## Disposable Products Manufacturing Handbook

(Plastic Cups, Cutlery, Paper Cups, Banana Leaf Plates, Facial Tissues, Wet Wipes, Toilet Paper Roll, Sanitary Napkins, Baby Diapers, Thermocol Products, PET Bottles)

Everyday life products manufacturers worldwide produce a multitude of items that are intended for one use only. A disposable is a product designed for a single use after which it is recycled or is disposed as solid waste. The term often implies cheapness and short-term convenience rather than medium to long-term durability. The term is also sometimes used for products that may last several months distinguish from similar products that last indefinitely.

The fast moving life and modernization simultaneously lead to the necessity of disposables in one's life. One cannot wash utensils all the time, neither can afford to arrange fine and good cutlery of glass or steel in a party for the guest. At such times, people rush for the disposables available in the market with variety of colors and designs.

For a manufacturer, to produce disposables is a good deal keeping in view the present demand and growth in the market. This handbook is a complete well to do package for a layman to understand the basic steps to be followed for setting up a plant for a particular disposable product. The book contains raw material details, product manufacturing process, machinery details, images with raw material and machinery suppliers.

The Disposable Products Manufacturing Handbook is about producing Plastic Cups, Cutlery, Paper Cups, Banana Leaf Plates, Facial tissues, Wet Wipes, Toilet Paper Roll, Sanitary Napkins, Baby Diapers, Thermocol Products, PET Bottles that are used by masses in their day to day life. This well-established text provides a comprehensive coverage of the manufacturing processes adopted to manufacture various disposable products. It gives a holistic view of products produced, which has inputs from diverse fields. The book discusses the importance and objectives of processes and material used for the production of disposable products. Many examples have been provided to illustrate the concepts discussed.

## Contents

## 1. INTRODUCTION

- Plastic
- Polypropylene
- Polystyrene (PS)
- Different Types of Disposable Products in Market
- Pet Bottles
- Thermocol & Its Products
- Paper Cup
- Plastic Cutlery
- Facial Tissue, Wet Wipes and Toilet Rolls
- Plastic Cups
- Disposable Banana Leaf Plates
- Baby Diaper and Sanitary Napkin
- Diaper
- Sanitary Napkin

## 2. PLASTICS

- Introduction
- Composition
- Additives
- Classification
- Thermoplastics & Thermosetting Polymers
- Other Classifications
- Biodegradability
- Natural vs. Synthetic
- Crystalline vs. Amorphous
- Properties of Plastics
- Toxicity
- Plastics & Their Uses

## 3. THERMOPLASTIC

- Stress Strain Graph of Thermoplastic Material
- Acrylic
- Nylon
- Polyethylene
- Polypropylene
- Polystyrene
- Polyvinyl Chloride
- Teflon
- Properties of Various Thermoplastic Products

## 4. THERMOSETTING PLASTIC

- Process
- Properties and Their Uses
- Examples

## 5. POLYETHYLENE

- Structure of Polyethylene
- Process

- Monomer
- Polymerization
- Production of Polyethylene
  - From Naphtha
  - As a Gas
- Properties
  - Physical Properties
  - Chemical Properties
- Classification
- LDPE
  - Properties
  - Chemical Resistance
  - LDPE Quick Facts
  - Production of LDPE
  - Applications
- LLDPE
  - Production and Properties
  - Processing
  - Properties
    - Physical Properties
  - Application
- HDPE
  - Properties
    - Physical Properties
    - Chemical Properties
  - HDPE Resistance
  - HDPE Quick Facts
  - Production of HDPE
  - Applications
  - Properties Comparison Chart for LDPE and HDPE
  - Processing Polyethylene into Products
    - The Making of Molded Products
    - The Making of Foil
    - The Making of Multi-Layer Foil
    - The Making of Sheets
    - The Making of Foam Applications for Insulation
- Additions
- Joining

## 6. POLYETHYLENE TEREPHTHALATE (PET OR PETE)

- Production
  - Dimethyl Terephthalate Process
    - First Step
    - Second Step
  - Terephthalic Acid Process
- General Process Involved in the Manufacturing of PET
- Properties
  - General Properties
  - Application
- Sustainable
- Polyethylene Terephthalate Films
- Intrinsic Viscosity

- A PET soft drink bottle
- Fiber Grade
- Film Grade
- Bottle Grade
- Monofilament, Engineering Plastic
- Property Chart for PET
- Drying of PET
- Copolymers
- Degradation
- Acetaldehyde
- Antimony
- Safety
- Bottle Processing Equipment

## 7. POLYPROPYLENE

- Chemical and Physical Properties
- Polypropylene Resistance
- Polypropylene Quick Facts
- Polypropylene Fabrication
- Degradation
- Synthesis
- Industrial Processes
- Manufacturing
- Properties & Applications
- A Common Application for Polypropylene is as Bi-Axially Oriented Polypropylene (BOPP)
- Other Useful Properties
- PP Structure
- PP Parameters
- Basic Types of PP
- Crystallinity
- Presence of Selected Additives during Polymerization
- Antioxidants and Stabilizers
- Nucleants and Clarifiers
- Antistatic Agents
- Chemical Resistance
- Stress Cracking Resistance
- Permeability
- Organoleptics
- Notch Effects

## 8. POLYSTYRENE

- Structure
- Polymerization
- Atactic Polystyrene
- Syndiotactic Polystyrene
- Properties of Polystyrene
- Properties of Polystyrene
- Physical Properties
- Mechanical Properties
- Optical Properties
- Thermal Properties

- Electrical Properties
- Chemical Properties
- Uses
  - Strength, Durability, Comfort, Safety
- Applications of PS
- Packaging
- Appliances
- Consumer Electronics
- Construction
- Medical
- Other
- Degradation
  - Biodegradation
  - Incineration
- Forms Produced
  - Sheet or Molded Polystyrene
  - Disposable Polystyrene Razor
  - Foams
    - Expanded Polystyrene
    - Extruded Polystyrene Foam
    - Fused Cell Expanded Polystyrene Foam
- Copolymers
- Oriented Polystyrene

## 9. INJECTION MOULDING

- Process Characteristics
- Advantages of Injection Molding
- Disadvantages of Injection Molding
- Applications
- Examples of Polymers Best Suited for the Process
- Equipment
- Mold
  - Injection Molding Die with Side Pulls
  - Mold Design
  - Mold Storage
  - Tool Materials
  - Machining
  - Cost
- Injection Process
  - What is Injection Molding Cycle?
  - Different Types of Injection Molding Processes
  - Process Cycle
  - Equipment
    - Injection Unit
    - Clamping Unit
  - Machine Specifications
  - Tooling
    - Mold Base
    - Mold Channels
    - Mold Design
  - Materials
  - Tolerances and Surfaces

- Power Requirements
- Molding Defects
- Silver Streaks
- Short Shot
- Jetting
- Flow Marks
- Color Streaks
- Weld Lines
- Flash
- Delamination
- Stringiness
- Sink Marks
- Warping or Twisting

## 10. EXTRUSION MOULDING

- Types of Extrusion
- Plastic Extrusion
- Single Screw Extrusion Machinery
- Extrusion Dies
- Screw Design
- Cooling and Sizing Equipment
- Pros and Cons of Extrusion Molding
- Pros
- Cons
- Defects

## 11. COMPRESSION MOULDING

- Process Definition
- Process Characteristics
- Process Schematic
- Pros & Cons of Compression Moulding
- Pros
- Cons

## 12. BLOW MOLDING

- Typologies of Blow Molding
- Extrusion Blow Molding
- Continuous Extrusion Equipment
- Intermittent Extrusion Machinery
- Advantages of Blow Molding
- Disadvantages of Blow Molding
- Spin Trimming
- Injection Blow Molding
- Disadvantages
- Injection Stretch Blow Molding Process
- Advantages
- Disadvantages
- Process Explanation
- Advantages
- Disadvantages

1. PS Foam Sheet Extrusion Line

## Components

- A. Mixer
- B. Automatic Feeding System (Automatic Self-control System)
- C. 1st Extruder
- High pressure Butane Pump
- D. 2nd Extruder
- E. Cooling System
- F. Hauling-off System
- G. Winding Device

## 2. Automatic Vacuum Forming Machine

### Components

- 3. Double Worktables Hydraulic Cutting off Machine (PLC controlling)
- 4. Crusher
- 5. Recycling System

### For EPS Glass & Cups

- A. Material expander: (1 set)
- B. Dryer: 1set
- C. Crusher: 1set
- D. Central System of Sending Material: 1set
- E. Foaming Machine: 4 sets
- F. Other Assistant Equipments
- 1. Water Tank (10m<sup>3</sup>): 2
- 2. Cooling Water Tower
- 3. Centrifuge
- 4. Air Compressor

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
