

# Modern Technology on Food Preservation (2nd Edition)

**Author:** NPCS Board

**Format:** Paperback

**ISBN:** 9788178330716

**Code:** NI88

**Pages:** 528

**Price:** Rs. 1,275.00 **US\$** 125.00

**Publisher:** Asia Pacific Business Press Inc.

Usually ships within **5** days

Food Preservation has become an integral part of the food processing industry. There are various methods of food preservation; drying, canning, freezing, food processing etc. Food processing is one the method of food preservation which is the set of methods and techniques used to transform raw ingredients into food or to transform food into other forms for consumption by humans or animals either in the home or by the food processing industry. Canning is one of the various methods of food preservation in which the food is processed and then sealed in an airtight container. This process prevents microorganisms from entering and proliferating inside. Dehydration is the process of removing water or moisture from a food product. Food dehydration is safe because water is removed from the food. Freezing is also one of the most commonly used processes commercially and domestically for preserving a very wide range of food including prepared food stuffs which would not have required freezing in their unprepared state. Benefits of food processing include toxin removal, preservation, easing marketing and distribution tasks, and increasing food consistency. In addition, it increases seasonal availability of many foods, enables transportation of delicate perishable foods across long distances and makes many kinds of foods safe to eat by deactivating spoilage and pathogenic micro organisms. Nanotechnology exhibits great potential for the food industry. New methods for processing nanostructures are being developed having novel properties that were not previously possible. As such, due to the recent up gradation of preservation techniques, the preservation industry is also growing almost at the same rate as the food industry which is about 10 to 12% per year. The purpose of this book is to present the elements of the technology of food preservation. It deals with the products prepared from various fruits and vegetables commercially. Relevant information on enzymes, colours, additives, flavours, adulteration, etc., has been given. This book also contains photographs of equipments and machineries used in food preservation. This book will be very useful for new entrepreneurs, food technologists, industrialists, libraries etc.

## Contents

1. Introduction of Food Technology  
Source of Man's Food

## Impact of Science and Technology

### 2. Acceptable Food to Eat

Nature's Seal of Quality

Food Flavors

Food Colors

Our Senses Can Fail Us

Excessive Heating Impairs Foods,

Moderate Heating May Improve Foods

Food Spoilage

Must Deter Natural Processes

Safe Food for Man

Food Poisoning

Food Intoxications

Food Infections

Sanitation and Health

### 3. The Refrigerated Storage of Perishable

Commodities

Temperature of Objects

Temperature Measurements

Metabolism a Function of Temperature

Energy Deficit of Ice

Creating Energy Deficits Mechanically

Keeping Fresh Foods Edible

Animals Foods

Plant Food

Temperature of Cold Storage Rooms

Humidity of Storage Chamber

Heat Evolved by Living Tissues

Specific Heat of Foods

Calculation of Refrigeration Load

Cold Injury of Fruits and Vegetables

Ammonia Injury to Refrigerated Fruits and Vegetables

Waxing Foods to Prevent Shrinkage

Effect of Cold Storage on Quality

Preserving Foods in a Micro-Environment

Packaging Materials Tests Which May Be Performed

Formed Container Tests

Disorders of Stored Foods

### 4. Principles of Food freezing

Development of a Frozen Food Industry

The Freezing Point of Foods

Per Cent Water Frozen vs. Temperature of Food  
and Its Quality

Size of Ice Crystals Formed

Volume Changes During Freezing

Refrigeration Requirements in Freezing Foods

Establishing the Refrigeration Requirements to

Freeze Food

Freezing in Air

Freezing by Indirect Contact with Refrigerants

Direct Immersion Freezing  
Freezerburn  
Packaging requirements for Frozen Foods  
Influence of Freezing on Micro-organisms  
Influence of Freezing on Proteins  
Influence of Freezing on Enzymes  
Influence of Freezing on Fats  
Influence of Freezing on Vitamins  
Influence of Freezing on Parasites  
Thawing Damage to Frozen Foods

#### 5. Principles of Food Preservation by drying

Drying a Natural Process  
Dehydration-Artificial Drying  
Dehydration vs. Sun Drying  
Why Dried Foods  
Dehydration Permits Food Preservation  
Humidity-Water Vapor Content of Air  
Air-The Drying Medium  
Adiabatic Driers  
Heat Transfer Through a Solid Surface  
Criteria of Success in Dehydrated Foods  
Freeze-Dehydration (Freeze Drying)  
Triple Point of Water  
Temperature Changes in Meat Freeze-Dehydration  
Influence of Dehydration on Nutritive Value of Food  
Influence of Drying on Micro-organisms  
Influence of Drying on Enzyme Activity  
Influence of Drying on Pigments in Foods  
Dehydration of Fruits  
Dehydration of Vegetables  
Dehydration of Meat  
Dehydration of Fish  
Dehydration of Milk  
Dehydration of Eggs  
Packing of Dehydrated Foods  
Influence of Drying on Food Acceptance

#### 6. Principles of Food Preservation by Canning

The Art of "Appertizing"  
Temperature vs. Pressure of Boiling Water  
Spoilage of Food Caused by Micro-organisms  
Evolution of Containers for Canning  
Important Food Groups  
Micro-organisms Associated with the Food Groups  
Sources of Spoilage Organisms  
Heat Resistance of Micro-organisms  
Important in Canning  
Factors Influencing the Heat Resistance of Spores  
Influence of Food Ingredients on Heat Resistance of Spores  
Heat Resistance of Enzymes in Food  
Heat Penetration into Food Containers and Contents

General Method for Calculating the Process Time  
for Canned Foods  
Inoculated Pack Studies  
Adequacy of Heat Processes  
Spoilage of Canned Foods  
Microbial Spoilage  
Failure of Glass Containers  
Surface Markings on Broken Glass  
Vacuum-pressure Relations in Canning Process  
Storage of Canned Foods  
External Corrosion of Cans  
Coding the Pack  
Influence of Canning on the Quality of Food  
Colour  
Flavor and Texture  
Protein  
Fat and Oil  
Carbohydrates  
Vitamins  
Misconceptions Relating to Canned Foods  
Improvements in Canning Technology

#### 7. Principles of Food Preservation by Fermentation and Pickling

Life with Micro-organisms  
Fermentation of Carbohydrates  
Industrially Important Organisms in Food  
Preservation  
Order of Fermentation  
Types of Fermentations of Sugar  
Fermentation Controls  
Sources of Salt  
Wine and Beer  
Salted-Fermented Foods  
Deterioration of Fermented and Pickled Products  
Nutritional Value of Pickled Products  
Future Trends

#### 8. Preservation of Food as Sugar Concentrates

Concentrated but moist  
High solids high acid foods  
Jelly  
Jam  
Fruit Butter  
Marmalade  
Pectin and gel formation  
Invert Sugar  
Jelly Making  
Other Fruit Preserves  
Candied and Glacé Fruits  
Maraschino Cherries  
Sweetened Condensed Milk  
Future Trends

## 9. Preservation of Foods with Chemical additives

Introduction

Definition of Chemical Additive

Importance of Chemical Additives

Legitimate Uses in Food Processing

Undesirable Uses of Additives

Safety of a Food Additive

Functional Chemical Additive Applications

Historical Significance

Specific Uses of Chemical Additives

Additives Permitted and Prohibited in the United States

Chemical and Use

Food Regulation and Compliance

Miller Pesticide Amendment of 1954

1958 Food Additives Amendment

1960 Color Additives Amendment

Chemical Preservatives

Preservatives (Antimycotics)

Specified Uses and Amounts

Preservatives (general)

Specified Use

Microbial Antagonists

Antibiotics

Quality Improving Agents

Other Chemical Additives

Artificial Flavoring

Artificial Coloring

Other Agents

Chemical Additives and the Future

## 10. Preservation of Food with Ionizing Radiations

A Place for Radiation Stabilized Foods

Discovery of Radioactivity

Alpha, Beta and Gamma Radiations

Dosimetry

Dose Distribution

Induced Radio-Activity in Treated Food

Mode of Action of Ionizing Radiations

Radiation Effects on Micro-organisms

Radiation Effects on Proteins

Radiation Effects on Enzyme Systems

Effects of Radiation on Amino Acids

Effects of Radiation on Vitamins

Radiation Effects on Carbohydrates

Radiation Effects on Lipids

Radiation Effect on Pigments

Radiation Effect on Parasites and Insects

Packaging of Radiation Stabilized Foods

General Methods for establishing Radiation

Stabilization Process for Foods

The Food Product-Micro-organism Destruction  
Dose Requirements for the Radiation Sterilization  
of Foods  
Technological aspects of the Radiation Pasteurization  
of Foods  
Radiation Resistant Organisms  
Factors Influencing the Survival of Micro-organisms  
from a Radiation Process  
The Influence of the Type of Radiation on the  
Inactivation of Micro-organisms  
The Influence of Dose Rate on the Inactivation of  
Micro-organisms  
The Influence of Environmental Conditions on the  
Survival of Micro-organisms from a  
Radiation Process  
Combination Processes  
Conditions after Irradiation Affecting Survival and  
Recovery of Micro-Organisms  
The Food Product-Enzyme Destruction  
Process for Radiation Sprout Inhibited White Potatoes  
Process for Insect De-infestation of White Flour by  
Irradiation  
The Process for Food Stabilization  
Process-Heat Inactivation of Enzymes plus  
Radiation Destruction of Micro-organisms  
Process and Product Specifications  
Process for Radiation-Pasteurized Plant Tissues  
(Fruits)  
Process for Radiation-Pasteurized Animal Flesh  
(Sliced Bacon)  
Process for Radiation-Sterilized Meat (Chicken),  
Fish and Vegetables  
Non-Heat Method for Controlling Enzymes in Meat  
Design of Radiation Processing Food Plants  
Wholesomeness of Radiation Stabilized Foods  
Some Public Health aspects of the Microbiology of  
Irradiated Foods  
Acceptability of Radiation Stabilized Foods  
Quality Control with Radiation Stabilized Foods  
Ionizing Radiations as a Unit Operation in the  
Food Industry

## 11. Preservation of Semi-moist Foods

Introduction  
Canned white bread  
Storage stability  
Sponge and Dough  
Filling and Proofing  
Processing  
Finished Product  
Fungistatic and fungicidal agents  
Sorbic acid  
Polyethylene

Semi-moist Pet Foods  
Process for Semi-moist Pet Foods  
Marbled, Textured Product  
Water Activity  
Production of Semi-moist Products Growing  
Semi-moist Human Foods  
Coarse Ground Beef and Beef Cubes  
Other Products being developed

## 12. Principles and Preservation of Bakery Products

Introduction  
Principles of Baking  
Dough  
Influence of Flour Proteins  
Flour Improvers  
Other Components of Flour  
Yeast Raised Dough Products  
Heat Generated During Mixing Doughs  
Heat of Hydration  
Cooling Requirements  
Continuous Bread Making Process  
Typical Formulations for Yeast Raised Bakery Products  
Baking Schedules  
Baking Reactions  
Chemically Leavened Bakery Products  
Leavening Acids  
Baking Powders  
Elements of Cookie Technology  
Cookie Flour  
Sugar  
Shortening  
Eggs  
Ammonia  
Water  
Baking Acids  
Soda  
Miscellaneous Ingredients  
Mixing and Baking  
Quality Cookie Chart  
Elements of Cake Technology  
General Rules for Formulating Cakes  
Cake Formulations  
Principles of Processing Cakes  
Baking  
Refrigerated Doughs  
Preservation of Bakery Products  
Fresh Bakery Products  
Freezing of Bakery Products  
Packaging  
Storage Life of Frozen Bread  
Cookies and Cakes

Nutrient Losses in Bakery Products  
Packaged Fresh Bread  
Packaged Fresh Cookies, Crackers, Bakery Goods,  
Cake Mixes  
The Future

### 13. Storage Stability of Preserved Foods

Introduction  
Relationships of Product Qualities and Storage  
conditions  
Objective Tests of Quality of Stored Foods  
Objective Odor Measurements  
Mechanical Texturemeter  
Long-term Storage of Preserved Foods  
Temperature of Storage  
Nutrients  
Containers for Long-Term Storage  
Storage Costs  
Storage Stability of Selected Frozen Foods  
Result  
The Future

### 14. Food Preservation Using Ozone

Introduction  
Physicochemical Properties of Ozone  
Use of Ozone in Storage and Packing Facilities  
Extension of Storage Life with Ozone  
Ozonation to Sanitize packing Line Process Water  
The Commercial Production of Ozone  
Importance of Ozone in Fishing Industry  
Future Perspectives

### 15. Food Preservation by Smoking Process

Introduction  
Types of Smoking  
The Difference between Curing and Smoking  
Meat Curing and Smoking  
Types of Smokers

### 16. Thermal Food Preservation

Introduction  
Effect of Preservation Temperatures  
Effect of Processing on Nutrients in Foods  
Thermal Preservation Methods

### 17. Machinery & Equipments (Photographs)

Directory Section

## About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services.

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.
