORATORS FOR HARDWOOD BLACK LIQUORS-MILL EXPERIENCE

Hardwood Black Liquors

Recovery Boilers and Required Liquor  
Solids  
Original Evaporator Units  
Installation of a Pump in Between First  
Pass and Second Pass of Concentration Effects of  
Both Units  
Conversion of Concentration Effect of  
First (OLD) Unit to a Finisher  
Introduction of a New Finisher Effect  
Utilization of Vent Vapour from Finisher  
Changing the Liquor Entry from Tangential to Radial and  
Modification of Flash Chamber  
Utilization of Vapour from Improvised Finisher of  
Old Street  
Conclusions

#### 24. PAPER MACHINE EFFLUENT

Experimental  
Discussions  
Mode of Treatment for Paper Machine Effluent  
Results  
Conclusion

#### 25. CONICAL REFINERS AND WIDE-ANGLE REFINERS IN CONTINUOUS AND BATCH REFINING SYSTEMS FOR BAMBOO AND HARDWOOD FURNISH

Introduction  
Types of Refining Systems in the Mill  
Conical and Wide Angle Refiners Strength, Development and Power Consumption

#### 26. USE OF "NO PICK"™ ROLL IN PAPER MACHINE PRESS SECTION BASED ON SHORT-FIBRED TROPICAL HARDWOODS AND AGRICULTURAL RESIDUES

Theoretical Considerations  
The Problem  
Press Section Before Modification  
Press Section After Modification  
Discussion  
Conclusions

#### 27. CONSUMPTION OF FURNACE OIL IN RECOVERY BOILERS

Storage  
Viscosity  
Velocity  
Turbidity & Causticity  
Silica  
Inverse Solubility

Organic Content and Calorific Value

#### 28. NECESSITY TO RENOVATE AND MODERNIZE PAPER MACHINE

Fourdrinier Part  
Press Part  
Dryer Section  
Calender Stacks  
Pope Reel  
Conclusion

## 29. WET END OPERATION OF A PAPER MACHINE

Approach Flow

Head Box

The Slice

Approach System, Head Box and Slice at W.C.P.M.

Sheet Formation and Drainage on the Fourdrinier

Shake

Suction Boxes

Dandy Roll

The Couch

Conclusion

## 30. CLEANING SYSTEM-SHOWER FOR PAPER MACHINE

Mechanical Cleaning

Classification of Water Shower

Wire Cleaning Shower

Knock off Shower

Trim Knock-off Shower

Couch Roll Cleaning Shower

Return Roll Cleaning Shower

Dandy Cleaning Shower

Felt Shower

Special Features of Water Showers

Material of Construction

Insert Type Nozzle

Protective Shell

Programming

Filters

## 31. SUITABILITY OF KENAF CTMP FOR LINERBOARD

Experimental

Raw Material

Particle Size

Reduction and Washing

Injection Process

Fiberizing and Refining

Kraft Pulping

Pulp Testing and Handsheet Formation and Testing

Results and Discussion

Andritz Sprout-Bauer Pulping Trials

FPL Pulping Trials

Kenaf and Loblolly Pine Pulp Blends

Conclusions

## 32. NEWSPRINT FROM BLENDS OF KENAF CTMP AND DEINKED RECYCLED NEWSPRINT

Experimental

Results and Discussion

Conclusion

## 33. FEASIBILITY OF USING KENAF CHEMITHERMOMECHANICAL PULP IN PRINTING AND WRITING PAPER

Results and Discussion

Andritz Sprout-Bauer and FPL Pulping Trials

Postbrightened Kenaf Thermomechanical Pulp

Conclusions

Experimental  
Raw Material, Particle Size Reduction, and Material Wash  
Injection Process  
Fiberizing and Refining Process  
Testing of Pulp and Forming and Testing of Handsheets  
Postbrightening of Kenaf TMP  
Brightness Reversion  
34. MESTA/KENAF AS RAW MATERIAL FOR KRAFT PULPING

Raw Material  
Experimental  
Chemical Constituents of Mesta  
Pulping and Sheet Making  
Discussion  
Physical Characteristics  
Chemical Constituents  
Pulping Bleaching and Black Liquor Characteristics  
Morphological Studies  
Properties of Pulp Sheets  
Fibre Classification Results  
Conclusions

#### 35. RESPONSE OF KENAF VARIETY, HC-583 TO DIFFERENT LEVELS OF NITROGEN

Materials and Methods  
Results and Discussion  
Plant Height  
Basal Diameter of Stalk  
Dry Yield of Stalk  
Increase in Dry Yield of Stalk per Kg. N Applied  
Conclusion

#### 36. PREHYDROLYSED KRAFT COOKING OF JUTE STICK (EFFECT OF PREHYDROLYSIS CONDITION)

Experiments  
Raw Materials  
Digestion  
Bleaching  
Chlorine Water Bleaching  
Analysis of the Pulp  
Results & Discussion  
A. Effect of Prehydrolysis Treatment on the Chemical Composition of Jute Stick  
B. Loss of  $\alpha$ -Cellulose and Lignin after Prehydrolysis and Kraft Cooking of Jute Stick  
Results of Bleached Pulps  
Conclusions

#### 37. HIGH YIELD PULP FROM JUTE STICKS

#### 38. GREASE PROOF PAPERS FROM SULPHITE JUTE STICK PULP

Raw Material

Pulping  
Conclusion

#### 39. CHEMICAL RECOVERY BOILERS FOR PULP MILLS USING AGRICULTURAL RESIDUES AS RAW MATERIALS

Present and Future Prospects of Agricultural Residue Usage in India  
Advantages of Use of Agricultural Residues  
Special Shelter Type Design for Smaller Units

#### 40. PROBLEMS IN BL EVAPORATION IN INDIAN RAW MATERIALS

Black Liquor Screening  
Black Liquor Soap Problem  
Carbonaceous Deposits  
Scale Formation and its Removal  
Results Achieved  
Technical  
Vapour Side Scale  
Method of Feeding Black Liquor  
Mixed Feed

Quintuple Effect & Forced Circulation Evaporator  
Forced Circulation Evaporator

#### 41. UTILIZATION OF UNCONVENTIONAL RAW MATERIALS

Advantages at a Glance – for New Process  
Cooking Liquor and Position of pH (Cold) during Pulping  
Pulping Conditions and Delignification  
Yield and General Properties of Pulp  
Chemical Composition of Unbleached Pulp  
Bleaching of Pulp  
Paper Making Properties  
Black Liquor and Recovery  
Environmental Protection  
Air Protection  
Water Protection  
Future Looks

Sulfite Shuttles into Space

#### 42. UTILIZATION OF AGRICULTURAL RESIDUES USING MECHANO-CHEMICAL PULPING PROCESS

Pilot Plant Trials at Cellulose and Paper Branch,  
Forest Research institute and colleges, Dehradun  
Production of Rice Straw Pulp  
Production of Wheat Straw Pulp  
Production of Bagasse Pulp  
Production of Paper  
Mechano Chemical Pulping on Industrial Scale  
Chemical Preparation  
Cooking  
Search for Alternative Raw Material  
Variables in the Process  
Modification of Bagasse Pulping by Partial Replacement of  
Sodium Hydroxide by Sodium Carbonate  
Addition of Sodium Sulphide in Cooking Liquor in  
Bagasse Pulping

Conclusion

#### 43. FEASIBILITY OF RECYCLED NEWSPAPERS HARDBOARDS

Experimental Design and Analysis  
Materials  
Processing  
Acetylation  
Adhesive Application  
Board Manufacture  
Testing  
Results and Discussion  
Static Bending Properties

Tensile Strength Properties

Water Absorption and Thickness Swell

Linear Expansion

Concluding Remarks

#### 44. RESTORING BONDING STRENGTH TO RECYCLED FIBERS

Dry-Fiberized Fiber Characteristics

Mechanical Treatment

Fractionation

Strength Additives

Chemical Treatments

Blending with Virgin Fiber

Papermaking Variables

Wet-Formed Papers

Pressing

Air-Formed Papers

Conclusions

Methods and Materials

#### 45. CHEMICAL MODIFICATION OF AGRO-FIBER FOR THERMOPLASTICIZATION

Experimental Procedures

Esterification Procedure

Thermal Analysis

Pressing of Esterified Fiber

Electron Microscopy of Pressed Fiber

Swelling of Pressed Fiber in Water

Results and Discussion

Esterification of Lignocellulosics

Thermal Analysis

Swelling of Pressed Fiber Pellets in Water

Conclusions

#### 46. POTENTIALS FOR COMPOSITES FROM JUTE AND ALLIED FIBERS

Plant Utilization for Composites

Potential Composites for Agro-Resources

Geotextiles

Filters

Sorbents

Structural Composites

Non-structural Composites

Molded Products

Packaging

Combinations with Other Resources

Chemical Modification for Property Improvement

Conclusions

#### 47. AN APPROACH TO "INPLANT COLOUR REDUCTION" OF BLEACH PLANT EFFLUENT USING CALCIUM HYPOCHLORITE

Experimental

Discussion

#### 48. DESILICATION OF SULPHATE WEAK BLACK LIQUOR BY THE ADDITION OF LIME

Experimental

Procedure of Desilication

Results & Discussion

## 49. TREATMENT OF PULP & PAPER MILL WASTES

Pulp and Paper Industry Water

Consumption

Nature and Effect of Impurities

Primary Treatment

Sedimentation Units

Sludge Handling & Disposal

Secondary Treatment

## 50. DECOLOURIZATION OF WASTE WATER

FROM BLEACHED-KRAFT PULP & PAPER

MILL USING ALUM AND CLAY

Materials and Methods

Results and Discussion

Sludge Blanket

Effluent Quality

Colour Removal

Removal of Suspended Solids

COD Reduction

Conclusion

## 51. REMOVAL OF SOLUBLE SILICA FROM

SULPHATE GREEN LIQUOR

Experimental

Carbonation

Green Liquor Analysis

Results & Discussion

## 52. TRENDS IN ASH CONTENT OF STRAW

PULPS-AN EXPLANATION

Experimental

## 53. MINI LIME TREATMENT OF DISSOLVING

PULP MILL COLOURED EFFLUENT

Sources of Colour in the Pulp Mill

Effluent

Present Work

Chlorination of Lime Treated Effluent

Calcining of Effluent Sludge

Causticization Using Lime Obtained from Effluent Sludge

Conclusion

## 54. COLOUR AND COD REDUCTION OF

BLEACH EFFLUENTS

Experimental

Results and Discussions

Colour of the Effluents

Phenolic Compounds

Rate of Colour Reduction

Chemical Oxygen Demand

Conclusions

## 55. EFFECT OF pH ON SULPHITE PULPING OF

HOLOCELLULOSE OF E. TERETICORNIS

Experimental

Preparation of Cooking Liquor

Titration of Cooking Liquor

Sulphite Pulping

Neutral Sulphite Pulping

Preparation of Cooking Liquor  
 Chemical Analysis of Sulphite and  
 Neutral Sulphite Cooked Holocellulose  
 Results and Discussion Effect of pH and  
 Cooking Time on Yield  
 Effect of pH and Cooking Time on Klason Lignin  
 Effect of pH and Cooking Time on Alpha-Cellulose  
 Effect of pH and Cooking Time on  
 Pentosans  
 Effect of pH and Cooking Time on  
 Acidic Sugar  
 Effect of pH and Cooking Time  
 On Methoxyl and Acetyl Groups  
 56. UTILIZATION OF AGRICULTURAL RESIDUES  
 FOR PULP, PAPER AND BOARD  
 Rice Straw  
 Writing and Prints Paper  
 Grease Proof Paper  
 Wrapping Paper  
 Straw Board  
 Fibre Boards  
 Wheat Straw  
 Writing & Printing Paper  
 Greaseproof Paper  
 Straw Board  
 Jute Sticks  
 Writing and Printing Paper  
 Wrapping Paper Pulp Yield and Sheet Characteristics  
 Straw Board  
 Newsprint Grade Refiner Groundwood Pulp  
 Constitution of Hemicellulose  
 Greaseproof Paper, Strength Properties of Standard Sheet  
 Building Board  
 Bagasse  
 Writing and Printing Paper  
 Wrapping Papers  
 Rayon Grade Pulps  
 Greaseproof paper  
 Straw Board  
 Fiber Board  
 Newsprint  
 Cotton Stem  
 Writing and Printing Paper  
 Miscellaneous Raw Materials  
 Arecanut Husk  
 Ground Nut Shells  
 Tea Stem  
 Caster Stems (*Ricinus Communis*, linn)  
 Sun Flower Stalk  
 Arhar Sticks (*Cajanus SP*) and Jawar Stalk (*Sorghum SP*)  
 Sugar Cane Leaves  
 Paddy Husk  
 57. PROVISION OF CAPTIVE POWER GENERATION IN

## A 30 TPD AGRO-BASED PAPER PLANT AS A MEANS OF IMPROVING CAPACITY UTILIZATION

Capacity Utilization

Power Availability

Captive Power Plant

Recommended Scheme

Features of the Scheme

Fixed Costs

Variable Costs

Average Cost of Power Generation

Economics and Discussion

Conclusion

## 58. ENERGY CONSERVATION IN PULP AND PAPER INDUSTRY—SOME THOUGHTS

Paper Industry

Deliberations

Total Energy Concept

In-Plant Power Generation

Energy Distribution and Utilization

Overdesign and Capacity Utilization of the Equipment

Energy Audit

Short Term-Long Term Action Programme

Short Term Schemes

Long Term Schemes

Generation

Short Term

Long Term

Transmission

Short Term

Long Term

Utilization

Short Term

Long Term

Waste Streams

Energy Conservation Approaches

Factor Affecting Energy Efficiency

Research and Development

National Energy Programme

Summary and Conclusions

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable

Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
