

# Bamboo Plantation and Utilization Handbook

**Author:** H. Panda  
**Format:** Paperback  
**ISBN:** 9788178331508  
**Code:** NI243  
**Pages:** 568  
**Price:** Rs. 1,475.00 **US\$** 150.00  
**Publisher:** Asia Pacific Business Press Inc.  
Usually ships within **5** days

Bamboo is an important non wood forest product. In India, bamboo, which is traditionally considered the Poor man wood, and labelled as Green Gold is being considered a major export item by the centre for the global market. Bamboo is perfectly suited to agro forestry as a woody grass. Bamboo has been exploited from natural stands from time immemorial. Bamboo is increasingly being cultivated like other agricultural crops, that is, in professionally managed plantations. The growth of industries utilizing bamboo requires the sustainable cultivation and management of bamboo resources. India is blessed with very rich bamboo resources. Bamboo can play an important role in raising forest cover and a major role in stabilization of the environmental problems. The annual yield in tonnes/ha depends on the environment as well as the species. It is estimated that almost 25% of the biomass in the tropics and 20% in the subtropics, come from bamboo. The cultivation of bamboo as a wood substitute helps to offset depletion of the rain forest. Its rapid growth ensures an effective reconstruction of damaged eco systems. Bamboo is one of many sustainable non wood resources that can generate income for a large forest dependent rural population and it needs to take further steps to realize its full potential. In India, the North East has the largest stock and diversity of bamboos. Though India has the largest area under bamboo, the yield per hectare is very low compared to other countries. Bamboo plantation rising should be encouraged & promoted due to their high value, productivity, uniformity of crop, choice of species linked to peoples' need and industrial need. Bamboo forest constitutes about 13% of the total forest area of the country. About 50% of bamboo produced in India grows in North Eastern region and West Bengal. India has the second largest bamboo reserves in the world after China. This book basically deals with bamboos in India, the bamboo plant harvesting, cultivating, silviculture and management, collection of material and preparation of cuttings treatment for root induction in cuttings, preparation of nursery and planting nursery management transplanting, pattern of biomass allocation in growing bambusa bamboos, biochemical characteristics of plantation bamboo leaf (bambusa bambos) with reference to organic productivity, economic analysis, bamboo plantation, problems and prospects, need for bamboo plantation, consumption pattern of bamboos in India, working and finishing qualities of bamboo, bamboos for structural use, pipe water supply system and drainage, bamboo furniture weaving industry etc.

This book provides a complete detail on Bamboo plantation and its utilization. This book contains chapters like types of bamboo in India, taxonomy, cultivation, harvesting, growth management, bamboo utilization,

Bamboo products and many more. This book will be very helpful to all its readers, environmentalists, agronomists, entrepreneurs, industrialists, or anyone with a special interest in bamboo cultivation.

## Contents

### 1. INTRODUCTION

### 2. DISTRIBUTION OF BAMBOOS IN THE WORLD

Bamboos in Asia

Bangladesh

China

India

Indonesia

Japan

Korea

Loas

Malaysia

Myanmar

Papua New Guinea

Phillippines

Singapore

Sri Lanka

Thailand

Vietnam

Africa

America

### 3. BAMBOOS IN INDIA

Arundinaria Michaux s.s.

Bambusa Schreber

The Chinese Bamboo

Chimonobambusa Makino

Dendrocalamus Nees

Dinochloa Buse

Drepanostachyum Keng

Gigantochloa Kurz

Himalayacalamus Keng

Indocalamus Nakai

Melocanna Trin.

Ochlandra Thw.

Oxytenanthera Munro

Phyllostachys Sieb. and Zucc.

Pleioblastus Nakai

Pseudosasa Nakai

Pseudoxytenanthera Soderstrom and Ellis

Schizostachyum Nees

Semiarundinaria Makino

Sinarundinaria Nakai

Sinobambusa Makino

Thamnocalamus Munro

Thyrsostachys Gamble

### 4. THE ENVIRONMENT

The Bamboo Plant

Culm  
Rhizome  
Flower  
Flowering  
5. CULTIVATION  
Soil  
Preparation for Plantations  
Fertilizers  
Regeneration  
Propagation  
Silviculture and Management  
6. HARVESTING  
Yield  
Production  
7. TAXONOMY  
8. ECOLOGICAL REQUIREMENTS  
9. GROWTH CHARACTERISTICS  
Development of Bud  
Clump and Culms  
Rhizomes  
Flowering  
In Vitro Flowering of Bamboo  
10. ESTABLISHMENT AND MANAGEMENT  
Direct Sowing of Seeds  
Seed Characters  
Direct Sowing  
Transplanting  
By Culm With Roots and Rhizome  
By Stock With Roots and Rhizome  
By Rhizome With Roots  
By Offset Planting  
By Culm Cutting  
Collection of Material and Preparation of Cuttings  
Treatment for Root Induction in Cuttings  
Preparation of Nursery and Planting  
Nursery Management  
Transplanting  
Precautions  
By Branch Cuttings  
By Tissue Culture and Macroproliferation  
Tissue Culture of Bamboo  
Collection of the Bud Materials  
Sterilisation of Explants  
Preparation of Media  
Sub Culture  
Rooting and Outplanting  
Transplanting  
Production of Culms  
Macroproliferation  
Season of Planting  
Number Under Planting  
Method of Planting  
Guidelines for Management

## 11. GROWTH AND DEVELOPMENT

Growth of Seedlings

Development of Rhizome

Culm Growth and Development

Annual Recruitment of Culms

Culm Height and Diameter

Monthly Recruitment of Culm

Daily Height Growth

Pattern of Biomass Allocation in Growing Bambusa Bambos

## 12. BIOMASS AND YIELD

Biomass Production

Total Biomass

Below Ground and Above Ground Ratio

Biochemical Characteristics of Plantation Bamboo Leaf (Bambusa Bambos) With Reference to Organic Productivity

Economic Analysis

Bambusa Bambos

Dendrocalamus Strictus

Expenditure

Income

## 13. CYCLE AND FERTILIZER APPLICATION

Felling Cycle

Fertilizer Application

Three Elements (Nitrogen, Phosphorus and Potassium)

Amount of the Three Elements to be Applied

Effect of the Various Kind of Nitrogen Fertilizers

Other Elements (Silicate)

Season of Fertilizer Application

## 14. INTRODUCTION IN SOCIAL FORESTRY

Strip Plantation

Community Forestry/Programme

Degree of Local Participation

Local Institutions

Land Allocation

Procedure of Working

Requirements/Rule of Working

Resource Sharing

Monitoring of Works

Limitations

The Problem of Land Use Conflicts

Lack of Identity of Interests

Scope for Community Forestry

Agroforestry Plantation

Bamboo with Horticulture Crops

Rehabilitation of Degraded Forest

Afforestation

Reclamation of Wastelands

## 15. NEED FOR BAMBOO PLANTATION

Present State of Pulp and Paper Industries

Raw Material

Raw Material Status

Guidelines for Raising Bamboo Plantation

Preparation of Nursery and Planting

Transplantation  
Production of Culms  
Research Work on Selecting Bamboo Species for Paper-making  
Comparison of Pulp and Paper Making Characteristics of Plantation Bamboo with some Tree Species  
Establishment of a Bamboo Plantation by Paper Industry Bamboo

16. BAMBOO PLANTATION—PROBLEMS AND PROSPECTS

Cultivation Techniques  
Projection of Culms  
Problems of Cultivation  
Seed Collection  
Vegetative Propagation  
Soil Moisture Conservation  
Plant Protection  
Weeds  
Grazing and Fire  
Clump Congestion  
Socio-economic Constraints  
Prospects of Bamboo Cultivation  
Economic Analysis  
Employment Generation

17. UTILIZATION

Consumption Pattern of Bamboos in India  
Other Recent Uses  
Bamboo Parquet (Block Flooring)  
Laminated Bamboo  
Bamboo Strip for Air Craft  
Bamboo - Reinforced Concrete  
Artificially - Shaped Bamboo  
Bamboo, New Raw Material for Phytoserol

18. MASS PROPAGATION

Materials and Methods  
Results and Discussions

19. NON-LINEAR MODELS IN BAMBOO SEEDLINGS

Materials and Methods  
Results and Discussion  
Conclusion

20. PROPERTIES AND PRESERVATION

Natural Durability of Bamboo  
Preservative Treatment of Harvested Bamboos  
Prophylactic Treatment of Bamboos during Storage  
Drying or Curing and Seasoning

21. BAMBOO AND ITS USES

Bamboo Shoots  
Seeds  
Leaves  
Fruits  
Rhizomes  
Banslochan, Tabashir or Tabasheer  
Culms  
Working and Finishing Qualities of Bamboo  
Bamboos for Structural Use  
Pipe Water Supply System and Drainage

Bamboo Furniture  
Weaving Industry  
Bamboo Board  
Bamboo Reinforcement in Concrete  
Bamboo-reinforced Mud Walls  
Light Bamboo Wall  
Paper Pulp  
Rayon Pulp  
Bamboo as Fuel  
Bamboo as Charcoal  
Conservation of Soil  
Bamboo as a Saviour of Environment  
Phytoremediation of Polluted Environment  
A Renewable Resource for Agro-forestry Production  
Bamboos as Ornament  
Artificially Shaped Bamboo  
Bamboo for Alleviation of Poverty  
Women Empowerment  
Potential in India

## 22. BAMBOO CUISINE

Sungsi  
Sayur Rebung  
Garang Asam  
Gulai Manis Rebung  
Gulai Rebung Masam  
Gulai Rebung Teri Basah  
Beko

## 23. GROWTH YIELD AND ECONOMICS

Productivity  
Demand and Supply Position  
Market  
Price-Trend  
Employment Generation  
Economic Analysis  
Resource Survey  
Trade  
Socio-economics

## 24. BAMBOO PRODUCTS

Strength Properties and Other Parameters  
Characteristic Uses  
Seasoning of Bamboo  
Seasoning Behaviour of Round Bamboo  
Air Seasoning  
Kiln Seasoning  
Chemical Seasoning  
Shrinkage Behaviour of Round Bamboo  
Inter Section Point (I.S.P.)  
Electrical Resistance of Bamboo  
Preservation of Bamboo  
Preservative Treatment of Bamboos  
Methods of Treatment of Bamboos  
Treatment of Dry Bamboos  
Treatment of Green Bamboos

Performance of Treated Bamboos  
Specialised Technological Uses of Bamboo  
Building Boards from Bamboo  
Properties of the Boards  
Packaging Purpose Boxes  
Structural Applications of Bamboo  
Technology of Bamboo constructions and Erection Aspects  
Erection of Truss  
25. CHEMICAL ANALYSIS OF BAMBOO TISSUES  
Experimental  
26. OPTIMUM DIGESTION CONDITIONS FOR  
PRODUCTION OF STRONG BAMBOO PULPS  
—A PRELIMINARY STUDY  
Experimental Procedure  
Results  
Conclusion  
27. ANATOMICAL FEATURES OF BAMBOO USED  
FOR PAPER MANUFACTURE  
Growth of Bamboo Culm  
Structural Topography of Internode  
28. STUDIES ON COLOUR REVERSION OF BAMBOO  
PULP BLEACHED WITH C-E-H SEQUENCE  
Introduction  
Literature Review  
Experimental  
Set 1- Effect of Delignification  
Set 2 – Effect of Over and Underchlorination  
Set 3 – Effect of Alkali Charge in Alkali Extraction  
Set 4 – Effect of Temperature in Alkali Extraction  
Set 5 – Effect of Hypochlorite Charge in Hypo Stage  
Set 6- Effect of pH (Buffer) in Hypo Stage  
Set 7 – Effect of Temperature in Hypo Stage  
Observations and Discussion  
Conclusion  
29. EFFECT OF BEATING ON THE CELL MECHANICS  
OF THE INDIVIDUAL BAMBOO FIBRE  
Elementary Fibril  
Cell Wall Mechanics of Wood Fibres  
Cell Wall Structure  
Force Distribution Across the Cell Wall  
Internal Fibrillation  
External Fibrillation  
Bamboo Fibres  
30. STUDIES ON THE FINES OF BAMBOO PULP  
Experimental  
Fractionation of Pulp  
Isolation of Fines  
Chemical Composition of Fines & Coarse Fractions  
Evaluation of Whole Pulp and Fractionated Pulp in Valley Beater  
Evaluation of Recombined Pulps  
Discussion of Results  
Fractionation of Pulp  
Chemical Composition of Fines and Coarse Fibre Fractions

Influence of Fines on Some Pulp and Sheet Properties

Properties of Recombined Pulps

Conclusions

### 31. PULP AND PAPER MANUFACTURE

Chemistry and Morphology

Hemicelluloses

Fibre Morphology

Proximate Chemical Composition

Chemical Pulping

First Stage Digestion

Bleaching of Chemical Pulps

High Yield Pulping

Bleaching of High Yield Pulps

Rayon Grade Pulp

Fibre Morphology and Sheet Properties

Beating Characteristics

Decay on Storage and Its Effect on Pulp Properties

Industrial Experiences on Paper Making From Bamboo

### 32. PESTS OF BAMBOO

Seed Pests

Control

Nursery Pests

Termites

Control Measures

Plantation and Natural Stands of Bamboos

Culm and Shoot Borers

Defoliators

Witches Broom

Sap Suckers

Felled and Stored Bamboos

Termites

Protection Strategies

Protection of Bamboo Seeds

Nursery Pests

Plantations and Natural Stands

(a) Defoliators

(b) Sap Suckers

(c) Culm and Shoot Borers

Felled and Dried Bamboos

### 33. DISEASES AND DECAY OF BAMBOO

Microflora of Stored Bamboo Seeds

Nursery Diseases

Damping-off

Foliage Diseases

Witches' Broom

Diseases of Bamboo in Plantations and Natural Forests

Bamboo Blight

Rhizome Bud Rot

Rhizome Rot

Basal Culm Rot

Culm Rot

Culm Sheath Rot

Rhizome and Root Rot

Stem Infection

Foliage Infection

Decay in Bamboo

#### 34. ASSOCIATIONS AND INSTITUTIONS

The Forest Research Institute, Dehra Dun

The State Forest Research Institutes (SFRIs)

Support to Craft and Artisan Related Activities: Training, Extension and Marketing

Industry and Related Applications

Integrated Rural Bamboo (IRB) Project

Bamboo Information Centre (BIC-India)

American Bamboo Society

The Bamboo Society of Australia

European Bamboo Society

The International Bamboo Foundation & The Environmental Bamboo Foundation of Indonesia, Indonesia

International Bamboo Association (IBA) and the

International Network for Bamboo and Rattan (INBAR)

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
