Handbook on Coal, Coke, Cotton, Lignin, Hemicellulose, Wood, Wood-Polymer Composites, Lignocellulosic-Plastic Composites from Recycled Materials, Wood Fiber, Rosin and Rosin Derivatives

Author: Dr. Himadri Panda Format: Paperback ISBN: 9789381039861 Code: NI312 Pages: 512 Price: Rs. 1,875.00 US\$ 50.67 Publisher: NIIR PROJECT CONSULTANCY SERVICES Usually ships within 5 days

Handbook on Coal, Coke, Cotton, Lignin, Hemicellulose, Wood, Wood-Polymer Composites, Lignocellulosic-Plastic Composites from Recycled Materials, Wood Fiber, Rosin and Rosin Derivatives (Also Known as Handbook on Coal, Lignin, Wood and Rosin Processing)

Coal is the product of plants, mainly trees that died tens or hundreds of millions of years ago. Coal is a fossil fuel and is the altered remains of prehistoric vegetation that originally accumulated in swamps and peat bogs. The energy we get from coal today comes from the energy that plants absorbed from the sun millions of years ago. Coal is used primarily as an energy source, either for heat or electricity. It was once heavily used to heat homes and power locomotives and factories. Bituminous coal is also used to produce coke for making steel and other industrial process heating. Lignin is a constituent of the cell walls of almost all dry land plant cell walls. It is the second most abundant natural polymer in the world, surpassed only by cellulose. Lignin is found in all vascular plants, mostly between the cells, but also within the cells, and in the cell walls.

Wood is an aggregate of cells essentially cellulose in composition, which are cemented together by a substance called lignin. The cells are made of three substances called cellulose (about 50 percent), lignin (which makes up a fifth to a quarter of hardwoods but a quarter to a third of softwoods), and hemicellulose. Rosin refers to an extraction process that utilizes a combination of heat and pressure to nearly instantaneously squeeze resinous sap from your initial starting material

In India's energy sector, coal accounts for the majority of primary commercial energy supply. With the economy poised to grow at the rate of 8-10% per annum, energy requirements will also rise at a reasonable level. The Indian coal industry aspires to reach the 1.5 billion tonne (BT) mark by FY 2020. In fore-coming years, the industry will naturally need to focus on building on the success, and be on track for reaching the FY 2020 goal. One of the primary goals of the Government of India is to ensure that it is able to meet the country's power generation needs. Another aim is to lower the country's reliance on coal imports by boosting the coal production quickly.

The Major contents of the book are Coal, Analysis of Coal and Coke, Cotton, Lignin and Hemicelluloses, Degradation of Wood, CCA-Treated Wood, Wood-Polymer Composites, Lignocellulosic-Plastic Composites from Recycled Materials, Chemical Modification of Wood Fiber, Delignification of Wood with Pernitric Acid, Rosin and Rosin Derivatives, Polymerizable Half Esters of Rosin and Photographs of Plant & Machinery with Supplier's Contact Details.

It will be a standard reference book for professionals, entrepreneurs, those studying and researching in this important area and others interested in the field of these industries.

Contents

Chapter 1
Coal
Ethylene
Fischer – Tropsch Synthesis for Olefins
Direct Conversion of Synthesis Gas to Ethylene
Ethanol from Synthesis Gas
Olefins from Methanol
Methanol Homologation
Methanol to Acetic Acid
Ethylene Glycol
Acetic Anhydride
Vinyl Acetate
Other Chemicals
Coal Pyrolysis Processes
Acetylene
Production of Chemicals by Coal Liquefaction Processes
Conclusion

Chapter 2

Analysis of Coal and Coke

Methods of Analysis

Sampling

Determination of Constitution and Physical Properties

Functional Group Analysis

Spectroscopy

Determination of Optical Constants

Electron Microscopy

Density

X-Ray Diffraction

Specification Tests

Proximate Analysis

Ultimate Analysis

Calorific Value

Fusibility of Coal Ash

Behaviour on Healing

Equilibrium Moisture of Coal at 96-97%

Relative Humidity and 39oC

Determination of Harcbgrobve Grindability

Index of Coal

Special Constituents

Coal Classification

Chapter 3

Cotton

Methods of Analysis

Modified Cottons

Finishing Agents

Separation and Identification

Spectroscopic Methods

Inorganic Constituents

Chemical Methods

Spectroscopic Methods

Chapter 4

Lignin and Hemicellulose

Hemicellulose

Assay systems

Classification

Thermophilic Hemicellulases

Alkaline active xylanases

ß - Xylosidase

Mannanases and galactanses

Accessory enzymes for Hemicellulose utilization

Lignin

Lignin-degrading enzymes

Lignin degradation in whole cell cultures

Degradation by cell-free enzyme systems

Role of glycosides in Lignin degradation

Lignin-carbohydrate complexes

Fractionation of Lignin and Carbohydrate in wood

Isolation of LCCs

Chemical characteristics of LC bonds

Ferulic and p-coimaric ester side chains Frequency and stability of LC bonds Residual lignin in kraft pulp Biodegradation of LCCs Residual LC structures after exhaustiveenzymatic digestion Solubitization of LCC by microbial activity Enzymatic treatments of pulps Conclusion Chapter 5 Degradation of Wood Introduction **Gross Chemical Composition Distribution of Wall Components Component Chemistries** Microstructure and Porosity Degradation of whole wood Biodegradation of Lignin Biodegradation of Cellulose Biodegradation of Hemicellulose Applications Conclusion Chapter 6 **Cca-Treated Wood** Introduction

Materials and methods

Results and Discussion

Conclusion

Chapter 7

Wood-Polymer Composites

Introduction

Materials and Methods

Monomers

Wood specimens

Treatment of specimens with monomers

Volumetric swelling and moisture content

Result

Swelling of wood soaked in monomers

Polymer loading

Volumetric swelling of WPC specimens

Moisture content of WPC specimens

Conclusions

Chapter 8

Lignocellulosic-Plastic Composites from Recycled Materials

Municipal Solid Waste as a Source of Lignocellulosic Fibre and Plastics

Thermoformable composites as Outlets for Waste Paper, Wood and Plastics

Recent Research on Wood Fiber-Thermoplastic Composites

Research and Development Needs

Concluding Remarks

Chapter 9

Chemical Modification of Wood Fiber	
Introduction	
Experimental Procedure	
Esterification Procedure	
Analyses of Esterification Products	
Board Formation	
Board Testing	
Moisture sorption	
Rate and extent of swelling	
Results and Discussion	
Esterification of Wood Fiber	
Moisture Sorption of Esterified Fiberboards	
Rate and Extent of Swelling of Fiberboards in Liquid Water	
Plasticization of Esterified Fibers	
Conclusions	
Chapter 10	
Delignification of Wood with Pernitric Acid	
Generation of pernitric acid	

- Decomposition of pernitric acid
- Delignification of aspen wood
- Conclusions
- Experimental

Chapter 11

Rosin and Rosin Derivatives

- Composition
- Reaction and derivatives
- Isomerization
- Maleation
- Oxidation
- Photosensitized oxidation
- Hydrogenation
- Hydrogenless Hydrogenation
- Polymers of vinylesters of hydrogenated rosin
- Prehydrogenation
- Hydrocracking of Rosin
- Dehydrogenation
- Polymerisation
- Analysis
- Compatibility
- Solubility
- Instrumental analysis
- Gas chromatography analysis
- Infrared Spectroscope
- Nuclear magnetic resonance
- Ultraviolet spectroscopy
- X-Ray Analysis
- Mass Spectroscopy
- Phenolic modification
- Salt formation
- With metals

With unsaturated cyclic and acyclic hydrocarbons Example-2 Rosin-isoprene condensate (Example-3) Rosin-isobutene condensate (Example-4) Example -5 Rosin-styrene condensalt (Example-6) Rosin-cyclopentadiene condensate (Example-7) Rosin-coumarone-indene condensate (Example-8) Rosin-divynylbenzene condensate (Example-9) Example-10 Esterification With Glycerol With pentaerythritol and other polyhydric alcohols With monoydric alcohols Hydrogenolysis Polyesterification Copolyesters Ammonolysis Preparations Dehydroabietylamine acetate Dehydroabietylamine **Typical Uses** Asphalt additives Chemical Intermediates **Corrosion Inhibitors** Flotation Reagents

Preservatives

- Resolving agent
- Chemical and physical properties of Amine D acetate
- Stability to heat and storage
- Stability to heat and storage
- Surface Activity
- **Chemical Reactivity**
- Chemical and Physical Properties of
- Amine D acetate
- Solubility
- Note
- Stability to Heat and Storage
- Stability to Air and Sunlight
- Surface Activity
- Styrenation
- Decarbxylation
- Hydroxymethylation and hydroxylation
- Methods of preparations
- Nitrogenous intermediates
- Methyl levopimarate (i)
- Methyl neoabietate (ii)
- Methyl photolevopimarate (iii)
- Reaction of SSI with Methyl levomarate (i)
- Reaction of Chlorosulphonyl isocyanate with methyl neoabietate (ii)
- Reaction of Chlorosulphonyl isocyanate with methyl photolevopimarate (iii)
- Fumaroniprile Adduct of levopimaric acid

Tetracyanoethylene Adduct of levopimaric acid

Acrylonitrile adducts of levopimaric acid

Polyoxyalkylation

Chapter 12

The Polymerizable Half Esters of Rosin

Expermental

Preparation and properties of monomers

Maleic rosin esters with reactive groups

Polymerization & Copolymerization

Aqueous Polymerization

Suspension Polymerization

Secondary reactions and graft copolymers

Reaction Involving Crosslinking

Applications

Coatings

Inks

Textiles

Conclusions

Chapter 13

Photographs of Plant & Machinery with Supplier's

Contact Details

About NIIR

NIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

NIR PROJECT CONSULTANCY SERVICES , 106-E, Kamla Nagar, New Delhi-110007, India. Email: npcs.india@gmail.com Website: NIIR.org
