

**List of business
Ideas to Start
Your Own
Industry
with 1.50 - 2
Crore
(Plant and
Machinery Cost)**

Introduction

With job uncertainty increasing by the day, there has been a flurry of start-ups in the recent years. While no start-up is ever guaranteed to succeed, innovative ideas have come to light in the process. Today most large business was once just a small startup and with constant effort and proper business plan, they have grown to a large extent.

Micro, Small and Medium Enterprises (MSMEs) sector has emerged as a highly vibrant and dynamic sector of the Indian economy and is widely acclaimed as engine of economic growth, particularly in the context of Make in India initiative of the Government of India.

MSMEs play a noteworthy role in economic and social development, thereby providing a platform to entrepreneurship, as they have inherent characteristics of being innovative and responsive to changing market dynamics. Being complementary to large industries this sector contributes hugely to the socioeconomic development of the country. MSMEs not only play a crucial role in providing large employment opportunities at comparatively lower capital cost but also encourage entrepreneurial activities in rural and backward areas.

**Small Business
Ideas for Beginners
& Opportunity**

Starting your own business is everyone's dream.

So, here are list of best startup ideas that can be started:

Undergarments (Men and Women)

Undergarments or underwear are clothes worn under other clothes, often next to the skin. They keep outer garments from being soiled by bodily secretions and discharges, shape the body, and provide support for parts of it. In cold weather, long underwear sometimes is worn to provide additional warmth. The global men's underwear market size was valued at USD 10.14 billion in 2018 and is expected to growth CAGR of 5.3% from 2019 to 2025. Improving fashion trends, increasing disposable income, and changing consumer lifestyle and preferences are expected to boost the market growth. On the basis of demographics, behavior traits, lifestyle activities and purchase patterns, the typical consumers of the women's innerwear market can be divided into three distinct categories Urbane Enthusiasts, Exuberant Seekers and Thriving Homemakers. The Indian innerwear market is primarily dominated by women's innerwear which accounts for 64 percent of the total innerwear market and it accounts for 15 percent of the total women's apparel market. Various product categories in women's innerwear are – brassieres, camisoles, panties, tees, nighties, shorts, etc. Brassieres and panties contribute 85 percent of the total women's innerwear segment.

Bio plastic Film

A bio plastic is a substance made from organic biomass sources, unlike conventional plastics which are made from petroleum. Bio plastics are made through a number of different processes. Some use a microorganism to process base materials, such as vegetable oils, cellulose, starches, acids and alcohols.

The global bio plastic packaging market is expected to grow from USD 5.94 Billion in 2018 to USD 24.84 billion by 2026 at a CAGR of 18.69% during the forecast period from 2019-2026.

Cashew Nut Processing Unit

The raw cashew nuts are procured from the local farmers and local market. These cashew nuts are dried in the sun for a period of two days and are then stored in the gunny bags for processing through the year. The processing of cashewnut is a four stage process, each designed to produce quality edible cashew kernel.

The cashew market was valued at USD 9.9 million in 2018, and is projected to reach a value of USD 12.7 million dollars by 2024, witnessing a CAGR of 4.6%. Among all the cashew producing nations, African countries contributed 56.5% of the global production, while Asian countries contributed 44%, in 2018.

Industrial Gases and Specialty Gases Mixture

Industrial gases are the gaseous materials that are manufactured for use in industry. The principal gases provided are nitrogen, oxygen, carbon dioxide, argon, hydrogen, helium and acetylene, although many other gases and mixtures are also available in gas cylinders. The industry producing these gases is also known as industrial gas, which is seen as also encompassing the supply of equipment and technology to produce and use the gases.

The global industrial gases market was worth US\$ 75 Billion in 2018. Industrial gases refer to the gases produced in large quantities for usage in industrial processes. Depending on their uses in different sectors, these gases are also known as fuel, medical, refrigerant or specialty gases. Some of the industrial gases, such as oxygen and helium, provide a base for life support for artificially ventilated patients and for all the modern anesthetic techniques to advance medical care.

Biodegradable Plastic Products

(Bags, Plates & Glasses)

Biodegradable plastic is plastic that decomposes naturally in the environment. This is achieved when microorganisms in the environment metabolize and break down the structure of biodegradable plastic. The end result is one which is less harmful to the environment than traditional plastics.

The global biodegradable plastic market accounted for US\$ 2,989.8 MN in 2018 and is expected to grow at a CAGR of 14.5% during the forecast period 2019-2027, to account to US\$ 10,086.2 MN by 2027.

Thinners and Solvent Thinners

(Blending and Bottling)

A thinner is a volatile solvent that is used to dilute or extend oil-based paints or cleanup after use. Common solvents used as paint thinner chemicals include mineral spirits, mineral and true turpentine, acetone, naphtha, toluene, methyl ethyl ketone (MEK), dimethylformamide (DMF), glycol ethers and xylene. The solvents & thinners market is grow from 4.6 billion in 2019 to USD 5.2 billion by 2024, at a CAGR of 2.7% from 2019 to 2024. Surging demand for paints & coatings from decorative, automotive, industrial, and protective paints & coatings industries is fueling the growth of the market across the globe. Increasing demand for residential and commercial buildings from emerging economies acts as an opportunity for the growth of the aliphatic hydrocarbon solvents & thinners market, worldwide.

Solar Panel

Solar panels are devices that convert light into electricity. They are called solar panels because most of the time, the most powerful source of light available is the Sun, called Sol by astronomers.

The market is driven by a rise in global energy demand. Also, the increasing investments in renewable energy sources are anticipated to boost the growth of the solar energy storage market.

Aluminium Cans Manufacturing

Aluminium cans are every day commodities that people come across on a regular basis, whether it's while they are grocery shopping, taking their lunch break, or pondering in front of a vending machine. The aluminium beverage can is now the popular choice for carbonated and still soft drinks, mineral waters, beers and lagers.

The Aluminum cans market, in terms of value, is estimated to grow significantly in 2017 and expected to grow rapidly during the forecasted period at a CAGR of around 2.9%. Increase in intake of processed food & beverages, increase in shelf life of products and growth in disposable income of consumers stimulate the growth of aluminum cans market globally.

Virgin Coconut Oil

Virgin coconut oil, or VCO, is made by cold-pressing the liquid from the coconut meat, then separating the oil from the milk and water. Refined, bleached and deodorized, or RBD, oil is made from the coconut copra or dried kernel and may be chemically treated.

The global Virgin Coconut Oil Market is reach approximately USD 5 billion by 2024, registering a significant CAGR of 9.5% during the forecast period, 2019–2024. The unrefined coconut oil derived from dried coconut through expeller-pressing is mainly referred to as virgin coconut oil. The major determinant driving the growth of global virgin coconut oil market is the surging demand for virgin coconut oil for culinary purposes at home or in the Horace industry.

Readymade Garments

India readymade garments market is anticipated to register a steady growth during the forecast period owing to growing e-commerce platform along with organized retail channels. Moreover, the opening of exclusive showrooms, selling garments through online retail space and tie-ups with online vendors to facilitate easy sale and supply of readymade garments to end customers is further bolstering the growth of readymade garments market in the country. Furthermore, increasing urbanization and development in the country, changing consumer lifestyle are some other factors driving readymade garments market in India. India's Garment Industry has been rapidly & steadily growing in last ten years. Exports have been rising as there is an increase in orders from international buyers accompanied by a rise of investments in the garment sector of the country. The Indian Garment Industry is of major importance to the Indian economy as it contributes substantially to India's export earning, it is estimated and analyzed that one out of every six households in the country depends on this sector either indirectly or directly for its livelihood. From all over the world the Retailers also increasingly come to India attracted by low production costs.

India's Garment Industry was a un-organized sector a few decades ago, but now this is considered to be the well-organized sector and among the best in the world. Indian Garment Industry has carved out a niche in the international markets and earned a reputation for its durability, quality and appearance. Today's changing consumer preferences - buying branded apparel and fashion accessories, major boom in the garment retail industry, people shopping at department and discount stores, shopping malls, with rising disposable incomes, government policy focused on fast-track textile export growth, and ambitious goals have created several investment opportunities in India.

Major Queries/Questions Answered in Our Report?

- 1. How has the industry performed so far and how will it perform in the coming years?**
- 2. What is the Project Feasibility of the Plant?**
- 3. What are the requirements of Working Capital for setting up the plant?**
- 4. What is the structure of the industry and who are the key/major players?**

- 5. What is the total project cost for setting up the plant?**
- 6. What are the operating costs for setting up the plant?**
- 7. What are the machinery and equipment requirements for setting up the plant?**
- 8. Who are the Suppliers and Manufacturers of Plant & Machinery for setting up the plant?**
- 9. What are the requirements of raw material for setting up the plant?**

- 10. Who are the Suppliers and Manufacturers of Raw materials for setting up the plant?**
- 11. What is the Manufacturing Process of the plant?**
- 12. What is the total size of land required for setting up the plant?**
- 13. What will be the income and expenditures for the plant?**
- 14. What are the Projected Balance Sheets of the plant?**

- 15. What are the requirement of utilities and overheads for setting up the plant?**
- 16. What is the Built up Area Requirement and cost for setting up the plant?**
- 17. What are the Personnel (Manpower) Requirements for setting up the plant?**
- 18. What are Statistics of Import & Export for the Industry?**
- 19. What is the time required to break-even?**

- 20. What is the Break-Even Analysis of the plant?**
- 21. What are the Project financials of the plant?**
- 22. What are the Profitability Ratios of the plant?**
- 23. What is the Sensitivity Analysis-Price/Volume of the plant?**
- 24. What are the Projected Pay-Back Period and IRR of the plant?**
- 25. What is the Process Flow Sheet Diagram of the plant?**
- 26. What are the Market Opportunities for setting up the plant?**
- 27. What is the Market Study and Assessment for setting up the plant?**
- 28. What is the Plant Layout for setting up the plant?**

Reasons for Buying Our Report:

- **The report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **The report provides vital information on the product like it's characteristics and segmentation**
- **The report helps you market and place the product correctly by identifying the target customer group of the product**

- **The report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Free Instant Online Project Identification and Selection Service

Our Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.....[Read more](#)

▪ Detailed Project Reports

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,

Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects.....[Read more](#)

NIIR PROJECT CONSULTANCY SERVICES

An ISO 9001:2015 Company

Who are We?

- *One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services*
- *We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients' in India & abroad*

What do We Offer?

- *Project Identification*
- *Detailed Project Reports/Pre-feasibility Reports*
- *Business Plan*
- *Market Research Reports*
- *Technology Books and Directory*
- *Industry Trend*
- *Databases on CD-ROM*
- *Laboratory Testing Services*
- *Turnkey Project Consultancy/Solutions*
- *Entrepreneur India (An Industrial Monthly Journal)*

How are We Different ?

- *We have two decades long experience in project consultancy and market research field*
- *We empower our customers with the prerequisite know-how to take sound business decisions*
- *We help catalyze business growth by providing distinctive and profound market analysis*
- *We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors*
- *We use authentic & reliable sources to ensure business precision*

Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation
