

9 Best Business Ideas You Can Start to Make Money and Become Millionaire.

1. *Blood Collection Tubes (Vacutainer),*
2. *Electric Motors,*
3. *Trading Business,*
4. *Sodium Bicarbonate and Acetic Acid,*
5. *Carbonated Health Drinks,*
6. *uPVC Profiles for Doors and Windows,*
7. *Medical College with Hospital,*
8. *Maize & It's By Products*
9. *IV Fluid (FFS Technology)*

INTRODUCTION

Starting your own business can be a difficult endeavour. However, one of the most wonderful feelings in the world is no longer having to adhere to the mundane and monotonous 9-5 office schedule and being able to make your own decisions. However, not everyone can achieve their dream of running a business due to a lack of funds. But that is no longer the case! With a variety of low-investment business ideas that also pay well, you can now start your own business and turn your passion into a career.

Developing a business idea and launching a company can seem daunting and hard. There are numerous factors to consider, ranging from coming up with a great concept to forming a company, to business planning, fundraising, and much more. The impact of running a business on your life and the lives of others around you can be significant. However, before you can operate a business, you must first start one. If you've never done it before, deciding to start your own business can seem frightening. Fortunately, many of other entrepreneurs have gone before you, and you may learn from their successes—and failures.

Manufacturing Business of Blood Collection Tubes

A Vacutainer blood collection tube is a sterile glass or plastic test tube with a coloured rubber stopper that creates a vacuum inside the tube, allowing a specified amount of liquid to be drawn. Vacutainer tubes may contain chemicals that help to stabilize and maintain the specimen before it is tested analytically. Tubes come with a safety-engineered stopper, as well as a choice of labelling and draw volume options. The vial's additives are indicated by the colour of the lid.

From 2021 to 2028, the Blood Collection Tubes Market is expected to increase at a CAGR of 5.2 percent, from USD 1.78 billion in 2020 to USD 2.67 billion in 2028. The market is expected to increase due to rising need for enhanced blood sampling procedures, rising demand for safe blood collection technologies, and rising preference for disposable laboratory items. This is an excellent opportunity for anyone interested in starting Blood Collection Tubes (Vacutainer) Production business.

Profitable Business Industry of *Electric Motors*

An electric motor is a machine that turns electricity into mechanical energy. The interaction between the motor's magnetic field and electric current in a wire winding generates force in the form of torque imparted to the motor's shaft in most electric motors. Direct current (DC) sources, such as batteries or rectifiers, or alternating current (AC) sources, such as a power grid, inverters, or electrical generators, can power electric motors. An electric generator is physically equivalent to an electric motor, but it converts mechanical energy into electrical energy using a reversed flow of power.

During the projected period, the electric motor market is predicted to increase at a CAGR of 6.9%, from an estimated USD 113.3 billion in 2020 to USD 169.1 billion in 2026. Major reasons driving growth in the electric motor market include rising global power consumption and the use of electrical equipment and machinery in various industries, as well as the renewables sector. One of the fastest growing business sectors in the electrical industry is Electric Motors manufacturing.

The background of the slide is a low-angle, upward-looking photograph of several modern skyscrapers with glass facades. The buildings are arranged in a way that their lines converge towards the top center of the frame, creating a strong sense of height and architectural grandeur. The sky is a clear, pale blue.

Trading Business

A core economic concept is the buying and selling of commodities and services, with remuneration paid by a buyer to a seller, or the exchange of goods or services between parties. Trade can take place between producers and consumers within an economy. Governments can use international trade to create new markets for goods and services that would otherwise be unavailable. As a result of overseas trade, the market is more competitive, resulting in reduced pricing for customers at home. Trade marketing is a broader marketing discipline that focuses on generating demand with supply chain partners such as wholesalers, retailers, and distributors, rather than directly with customers.

Because of the growing vegan population around the world, demand for fruits and vegetable powder is expanding on the global market. Fruit and vegetable powder is convenient to store and extends product shelf life. Aside from that, this powder can be used in the off-season. Fruit and vegetable powder is used in the food and beverage industry to enhance the taste and flavour of drinks and foods. Furthermore, the usage of this powder aids in the stabilization of fresh fruit and vegetable prices at the start of the season. It is a Highly Profitable Business Idea to Start.

**Production
Business of**

**Sodium
Bicarbonate
and
Acetic Acid**

The chemical compound sodium bicarbonate, sometimes known as baking soda or bicarbonate of soda, has the formula NaHCO_3 . A sodium cation (Na^+) and a bicarbonate anion (HCO_3^-) make up this salt. Sodium bicarbonate is a crystalline white substance that frequently appears as a fine powder. It tastes slightly salty and alkaline, similar to washing soda (sodium carbonate). Nahcolite is the natural mineral form. It is found dissolved in many mineral springs as a component of the mineral natron. The second most basic carboxylic acid is acetic acid (after formic acid).

It's a common chemical reagent and industrial chemical that's used to make cellulose acetate for photographic film, polyvinyl acetate for wood glue, and synthetic fibres and fabrics, among other things. Sodium bicarbonate is utilised in a variety of industrial and household applications. The substance has a strong basicity and can neutralise any acid. As a result, pharmaceutical companies employ it to produce antacids for patients. The nature of the substance, which makes it less risky for the user, is also credited with the market's expansion.

However, because the rate of reactivity of this molecule is relatively rapid, it is recommended that it be used with caution. Because of these advantages, the worldwide sodium bicarbonate market is expected to develop significantly from 2019 to 2027. The global acetic acid market was estimated at USD 8.92 billion in 2019, with a compound annual growth rate (CAGR) of 5.2 percent predicted from 2020 to 2027. VAM consumes the vast bulk of acetic acid generated around the world. Starting your own Manufacturing business can be very profitable, especially if you understand the industry and work hard to make your business successful.

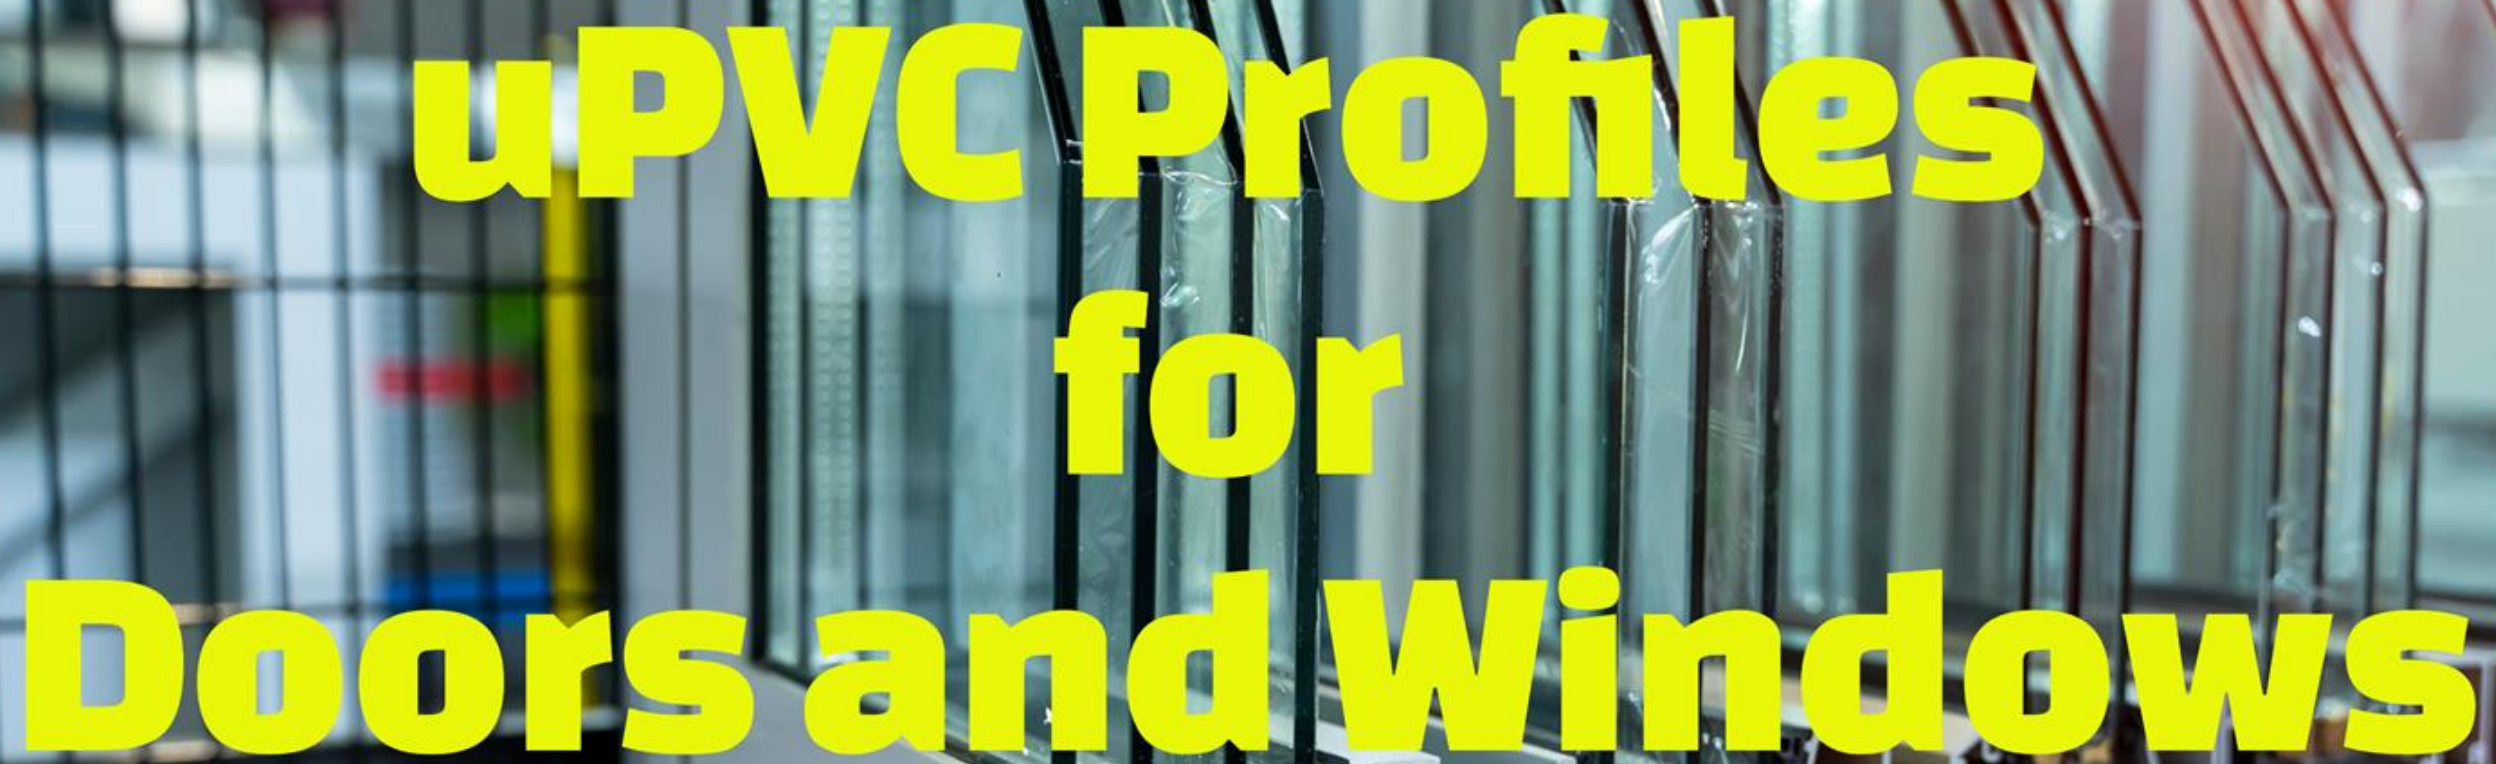

Investment Opportunities in Carbonated Health Drinks

Carbonated drinks, often known as bubbly drinks, are carbonated beverages that contain dissolved carbon dioxide. The outcome of CO₂ dissolving in a liquid is fizz or effervescence. In most cases, high-pressure carbon dioxide is employed in the procedure. The carbon dioxide is released as little bubbles when the pressure on the solution is relieved, causing the solution to become effervescent, or fizzy. A common example is the solubility of carbon dioxide in water, which results in carbonated water. Because carbon dioxide is only weakly soluble in water, it separates as a gas when the pressure is removed.

From 2021 to 2028, the global carbonated soft drink market is predicted to increase at a compound annual growth rate (CAGR) of 4.7 percent. Modern consumers are known for prioritizing convenience, and as a result, a major portion of everyday purchases consists of single grab-and-go items rather than bulk purchases. This has resulted in shelf-stable technologies and environmentally friendly packaging made of clean, renewable materials with fewer preservatives and chemicals. If you have an interest in starting a new business, one of the best options is to invest in Carbonated Health Drinks Manufacturing.

uPVC Profiles for Doors and Windows

A detailed cross-section of a uPVC window profile is shown, revealing its multi-chambered structure. The profile is dark grey or black and contains several internal chambers, some of which are filled with insulating foam. The profile is shown in a perspective view, with several other similar profiles visible in the background, suggesting a factory or showroom setting. The background is slightly blurred, focusing attention on the profile in the foreground.

Unplasticized Polyvinyl Chloride (uPVC) is a one-of-a-kind material that meets all of the requirements. Its widespread use can be ascribed to the excellent combination of properties it offers. uPVC is used in about 80% of the world's windows today, according to the British Plastics Federation (BPF). The uPVC profile is a PVC extrusion that has been treated with additives to make it suitable for use in uPVC windows and doors. uPVC windows are a low-cost, long-lasting, and energy-efficient solution for your home.

When we consider the advantages of uPVC, it's easy to see why it's one of the most widely used materials for home windows.

In recent years, the UPVC window and door market has grown at a faster rate, with significant growth rates. The global uPVC market was worth USD 43.32 billion, with a CAGR of 6.3 percent expected to reach USD 70.47 billion by 2026. Rigid PVC is sometimes known as unplasticized PVC (uPVC). If you wish to start uPVC Profiles for Doors and Windows Manufacturing industry then there are plenty of opportunities available here.

Set up a Medical College with Hospital

A medical college is designed to give students with medical education in order to qualify them as doctors in a variety of specialties, allowing them to treat patients suffering from a variety of illnesses. Doctors, with their unwavering determination, serve the entire nation by providing medication and treatment for diseases that steal people of their health and cause them to suffer. A medical school is frequently associated with a hospital. For the seriously ill, seriously injured, seriously burned, pregnant women, and other casualties, hospitals provide O.P.D. and admittance services.

In 2020, the worldwide medical education industry was estimated to be worth roughly USD 37 billion. Between 2021 and 2026, the market is predicted to grow at a CAGR of 5.3 percent. The increased demand for learning has stemmed from the growing requirement to create a system that not only boosts medical professionals' knowledge but also allows them to stay current with contemporary developments in the medical sector. Digitalization has helped to open up a slew of new opportunities for the global medical education business. If you're looking for a set up a Medical College with Hospital then we can help you.

Emerging Industry of **Maize and It's By Products**

(Starch, Sorbitol, Dextrose, Liquid Glucose and Malto Dextrose)

Maize, usually known as corn, is a cereal grain. In many parts of the world, maize has become a staple grain, out producing wheat and rice in terms of overall production. However, not all of this maize is ingested directly by humans. A percentage of maize production is used for corn ethanol, animal feed, and other maize products including corn starch and corn syrup. Corn comes in six different varieties: dent corn, flint corn, pod corn, popcorn, flour corn, and sweet corn. Maize is one of the earliest plants that humans have domesticated. Maize or corn, scientifically known as *Zea mays*, is a grassy plant that belongs to the grass family.

Maize is classified as coarse grains and is the third most widely grown crop after wheat and rice. Maize is an annual plant that is cultivated all over the world because to its great regional tolerance, however it is primarily grown in the Northern Hemisphere. In 2020, the maize market is estimated to reach 1.14 billion metric tonnes, with a CAGR of 3.8 percent during the period (2021-2026). The rising meat business is driving up demand for more cereals, particularly maize and soybean, which are both high in protein and are used to feed cattle.

Corn is the most common feed grain, accounting for more than 95 percent of total feed grain production and consumption. Maize is farmed on more than 90 million acres, with the majority of the crop being utilised for livestock and feed. While the number of corn field farms has decreased in recent years, the average acreage per corn farm has grown. This is a great opportunity for anyone interested in starting a business of Maize and It's By Products.

Rising Business of

IV Fluid

(FFS Technology)

Intravenous fluids are fluids that are given to a patient intravenously (via the veins) or directly through the circulatory system. These fluids must be sterile to protect patients from harm, and there are several solutions available. Many companies make pre-packaged intravenous fluids and items that can be mixed with sterile water to generate an intravenous solution. Two types of intravenous fluids are available. Crystalloids contain a solution of water-soluble molecules, such as saline solutions. When crystalloids are given, the osmotic pressure is reduced, allowing fluid to flow easily across blood vessels and causing edoema.

Colloids are formed composed of particles that aren't soluble in water and produce a high osmotic pressure, which draws fluid into blood vessels. Blood is an example of an often used intravenous colloid. The global intravenous solutions market was worth USD 10.7 billion in 2020, and it is predicted to increase at a 7.9% compound annual growth rate (CAGR) from 2021 to 2028. Malnutrition, particularly among the older population as a result of chronic conditions such as cancer, is likely to increase demand for IV treatments in the coming years.

One of the most prevalent side effects of cancer is dehydration. Chemotherapy can produce dehydration as a result of side effects such vomiting, diarrhoea, or increased urination, necessitating IV hydration. This presents an excellent opportunity for anyone looking to start a IV Fluid (FFS Technology) business.

Major Queries/Questions Answered in Our Report?

- 1. How has the industry performed so far and how will it perform in the coming years?**
- 2. What is the Project Feasibility of the Plant?**
- 3. What are the requirements of Working Capital for setting up the plant?**
- 4. What is the structure of the industry and who are the key/major players?**

- 5. What is the total project cost for setting up the plant?**
- 6. What are the operating costs for setting up the plant?**
- 7. What are the machinery and equipment requirements for setting up the plant?**
- 8. Who are the Suppliers and Manufacturers of Plant & Machinery for setting up the plant?**
- 9. What are the requirements of raw material for setting up the plant?**

10. Who are the Suppliers and Manufacturers of Raw materials for setting up the plant?

11. What is the Manufacturing Process of the plant?

12. What is the total size of land required for setting up the plant?

13. What will be the income and expenditures for the plant?

14. What are the Projected Balance Sheets of the plant?

- 15. What are the requirement of utilities and overheads for setting up the plant?**
- 16. What is the Built up Area Requirement and cost for setting up the plant?**
- 17. What are the Personnel (Manpower) Requirements for setting up the plant?**
- 18. What are Statistics of Import & Export for the Industry?**
- 19. What is the time required to break-even?**

20. What is the Break-Even Analysis of the plant?

21. What are the Project financials of the plant?

22. What are the Profitability Ratios of the plant?

23. What is the Sensitivity Analysis-Price/Volume of the plant?

24. What are the Projected Pay-Back Period and IRR of the plant?

25. What is the Process Flow Sheet Diagram of the plant?

26. What are the Market Opportunities for setting up the plant?

27. What is the Market Study and Assessment for setting up the plant?

28. What is the Plant Layout for setting up the plant?

Reasons for Buying Our Report

- ✓ **The report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- ✓ **This report provides vital information on the product like it's characteristics and segmentation**
- ✓ **This report helps you market and place the product correctly by identifying the target customer group of the product**

- ✓ **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- ✓ **The report provides a glimpse of government regulations applicable on the industry**
- ✓ **The report provides forecasts of key parameters which helps anticipate the industry performance and make sound business decisions**

Our Approach

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Free Instant Online Project Identification and Selection Service

Our Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.....[Read more](#)

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,

Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects.....[Read more](#)

Niir PROJECT CONSULTANCY SERVICES

AN ISO 9001 : 2015 CERTIFIED COMPANY

AN ISO 9001 : 2015 CERTIFIED COMPANY

Niir PROJECT CONSULTANCY SERVICES

Entrepreneur India

Who are we?

A trusted and leading name in the industry, we have been putting forth exceptionally integrated and comprehensive technical consultancy services. We believe that project consultancy serves as a critical element for the success of your projects. Moreover, we keep in mind that no client is the same and nor are the requirements. Therefore, we ensure uniqueness in every service you avail from us.

What do we offer?

- **Project Identification**
- **Detailed Project Reports/Pre-feasibility Reports**
- **Market Research Reports**
- **Business Plan**
- **Technology Books and Directory**
- **Industry Trend**
- **Databases on CD-ROM**
- **Laboratory Testing Services**
- **Turnkey Project Consultancy/Solutions**
- **Entrepreneur India (An Industrial Monthly Journal)**

How are we different ?

- We have two decades long experience in project consultancy and market research field
- We empower our customers with the prerequisite know-how to take sound business decisions
- We help catalyze business growth by providing distinctive and profound market analysis
- We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors
- We use authentic & reliable sources to ensure business precision

Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation

Who do we Serve?

- Public-sector Companies
- Corporates
- Government Undertakings
- Individual Entrepreneurs
- NRI's
- Foreign Investors
- Non-profit Organizations, NBFC's
- Educational Institutions
- Embassies & Consulates
- Consultancies
- Industry / trade associations

Sectors We Cover

- Ayurvedic And Herbal Medicines, Herbal Cosmetics
- Alcoholic And Non Alcoholic Beverages, Drinks
- Adhesives, Industrial Adhesive, Sealants, Glues, Gum & Resin
- Activated Carbon & Activated Charcoal
- Aluminium And Aluminium Extrusion Profiles & Sections,
- Bio-fertilizers And Biotechnology
- Breakfast Snacks And Cereal Food
- Bicycle Tyres & Tubes, Bicycle Parts, Bicycle Assembling

Sectors We Cover *Cont...*

- Bamboo And Cane Based Projects
- Building Materials And Construction Projects
- Biodegradable & Bioplastic Based Projects
- Chemicals (Organic And Inorganic)
- Confectionery, Bakery/Baking And Other Food
- Cereal Processing
- Coconut And Coconut Based Products
- Cold Storage For Fruits & Vegetables
- Coal & Coal Byproduct

Sectors We Cover *Cont...*

- Copper & Copper Based Projects
- Dairy/Milk Processing
- Disinfectants, Pesticides, Insecticides, Mosquito Repellents,
- Electrical, Electronic And Computer based Projects
- Essential Oils, Oils & Fats And Allied
- Engineering Goods
- Fibre Glass & Float Glass
- Fast Moving Consumer Goods
- Food, Bakery, Agro Processing

Sectors We Cover *Cont...*

- Fruits & Vegetables Processing
- Ferro Alloys Based Projects
- Fertilizers & Biofertilizers
- Ginger & Ginger Based Projects
- Herbs And Medicinal Cultivation And Jatropha (Biofuel)
- Hotel & Hospitality Projects
- Hospital Based Projects
- Herbal Based Projects
- Inks, Stationery And Export Industries

Sectors We Cover *Cont...*

- Infrastructure Projects
- Jute & Jute Based Products
- Leather And Leather Based Projects
- Leisure & Entertainment Based Projects
- Livestock Farming Of Birds & Animals
- Minerals And Minerals
- Maize Processing(Wet Milling) & Maize Based Projects
- Medical Plastics, Disposables Plastic Syringe, Blood Bags
- Organic Farming, Neem Products Etc.

Sectors We Cover *Cont...*

- Paints, Pigments, Varnish & Lacquer
- Paper And Paper Board, Paper Recycling Projects
- Printing Inks
- Packaging Based Projects
- Perfumes, Cosmetics And Flavours
- Power Generation Based Projects & Renewable Energy Based Projects
- Pharmaceuticals And Drugs
- Plantations, Farming And Cultivations
- Plastic Film, Plastic Waste And Plastic Compounds
- Plastic, PVC, PET, HDPE, LDPE Etc.

Sectors We Cover *Cont...*

- Potato And Potato Based Projects
- Printing And Packaging
- Real Estate, Leisure And Hospitality
- Rubber And Rubber Products
- Soaps And Detergents
- Stationary Products
- Spices And Snacks Food
- Steel & Steel Products
- Textile Auxiliary And Chemicals

Sectors We Cover *Cont...*

- Township & Residential Complex
- Textiles And Readymade Garments
- Waste Management & Recycling
- Wood & Wood Products
- Water Industry(Packaged Drinking Water & Mineral Water)
- Wire & Cable

Objective

- To get a detailed scenario of the industry along with its structure and classification
- To provide a comprehensive analysis of the industry by covering aspects like:
 - Growth drivers of the industry
 - Latest market trends
 - Insights on regulatory framework
 - SWOT Analysis
 - Demand-Supply Situation
 - Foreign Trade
 - Porters 5 Forces Analysis

Objective

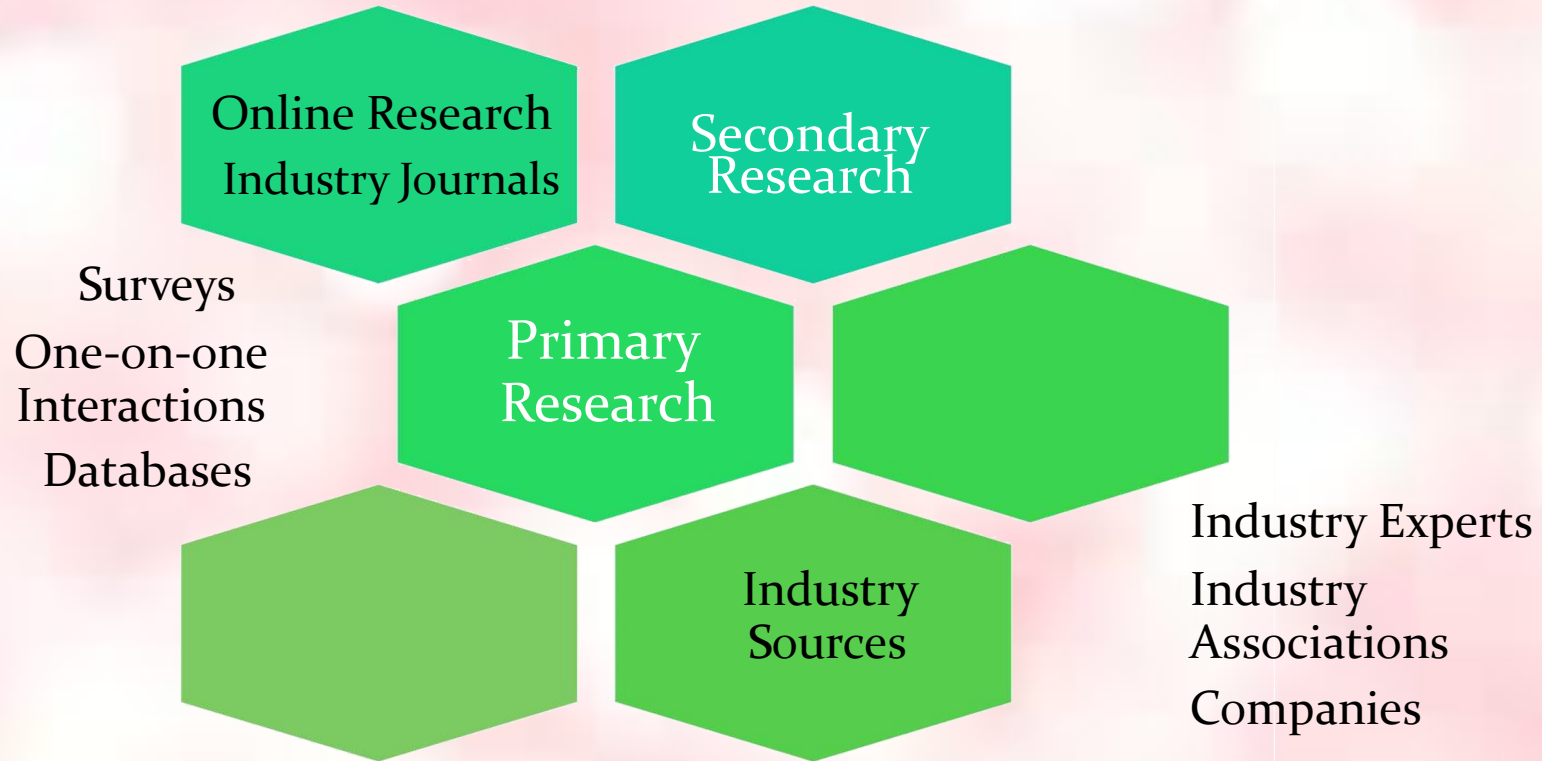

- To provide forecasts of key parameters which helps to anticipate the industry performance
- To help chart growth trajectory of a business by detailing the factors that affect the industry growth
- To help an entrepreneur/manager in keeping abreast with the changes in the industry
- To evaluate the competitive landscape of the industry by detailing:
 - Key players with their market shares
 - Financial comparison of present players

Clientele

- Venturist/Capitalists
- Entrepreneur/Companies
- Industry Researchers
- Investment Funds
- Foreign Investors, NRI's
- Project Consultants/Chartered Accountants
- Banks
- Corporates
