***Coverall (Boiler Suit).***  
**Business Idea in**  
**Work wear Industry.**

# Introduction

Boiler suits coveralls and overalls are designed to be worn over and protect ordinary clothing. Depending on the degree of protection required boiler suits can be made from a variety of materials. This can include materials such as cotton, denim, nylon and even paper.

Coveralls are used for a range of industrial purposes, ranging with treatments for anti-static, flame spread resistant properties, different color options, and accessories. Historically, outside of the flight industry, coveralls were often used by men maintaining coal-powered boilers. These garment are usually used as protective clothing when working.

Boiler suit is a one-piece garment with full-length sleeves and legs like a jumpsuit, but usually less tight-fitting. Its main feature is that it has no gap between jacket and trousers or between lapels, and no loose jacket tails. It often has a long thin pocket down the outside of the right thigh to hold long tools. It usually has a front fastening extending the whole length of the front of the body up to the throat, with no lapels.

It may be fastened with buttons, a zip, Velcro, or snap fasteners. Boiler suits with an attached hood are available. The word boiler suit may also refer to disposable garments. Boiler suits are so called because they were first worn by men maintaining coal-fired boilers. To check for steam leaks or to clean accumulated soot from inside the firebox of a steam locomotive, someone had to climb inside, through the fire hole (where the coal is shoveled in). A one-piece suit avoids the potential problem of loosened soot entering the lower half of one's clothing through the gap in the middle.

As the fire hole opening is only just large enough for a fit individual to negotiate, a one-piece suit also avoids the problem of the waistband snagging on the fire hole as one bends to wriggle through, or of jacket tails snagging if one has to come out backwards.

Boiler Suits are special type of suits which has largely Industrial value in the world. Most of the Industries in the world run by using small medium or heavy boilers otherwise it may have furnaces over or direr. There is good habit to use apron for operating the above said mechanical machine. All the above said machines produce radiation heat as well as produce solid dust carbon particles and produce also toxic gases.

# Market Outlook

The demand for protective clothing is expected to witness significant growth owing to rising worker safety concerns in manufacturing, chemical, oil and gas, and construction sectors. Rising awareness to control industrial accidents and fatalities at workplace is expected to further propel the demand. Innovations by the industry players to improve chemical, cold, mechanical and ballistic, and fire resistance of these products is expected to have a positive impact on the market growth.

Rising health concerns owing to exposure to harmful emissions and smoke coupled with increasing mishaps particularly in oil and gas and mining industry are likely to support the product demand. Increasing number blue-collar workforce in construction and manufacturing industries is further projected to propel the demand for protective clothes.

The rising concerns regarding the safety of workers coupled with the increasing stringency of government regulations are by far the leading factor driving the global protective clothing market. The booming demand for multifunctional protective clothing from end-user industries is also propelling the market. Furthermore the rapid industrialization along with improving economic conditions in emerging countries is providing a significant boost to the growth of the market.

All fabrics are protective to some extent but protective clothing are not only concerned to protect just from daily needs but also from situations where hazards or risks are present and that have the potential to be life threatening or pose considerable potential for injury or damage to the person working in and around the hazard.

Protective clothes are designed to prevent the person and product from coming in contact with adverse elements of the environment, thus providing protection, and reducing the risk of exposure. Based on the industry, protective clothing can be of fire & heat resistant, chemical resistant, cold resistant, ballistic & mechanical resistant, and UV resistant. The global Coveralls market was million US\$ in 2018 and is expected to million US\$ by the end of 2025, growing at a CAGR of between 2019 and 2025. Most industrial sectors like mining, chemical, military, hospitals, and energy services involve hazardous work environments that can cause fatalities in the workplace. To prevent workplace injuries and fatalities, workers exposed to such hazardous conditions require protective clothing like coveralls.

# Major Queries/Questions Answered in the Report?

- 1. What is Coverall (Boiler Suit) Manufacturing industry ?**
- 2. How has the Coverall (Boiler Suit) Manufacturing industry performed so far and how will it perform in the coming years ?**
- 3. What is the Project Feasibility of Coverall (Boiler Suit) Manufacturing Plant ?**
- 4. What are the requirements of Working Capital for setting up Coverall (Boiler Suit) Manufacturing plant ?**

**5. What is the structure of the Coverall (Boiler Suit) Manufacturing Business and who are the key/major players ?**

**6. What is the total project cost for setting up Coverall (Boiler Suit) Manufacturing Business?**

**7. What are the operating costs for setting up Coverall (Boiler Suit) Manufacturing plant ?**

**8. What are the machinery and equipment requirements for setting up Coverall (Boiler Suit) Manufacturing plant ?**

**9. Who are the Suppliers and Manufacturers of Plant & Machinery for setting up Coverall (Boiler Suit) Manufacturing plant ?**

**10. What are the requirements of raw material for setting up Coverall (Boiler Suit) Manufacturing plant ?**

**11. Who are the Suppliers and Manufacturers of Raw materials for setting up Coverall (Boiler Suit) Manufacturing Business?**

**12. What is the Manufacturing Process of Coverall (Boiler Suit) ?**

- 13. What is the total size of land required for setting up Coverall (Boiler Suit) Manufacturing plant ?**
- 14. What will be the income and expenditures for Coverall (Boiler Suit) Manufacturing Business?**
- 15. What are the Projected Balance Sheets of Coverall (Boiler Suit) Manufacturing plant ?**
- 16. What are the requirement of utilities and overheads for setting up Coverall (Boiler Suit) Manufacturing plant?**
- 17. What is the Built up Area Requirement and cost for setting up Coverall (Boiler Suit) Manufacturing Business?**

**18. What are the Personnel (Manpower) Requirements for setting up Coverall (Boiler Suit) Manufacturing Business?**

**19. What are Statistics of Import & Export for Coverall (Boiler Suit) ?**

**20. What is the time required to break-even of Coverall (Boiler Suit) Manufacturing Business?**

**21. What is the Break-Even Analysis of Coverall (Boiler Suit) Manufacturing plant?**

**22. What are the Project financials of Coverall (Boiler Suit) Manufacturing Business?**

- 23. What are the Profitability Ratios of Coverall (Boiler Suit) Manufacturing Project?**
- 24. What is the Sensitivity Analysis-Price/Volume of Coverall (Boiler Suit) Manufacturing plant?**
- 25. What are the Projected Pay-Back Period and IRR of Coverall (Boiler Suit) Manufacturing plant?**
- 26. What is the Process Flow Sheet Diagram of Coverall (Boiler Suit) Manufacturing project?**

- 27. What are the Market Opportunities for setting up Coverall (Boiler Suit) Manufacturing plant?**
- 28. What is the Market Study and Assessment for setting up Coverall (Boiler Suit) Manufacturing Business?**
- 29. What is the Plant Layout for setting up Coverall (Boiler Suit) Manufacturing Business?**

- 1.1.4. Physical Characteristics
- 1.1.5. Topography
- 1.1.6. Administrative Setup
- 1.1.7. Economy & Industries
- 1.1.8. Industry at a Glance
- 1.1.9. Transportation and Communications

## **2. INTRODUCTION**

### **3. USES OF COVERALL (BOILER SUITS)**

- 3.1. USES
- 3.2. APPLICATIONS

## **4. TYPES OF COVERALL**

- 4.1. BASIC PROTECTIVE COVERALLS
- 4.2. DISPOSABLE COVERALLS
- 4.3. FIRE RETARDANT COVERALLS
- 4.4. QUILTED COVERALLS
- 4.5. ARC-RESISTANT COVERALLS
- 4.6. WATERPROOF COVERALLS
- 4.7. HIGH VISIBILITY COVERALLS (DAY/NIGHT VISIBILITY)

## **5. PROPERTIES OF THE COVERALL**

## **6. FEATURES AND BENEFITS**

## **7. PRODUCT DETAIL**

- 7.1. SPECIFICATIONS
- 7.2. FEATURES
- 7.3. FABRIC CARE

## **8. B.I.S. SPECIFICATIONS**

- 8.1. IS 7612~FUNCTIONAL REQUIREMENTS FOR FLAME RESISTANT AND HEAT RESISTANT SUITS
- 8.2. IS 7851~WASH AND WEAR REQUIREMENTS OF COTTON FABRICS
- 8.3. IS 1316~METHODS FOR DETECTION AND ESTIMATION OF DAMAGE IN COTTON FABRICS DUE TO MICRO-ORGANISMS
- 8.4. IS 1389~METHODS FOR TESTING COTTON FABRICS FOR RESISTANCE TO ATTACK BY MICRO-ORGANISMS
- 8.5. IS 15853~TEXTILES - WOVEN SUITING'S MADE OF COTTON MAN-MADE FIBRES/FILAMENTS AND THEIR BLENDS
- 8.6. IS: 15809 HIGH VISIBILITY WARNING CLOTHES

## **9. MARKET SURVEY**

- 9.1. GROWING COVERALL REQUIREMENT IN INDIA
- 9.2. GLOBAL MARKET OVERVIEW OF THE COVERALL
- 9.3. COMPETITIVE LANDSCAPE AND KEY VENDORS
- 9.4. PRODUCT SEGMENTATION AND ANALYSIS OF THE COVERALL MARKET

- 9.4.1. Disposable Coverall
- 9.4.2. Demography Insights
- 9.4.3. Application Insights
- 9.4.4. Regional Insights
- 9.5. TOP PLAYERS

## **10. EXPORT & IMPORT: ALL COUNTRIES**

- 10.1. EXPORT: ALL COUNTRIES
- 10.2. IMPORT: ALL COUNTRIES

## **11. EXPORT STATISTICS OF INDIA**

- 11.1. EXPORT STATISTICS FOR COVERALL BOILER SUIT

## **12. GARMENT MATERIALS**

- 12.1. CHEMICAL SPLASH FABRIC
- 12.2. COTTON FABRICS FOR REFERENCE

12.3. COTTON FABRIC

**13. MANUFACTURING PROCESS**

13.1. RAW MATERIALS REQUIRED

13.2. PLANT AND MACHINERIES REQUIRED

13.3. PROCESS

**14. PROCESS FLOW DIAGRAM**

**15. SUPPLIERS OF PLANT MACHINERY**

**16. SUPPLIERS OF RAW MATERIAL**

**17. PHOTOGRAPHS/IMAGES FOR REFERENCE**

17.1. MACHINERY PHOTOGRAPHS

17.2. RAW MATERIAL PHOTOGRAPHS

17.3. PRODUCT PHOTOGRAPHS

**18. PLANT LAYOUT**

# Reasons for Buying our Report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

# Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

# **Scope of the Report**

**The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Coverall (Boiler Suit) .” provides an insight into Coverall (Boiler Suit) market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Coverall (Boiler Suit) project. The report assesses the market sizing and growth of the Indian Coverall (Boiler Suit) Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:**

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

**We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Coverall (Boiler Suit) sector in India along with its business prospects. Through this report we have identified Coverall (Boiler Suit) project as a lucrative investment avenue.**
