

# Handbook on Fisheries and Aquaculture Technology

**Author:** NIIR Board of Consultants and Engineers

**Format:** Paperback

**ISBN:** 8178330792

**Code:** NI101

**Pages:** 750

**Price:** Rs. 1,100.00 US\$ 29.73

**Publisher:** Asia Pacific Business Press Inc.

Usually ships within **5** days

The fishery sector is important from Indian economy view point as it contributes a source of income to a number of fishermen and has huge export potential. The systems and technology used in aquaculture has developed rapidly in the last fifty years. They vary from very simple facilities like family ponds for domestic consumption in tropical countries to high technology systems like intensive closed systems for export production. Much of the technology used in aquaculture is relatively simple, often based on small modifications that improve the growth and survival rates of the target species. Nowadays, the fish and fisheries industry is one of the fastest growing international commodity markets globally. Guaranteeing an adequate supply to this international market requires hundreds of thousands of fishing vessels and fish farms, as well as tens of thousands of fish processing workers, wholesalers and retailers in countries spread all over the world. The fishery sector thus generates employment and income for millions of people and in one of the major fields to venture. A wide range of aspects of fresh water aquaculture such as selection of species of fish and shellfish, construction and preparation of various types of fish ponds, control of aquatic weeds and predators, production of seed fish and their transportation, fish nutrition and fish diseases and their control pertaining to composite fish culture, air breathing fish culture etc. have been dealt with a length for easy adoption.

The major contents of the book are classification of fishes, general characters of fishes, techniques in fish identification, cold water fisheries of India, physical and chemical properties of fishery water, chemical constituents of fish, economic importance of fishes, fish in relation to human health, construction of fish farms, etc.

In this book you can find all the basic information required on the fundamental aspects of the fisheries and aquaculture technology with detailed information of their applications a wide variety of industrial processes etc. The book is very useful for research scholars, technocrats, institutional libraries and entrepreneurs who want to enter into the field of aquaculture technology.

## Contents

### 1. Fish, Fisheries and Ichthyology

Fish

Fisheries

History of Ichthyology

### 2. Classification of Fishes

General Characters of Fishes

Major Groups of Living Fishes

Characterization of Living Fish Groups  
Class Agnatha (Lampreys and Hagfishes)  
Subclass Cyclostomata  
Class Chondrichthys (Sharks, Rays, Skates,  
and Chimaeras).  
Subclass Elasmobranchii (Sharks, Rays, Skates)  
Subclass Holocephali (Chimaeras).  
Class Osteichthyes (Bony Fishes)  
Subclass Sarcopterygii (Lungfishes and Lobefins)  
Subclass Actinopterygii (Higher Bony Fishes)  
Major groups of Extinct Fishes  
Class Cephalaspides (Osteostraci)  
Class Pteraspides (Heterostraci)  
Class Palaeospondyli (Cycliaae)  
Class Pterichthyes (Antiarchi)  
Class Coccostei (Arthrodira)  
Class Acanthodii  
Teleostei  
Division I. TAENIOPEDIA (Ribbon young)  
Division II. ARCHAEOPHYLACES  
(Ancient watchmen)  
Division III. EUTELEOSTEI (Intensive Teleostei)  
3. Fish Identification  
Techniques in fish identification  
Morphometric characters  
Meristic characters  
Descriptive characters  
Key to the Identification of Fishes  
Fisheries of India  
5. Cold Water Fisheries of India  
Trout  
Mirror carp  
The Tench (*Tinca tinca*)  
Golden carp (*Carassius carassius*)  
Mahseer  
Barilius  
Labeo  
Garra  
*Glyptothorax pectinopterus*  
Programme of Fisheries  
Development of fish in the Hills of  
Uttar Pradesh  
Composite culture  
New Directions  
6. Crustacean Fisheries  
Crab Fishery  
Lobster Fishery  
7. Molluscan Fisheries  
Shell-fish Fishery  
Chank Fisheries  
Pearl Fisheries  
8. Physico-Chemical and Biological Conditions of Fishery Water 48-58  
Physical and chemical properties

Organisms in fishery water

9. Paddy Cum Fish Culture

Requisites of a paddy field for fish culture

Some of the fishes used in India for fish culture in paddy field's are

10. By-Products of Fishing Industry

Fish Oils

Preparation of body oils of fish

Composition of fish oil

Fish Oil Industry in India

Extraction of liver oil

Liver-oil industry in India

Shark fins

Isinglass (fish-maws)

11. Chemical Constituents of Fish

Flesh of Fishes contains

Mineral constituents

Carbohydrates

Enzymes

Pigments

Vitamins

Phospholipids

12. Economic Importance of Fishes

By-products of fishes

Oils

Fish Protein

Fish-meal

Fish glue

Ising glass

Other uses

Shark fins

Fertilizers

Controllers of diseases

Scavengers

As baits

An object of sports and entertainment

Aquarium

13. Fish in Relation to Human Health

Fish in Relation to Human Health

14. Fish Aquarium

TANK Selection

Selection of Plants

Selection of Fish

Maintenance of Aquarium

15. The Diversity of Fishes

Adaptations in fishes

16. Hill Stream Fishes

Changes in external form and size of fish

Scale covering etc.

Paired fins (skeleton and musculature connected with them)

Caudal fin and its peduncle

Mouth, jaws and barbels

Eyes  
Gill opening etc.  
Air-Bladder  
Skin and other modifications  
Examples of Indian hill stream fishes  
Cyprinoids  
Siluroids  
17. Plankton and Fish Productivity  
Basis of production :  
Special adaptations of animals  
planktonic life :  
The relationship of zooplanktons to the  
environment:  
18. Zooplankton  
Protozoa  
Porifera  
Coelenterata  
Ctenophora  
Nemertinea  
Nematoda  
Rotifera  
Polyzoa  
Chaetognatha  
Annelida  
Mollusca  
Crustacea  
Echinodermata  
Protochordates  
Fishes  
Amphibians  
Characteristic features of zooplankton  
as stated before are  
Special adaptations of animals to  
planktonic existence  
19. Transportation and Marketing  
Transport  
Ice and Cold Storage  
Marketing  
Fishing Crafts and Gears  
Fishing Vessels  
Sea Crafts  
West Coast  
East Coast  
River Crafts  
Rafts and dug-outs  
Plank-built boats  
Large fishing boats  
Fishing Gears (Nets)  
Inland Fishing Gear  
Gear used in estuaries, lagoons and back  
waters  
Gear used in ponds, jheels, lakes and  
reservoirs

Gear used in hill streams  
Gear used in rivers  
20. Processing and Preserving  
Cleaning, Boning and Filleting Fish  
Cleaning  
Boning Round Fish  
Skinning and Boning Flat Fish  
Preparing Eels  
Skinning Dogfish and Tope etc.  
Preparing Lobsters and Crabs  
Boiling  
Extracting the Meat  
Shrimps and Prawns  
Shelling Shrimps and Prawns  
Potted Shrimps  
Shrimp Waste  
Salting Fish  
Roll mops  
Dried Fish  
Bottled or Canned Fish  
Freezing  
Smoked Fish  
Making the Smoke  
Equipment  
Preparing the Fish  
Brining  
Smoking  
Smoked Mussels  
Smoked Eels  
21. Aquaculture - The Concept  
Mariculture  
Substrate Systems  
Seawater Ponds  
Cages  
Enclosures  
Tanks  
Aquaculture in Fresh and Brackish Water  
Net Cage Husbandry  
Dual-Purpose Use of Water and Land  
22. Aquaculture - In Practice  
Algae and Seaweeds  
Algae  
Seaweed  
Molluscs  
Crustaceans  
Marine Fish  
Fresh and Brackish Warm Water Fish  
The Carp (*Cyprinus carpio*)  
Herbivorous Cyprinids  
Tilapia spp.  
Milk Fish (*Chanos chanos*)  
Mullet (*Mugil* spp.)  
Catfish

EELS (*Anguilla* spp.)  
Other Warm Water Fish  
Africa  
*Heterotis niloticus*  
Nile Perch (*Lates niloticus*)  
*Haplochromis* spp., *Hemichromis* spp.,  
*Serranochromis* spp.  
*Labeo* spp.  
Asia  
Ayu (*Plecoglossus altivelis*)  
Labyrinth Fish  
South America  
Pirarucu (*Arapaima gigas*)  
Fish in Colder Waters  
Trout  
Salmon

23. Culturable Fish and Shellfish  
Culturable fishes  
Indian Major Carps  
Exotic (Chinese) Carps  
Minor Carps  
Catfishes (Order : Siluriformes)  
Murrels or Snakeheads  
(Order : Channiformes)  
Tilapia (Order : Perciformes)  
Sport fishes (Cold-water fishes)  
Trouts (Order : Salmoniformes)  
*Salmo trutta fario* (Brown trout)  
*Salmo gairdneri gairdneri* (Rainbow trout)  
Mahseers (Order : Cypriniformes)  
Culturable Shellfish

24. Construction of Fish Farms  
Structures of fish ponds  
Bunds  
Slope  
Berm  
Construction of pond  
Determination of Quantity of Earth for the  
Construction of Bund  
Bund Formation  
Inlet and Outlet  
Simple inlet and outlet (monk) made of concrete  
and bricks  
Types of fish ponds  
Nursery Pond  
Rearing Pond  
Production Pond  
Other measures to be considered  
during the construction of a fish farm

25. Management of Fish Farms-  
Nursery pond  
Eradication of Aquatic Weeds and Predators  
Liming and Fertilisation

Stocking  
Supplementary Feeding  
Harvesting of Fry  
Rearing pond  
Fertilisation  
Stocking  
Feeding  
Harvesting of Fingerlings  
Production pond  
Liming and Fertilisation  
Stocking  
Feeding  
Harvesting of Fish  
General Considerations  
26. Induced Breeding and Seedfish Production in Carps  
Induced breeding in Indian major carps  
Collection of Pituitary Glands  
Acetone-Drying of Pituitary Glands  
Preparation of Pituitary Extract  
Selection of Breeders  
Injection of Pituitary Extract in Indian Major Carps  
Breeding  
Hatching  
Induced breeding of Chinese carps  
Selection of Breeders  
Induced breeding of common carp  
Jar Hatchery  
27. Transport of Seedfish and Breeders  
Techniques of transport  
Traditional Method  
Transport in Closed Containers  
Basis for estimating quantity of seedfish as a standard  
Transport of breeders  
28. Composite Fish Culture  
Feeding  
Production  
Economics of composite fish culture  
Culture of Air-breathing Fishes  
Culturable areas  
Collection and rearing of murrel seed  
Collection and rearing of catfish seed  
Stocking of fingerlings of murrel and catfish  
Feeding  
Growth and production  
Harvesting  
29. Culture of Trouts  
Characteristic features of trouts  
Trout seed resources  
Culture practices  
Collection of eggs  
Incubation of trout eggs

Flat trays and troughs  
Incubators  
Trout hatching jar  
Nursery ponds  
Rearing Pond and Raceways  
Jar System  
Drums  
30. Culture of Ornamental Fishes  
Setting up an Aquarium tank  
Biological filter and aeration  
Importance of Biological Filter  
Qualities of Water for Aquarium Tank  
Filling Water  
Planting  
Lighting  
Varieties of goldfish  
Descriptions of common species of ornamental fish  
Livebearers  
Egg Layers  
Introduction of fish in an aquarium tank  
Feeding  
Breeding of ornamental fish  
Egg Scatterers  
Breeding Goldfish  
Egg Depositors  
Bubble-nest Builders  
Livebearers  
Water quality for breeding tanks  
Selection and conditioning of fish for breeding  
Nursing the Young  
Culture of Giant Fresh-water  
Prawn, *Macrobrachium rosenbergii*  
Characteristic features and distribution of *M. rosenbergii*  
Life cycle of *M. rosenbergii*  
Collection of seedprawn  
Transportation of seedprawn  
Management of production ponds  
Stocking  
Feeding  
Growth and Production  
31. Fish Farming with Agriculture and Livestock  
Fish farming with agriculture  
Rice-fish Culture  
Simultaneous culture  
Simultaneous Culture Of Fresh-water Prawn and Rice  
Rotational culture of rice and fish  
Fish Culture in 'Pokkali' Fields  
Banana-fish Culture  
Fish farming with livestock

Duck-fish Culture  
Chick-fish Culture  
Chick-pig-fish Culture  
Cattle-fish Culture  
32. Sewage-fed Fish Culture  
Quality of sewage  
Sewage treatment  
Description of oxidation ponds  
Sewage-fed fish ponds  
Sewage water for other crops  
Model plans  
Water Recirculation System for Fish Cultrue  
Indoor water recirculation system  
Outdoor water recirculation system  
33. Culture of Fish Food Organisms  
Culture of Diatoms  
Sterilisation of glassware  
Preparation of medium  
Culture in test tubes or Petri dishes  
Culture in carboys  
Culture in large cylinders  
Batch culture  
Laboratory culture of zooplankton  
Mass culture of zooplankton  
Culture of Rotifers and Cladocerans  
Culture of Artemia  
34. Fish Diseases and Their Control  
Medium for fish diseases  
Types of diseases  
Parasitic Diseases  
Treatment  
Disorders by Biotic Factors  
Disorders by Abiotic Factors  
Acidosis and alkalosis  
Miscellaneous diseases  
Gas Bubble Disease  
Dietary Diseases  
35. The Development of New  
Techniques for Aquaculture  
Environment Controlled Warm Water  
Aquaculture  
Stock Density  
TEMPERATURE  
Water Quality  
Tanks  
Feeding  
Feed Quality  
Feed Quantity  
Feeding methods  
Mechanical Feeders  
Breeding  
The Biology of Reproduction  
Breeding Technology

Breeding And Multiplication  
The Ahrensburg Closed-Cycle System  
Construction  
Clearing Chamber Volume and Flow Rate  
Heating  
Materials  
Operation  
Stock Density  
Aeration  
Water Pumps  
Criteria  
Function  
Slat Water Modification  
Tank 1: *Tilapia aurea* x *Tilapia nilotica*  
Tank 2: *Tilapia aurea*  
36. Economics of Fish Culture  
Production Function  
Yield rate and pond area  
Input rates  
Input-output co-efficients  
The interesting input-output co-efficients are :  
Input costs  
Labour costs  
Interest cost  
Other costs  
Total cost  
Relative share of cost component in total cost  
Production, Sales and Costs  
Income from Fish Farming  
37. Analysis of the Economics of Fish  
Culture  
Pond Size  
Yield and input rates  
Costs and returns  
Farmer's income  
Culture Practice  
Yield and input rates  
Costs and returns  
Farmer's income  
Water Availability  
Yield and input rates  
Costs and returns  
Farmer's income  
Ownership  
Yield and input rates  
Costs and returns  
Farmer's income  
Lease Duration  
Yield and input rates  
Costs and returns  
Farmer's income  
Government Intervention  
Yield and input rates

Costs and returns  
Farmer's income  
38. Fish as a Food Commodity  
Introduction  
Biochemical Composition of Raw Fish  
Nutritional Value of Raw Fish  
Nutritional Value of Preserved and Processed  
Fish (Fishery Products)  
Fish Decomposition  
Post-mortem changes and Rigor mortis  
Rigor Mortis  
Post-rigor decay and spoilage of fish  
Enzymatic spoilage  
Microbial spoilage  
Bacterial flora of fish and bacterial spoilage  
Chemical spoilage  
Rancidity  
Autolysis  
Spoilage due to other factors  
Spoilage in marine fish  
Spoilage of freshwater fish  
Fish Preservation  
Introduction  
Principles of preservation  
Methods of preservation  
Special problems in fish preservation  
Food-poisoning, Intoxications, Allergies etc.  
from Fish  
Food-poisoning from eating a poisonous fish  
species  
Food-poisoning of bacterial origin  
Utilization of Fish as Products and  
By-products  
Fish liver oil  
Methods of extraction of fish liver oil from liver  
Prototype of fish liver-oil manufacturing plant  
Simple model of fish liver-oil extractor for use in  
small scale cottage industry  
Fish body oil  
Fish meal  
Others  
Fish Silage  
Fish manure and guano  
Fish Sausage and ham  
Fish Glue  
Isinglass  
Fish leather  
Fish Caviar  
Fish Macaroni  
Fish Biscuits  
Insulin  
Cooking effect on Nutritional value of fish  
39. Fish Meal

Making Fish Meal at Home  
The Separated Liquids  
Fish Oil  
Stickwater  
The Remaining Solids  
What Kind of Fish?  
40. Seaweed  
Fertilizer  
Feed  
Food  
Carragheen as a Vegetable Gelatine  
Soups, Stews and Jams  
Some other Carragheen Recipes  
Carragheen Blancmange  
Carragheen Chocolate Blancmange  
Carragheen Jelly  
Carragheen Cough Mixture  
Sausage Coverings  
Laver (*Porphyra umbilicalis*)  
Laverbread  
Laver Mutton Sauce  
Dulse (*Rhodomenia palmata*)  
Other uses for Seaweed  
41. Fecundity  
The individual fecundity is determined  
as follows  
42. A Fish Farm  
The situation of the farm  
Water supply  
Kind of soil  
Embankment  
Drainage  
Overflow spillway  
Fish Farm Implements  
43. Aquatic Pollution  
Kinds of pollution  
Sewage  
Industrial waste  
Mining waste  
Silt from soil erosion  
Radioactive pollution  
Thermal pollution  
How pollutants affect the aquatic  
organisms?  
Detection and measurement of pollution  
Chemical tests  
Physical tests  
Biological tests  
Where pollution is found?  
Pollution Control  
44. Development of Indian Fisheries  
Bold programme required  
Research work needed

State help essential  
Problems of fishery research  
Fisheries development in Japan  
Commercial fisheries of India  
Outside India  
How to develop Indian fisheries  
Inference  
45. Some Traditional Dried  
and Smoke Cured Products  
Dried Anchoviella  
Traditional Drying  
Improved Method of Drying  
Anchovy Flakes  
Laminated Bombay Duck  
Brine-pressed Sardines  
Salted Boiled Fish (Pindang)  
Processing  
Pre-process Handling  
Production  
Processing Conditions and Quality Changes  
during Storage  
Effect of Salt Content in Brine on Quality  
Biochemical Changes during Storage  
Microbial Changes  
Dehydrated Squid  
Raw Material Quality  
Drying of Squid  
Beche-de-mer  
Traditional Processing (Chinese Method)  
Improved Method  
Southeast Asian Method  
Philippine Method  
Uses  
Maldivian Fish  
Masmin  
Traditional Process  
Improved Method  
Dehydrated Jellyfish  
Katsuobushi  
Seasoned Products (Tsukudani)  
46. Products From Whole Fish  
Fishmeal  
Dry Reduction  
Wet Reduction  
Fish Protein Concentrate  
Methods of Production  
FPC Type B  
Texturised FPC  
Types of FPC and Recommended Standards  
Properties of FPC  
Nutritive Value and Consumer Acceptability  
Economics of FPC Production  
47. Surimi

Quality  
Raw Materials  
Preparation of Mince  
Loss and Recovery of Proteins  
Types of Surimi  
Role of Additives  
Sugars  
Starch  
Polyphosphate and Sodium Chloride  
Albumen  
Fat  
Method of Production  
Surimi from Fatty Fish  
Properties of Surimi  
Future of Surimi  
Surimi-based Products  
Kamaboko  
Fish Sausage  
Fish Ham  
48. Fermented Fishery Products  
Fermentation Processes  
Liquid Fermented Products (Sauces)  
Factors Controlling Sauce Fermentation  
Lipid Content of the Fish and Quality of Sauce  
Colour  
Flavour  
Traditional Methods of Fermentation  
Traditional Products  
Fish Preserved in Fermented Media  
Makassar  
Buro  
Pekasam  
Colombo Curing  
  
Paste Fishery Products  
Bagoong (Philippines)  
Belacan (Malaysia)  
49. By-products  
Shark Fin Rays  
Fish Maws/isinglass  
Pearl Essence  
Ambergris  
Squalene  
Surgical Sutures from Fish Gut Collagen  
Hormonal  
& Genetic Approach to Fisheries  
Introduction  
Fish Genetic (Germ Plasm) Resources  
Application to Fisheries management  
Capture fishery management  
Fish Culture Management  
Taxonomy  
Conclusion

Cryopreservation of Gametes  
(Gene Banking)  
Cryopreservation technique for sperms :  
a flow chart  
Thawing for fertilization  
Fertilization with cryopreserved sperms  
Monosex Culture  
Sex Reversal  
Sterile Fish  
Hybridization  
Diploid Hybrid  
Triploid (Polyploid) Hybrid  
Hybrid Vigour (Favourable Heterosis)  
Transgenic Fish  
Application  
Triploids (Broiler Fish) : Polyploidy  
Inbreeding, Cross-breeding and  
Selective Breeding  
Gold Fish  
51. Methods in Fishery Science  
Methods of Fish Preservation  
Taxonomic Identification  
Procedure for identification of new species  
for a region or for the literature  
Morphometric and other Analysis  
of Fish Body  
Length of body  
Weight of body  
Body ratio H/L of fish  
Sex Determination  
Sexual maturity of the individual  
(state of gonads)  
Scale reading for age determination  
Methods of Measuring Condition of  
Fish  
Fecundity and Reproduction Analysis  
Classification of fishes on the manner of  
spawning  
Types of eggs :  
Estimation of number of eggs  
Fecundity or Ovarian egg counts :  
Counting of laid eggs :  
Immature stage  
Mature stage  
Co-efficient of maturity  
Identification of eggs and larvae  
Food and Feeding (Food Habit) Analysis  
of Fish  
Forage ratio  
Qualitative and quantitative Analysis of Stomach  
contents  
Numerical method  
Frequency of occurrence method

Volumetric method  
Gravimetric method  
Rate of digestion  
Direct method  
X-ray method  
Histological check of stomach wall  
Visual check of oral cavity and gill  
Food Items  
Enzyme activity in digestion (amylase, lipase etc.)  
Food Co-efficient  
Index of relative importance  
Classification of fish based on feeding habits  
Pathological Analysis of Fish  
Autopsy  
Diseases and parasites  
Bio-assays of Water  
Toxicity analysis of pollutants  
Chemical Analysis of water for the natural factors  
Dissolved Oxygen [Alsterberg (Azide) method]  
Free Carbon dioxide  
Determination of ammonia-nitrogen (by Nesslerisation method)  
pH  
Alkalinity due to Calcium Carbonate : (SBV).  
Physical Analysis of water for the natural factors  
Use a Tackson turbidimeter  
Use of Sacchi disc  
American Geological Survey method  
Temperature measurement  
Plankton Sampling  
Sampling procedure :  
52. Problems, Prospects and Recommendations  
Problems  
Fish farmers  
Fish Farmer Development Agencies (FFDA)  
Lease  
Credit  
Subsidy  
Marketing  
Prospects  
Area and Production  
Employment and income  
Recommendations  
Data base  
Research  
Classification of districts  
Seed  
Over stocking  
Lease  
Institutional credit

Co-operatives  
Fish Farmers Development Agencies (FFDAs)  
Significance of Fisheries  
FreshWater Culture Fishery  
Need for the Study  
Objectives

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
