

Handbook on Coal, Lignin, Wood and Rosin Processing

Author: Dr. H. Panda

Format: paperback

Code: NI298

Pages: 512

Price: Rs 1875 | US\$ 150

Publisher: NIIR PROJECT CONSULTANCY SERVICES

Shipping: 5 days

About the Book

Coal is one of the world's most plentiful energy resources. Coal is one of the fastest growing forms of energy after renewable sources and its share in the global primary energy consumption increasing rapidly. Lignin is the most abundant natural raw material available on Earth in terms of solar energy storage. Lignin is a complex chemical compound, cross linked polymer that forms a large molecular structure. Lignin can be used as a green alternative to many petroleum-derived substances, such as fuels, resins, rubber additives, thermoplastic blends and pharmaceuticals. Rosin is a complex mixture of mainly resin acids and small amount of non-acidic components.

Energy markets are evolving with technological advancements supporting rapid growth in renewable energy capacity. The coal market is set to witness great boost in near future because of the rising government initiatives.

Coal is one of the main power generation sources all over the world. The factors that are favoring the market growth include rising electricity demand and rapid industrialization. Presently the global coal industry market is valued at \$9.4 with CAGR of 11.21 % is poised to reach \$22 billion in coming years. Asia Pacific has the larger demand and emerging as a larger supplier of Coal. The present global lignin market demand is estimated at \$ 4,222.1 million and is expected to reach \$6,190.5 million in future.

The Major contents of the book are coal, analysis of coal and coke, cotton, lignin and hemicelluloses, degradation of wood, CCA-treated wood, wood-polymer composites, lignocellulosic-plastic composites from recycled materials, chemical modification of wood fiber, delignification of wood with pernitric acid, rosin and rosin derivatives, polymerizable half esters of rosin. It describes the manufacturing processes and photographs of plant & machinery with supplier's contact details.

It will be a standard reference book for professionals, entrepreneurs, those studying and researching in this important area and others interested in the field of these industries.

Contents

Chapter 1

Coal

Ethylene

Fischer –Tropsch Synthesis for Olefins

Direct Conversion of Synthesis Gas to Ethylene

Ethanol from Synthesis Gas

Olefins from Methanol
Methanol Homologation
Methanol to Acetic Acid
Ethylene Glycol
Acetic Anhydride
Vinyl Acetate
Other Chemicals
Coal Pyrolysis Processes
Acetylene
Production of Chemicals by
Coal Liquefaction Processes
Conclusion
Chapter 2
Analysis of Coal and Coke
Methods of Analysis
Sampling
Determination of Constitution and Physical
Properties
Functional Group Analysis
Spectroscopy
Determination of Optical Constants
Electron Microscopy
Density
X-Ray Diffraction
Specification Tests
Proximate Analysis
Ultimate Analysis
Calorific Value
Fusibility of Coal Ash
Behaviour on Heating
Equilibrium Moisture of Coal at 96-97%
Relative Humidity and 39oC
Determination of Harcbgrobve Grindability
Index of Coal
Special Constituents
Coal Classification
Chapter 3
Cotton
Methods of Analysis
Modified Cottons
Finishing Agents
Separation and Identification
Spectroscopic Methods
Inorganic Constituents
Chemical Methods
Spectroscopic Methods
Chapter 4
Lignin and Hemicellulose
Hemicellulose
Assay systems
Classification

Thermophilic Hemicellulases
Alkaline active xylanases
 β - Xylosidase
Mannanases and galactanases
Accessory enzymes for Hemicellulose utilization
Lignin
Lignin-degrading enzymes
Lignin degradation in whole cell cultures
Degradation by cell-free enzyme systems
Role of glycosides in Lignin degradation
Lignin-carbohydrate complexes
Fractionation of Lignin and
Carbohydrate in wood
Isolation of LCCs
Chemical characteristics of LC bonds
Ferulic and p-coimarinic ester side chains
Frequency and stability of LC bonds
Residual lignin in kraft pulp
Biodegradation of LCCs
Residual LC structures after exhaustive
enzymatic digestion
Solubilization of LCC by microbial activity
Enzymatic treatments of pulps
Conclusion
Chapter 5
Degradation of Wood
Introduction
Gross Chemical Composition
Distribution of Wall Components
Component Chemistries
Microstructure and Porosity
Degradation of whole wood
Biodegradation of Lignin
Biodegradation of Cellulose
Biodegradation of Hemicellulose
Applications
Conclusion
Chapter 6
CCA-Treated Wood
Introduction
Materials and methods
Results and Discussion
Conclusion
Chapter 7
Wood-Polymer Composites
Introduction
Materials and Methods
Monomers
Wood specimens
Treatment of specimens with monomers
Volumetric swelling and moisture content

Result

Swelling of wood soaked in monomers

Polymer loading

Volumetric swelling of WPC specimens

Moisture content of WPC specimens

Conclusions

Chapter 8

Lignocellulosic-Plastic Composites from Recycled

Materials

Municipal Solid Waste as a Source of

Lignocellulosic Fibre and Plastics

Thermoformable composites

as Outlets for Waste Paper, Wood and Plastics

Recent Research on Wood

Fiber-Thermoplastic Composites

Research and Development Needs

Concluding Remarks

Chapter 9

Chemical Modification of Wood Fiber

Introduction

Experimental Procedure

Esterification Procedure

Analyses of Esterification Products

Board Formation

Board Testing

Moisture sorption

Rate and extent of swelling

Results and Discussion

Esterification of Wood Fiber

Moisture Sorption of Esterified Fiberboards

Rate and Extent of Swelling of Fiberboards

in Liquid Water

Plasticization of Esterified Fibers

Conclusions

Chapter 10

Delignification of Wood with

Pernitric Acid

Generation of pernitric acid

Decomposition of pernitric acid

Delignification of aspen wood

Conclusions

Experimental

Chapter 11

Rosin and Rosin Derivatives

Composition

Reaction and derivatives

Isomerization

Maleation

Oxidation

Photosensitized oxidation

Hydrogenation

Hydrogenless Hydrogenation
Polymers of vinylestere of hydrogenated rosin
Prehydrogenation
Hydrocracking of Rosin
Dehydrogenation
Polymerisation
Analysis
Compatibility
Solubility
Instrumental analysis
Gas chromatography analysis
Infrared Spectroscope
Nuclear magnetic resonance
Ultraviolet spectroscopy
X-Ray Analysis
Mass Spectroscopy
Phenolic modification
Salt formation
With metals
With unsaturated cyclic and acyclic hydrocarbons
Example-2
Rosin-isoprene condensate (Example-3)
Rosin-isobutene condensate (Example-4)
Example -5
Rosin-styrene condensate (Example-6)
Rosin-cyclopentadiene condensate (Example-7)
Rosin-coumarone-indene condensate (Example-8)
Rosin-divinylbenzene condensate (Example-9)
Example-10
Esterification
With Glycerol
With pentaerythritol and other polyhydric alcohols
With monohydric alcohols
Hydrogenolysis
Polyesterification
Copolyesters
Ammonolysis
Preparations
Dehydroabietylamine acetate
Dehydroabietylamine
Typical Uses
Asphalt additives
Chemical Intermediates
Corrosion Inhibitors
Flotation Reagents
Preservatives
Resolving agent
Chemical and physical properties of
Amine D acetate
Stability to heat and storage
Stability to heat and storage

Surface Activity
 Chemical Reactivity
 Chemical and Physical Properties of
 Amine D acetate
 Solubility
 Note
 Stability to Heat and Storage
 Stability to Air and Sunlight
 Surface Activity
 Styrenation
 Decarboxylation
 Hydroxymethylation and hydroxylation
 Methods of preparations
 Nitrogenous intermediates
 Methyl levopimarate (i)
 Methyl neoabietate (ii)
 Methyl photolevopimarate (iii)
 Reaction of SSI with Methyl levomaratate (i)
 Reaction of Chlorosulphonyl isocyanate with
 methyl neoabietate (ii)
 Reaction of Chlorosulphonyl isocyanate with
 methyl photolevopimarate (iii)
 Fumaroniprile Adduct of
 levopimaric acid
 Tetracyanoethylene Adduct of
 levopimaric acid
 Acrylonitrile adducts of
 levopimaric acid
 Polyoxyalkylation

Chapter 12

The Polymerizable Half Esters of Rosin
 Experimental
 Preparation and properties of monomers
 Maleic rosin esters with reactive groups
 Polymerization & Copolymerization
 Aqueous Polymerization
 Suspension Polymerization
 Secondary reactions and graft copolymers
 Reaction Involving Crosslinking
 Applications
 Coatings
 Inks
 Textiles
 Conclusions

Chapter 13

Photographs of Plant & Machinery with Supplier's
 Contact Details

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering

integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Market Research, Manufacturing Process, Machinery, Raw Materials, Project Feasibility, Investment Opportunities, Technical Consultancy and Startup Help.

NPCS also publishes process technology books, technical books, startup books, directory, business database, detailed project reports and market research reports.

Our Detailed Project Report aims at providing all the critical data required by entrepreneurs for starting new business ventures.

NIIR PROJECT CONSULTANCY SERVICES

106-E, Kamla Nagar, New Delhi-110007, India
