

# **The Complete Book on Resins (Alkyd, Amino, Phenolic, Polyurethane, Epoxy, Silicone, Acrylic), Paints, Varnishes, Pigments & Additives (Surface Coating Products with Formulae)**

**Author:** Dr. Himadri Panda

**Format:** Paperback

**ISBN:** 9788195370191

**Code:** NI343

**Pages:** 632

**Price:** Rs. 2,275.00    **US\$** 61.00

**Publisher:** Asia Pacific Business Press Inc.

Usually ships within **5** days

Resins are synthetic or natural substances that act as binders in paints and varnishes. They provide adhesion, durability, and flexibility to the finish. Common types of resins Alkyd, Amino, Phenolic, Polyurethane, Epoxy, Silicone and Acrylic. Each resin has its unique characteristics, such as fast drying time, high gloss, or resistance to chemicals.

Paints consist of pigments suspended in a binder, which can be a resin or oil. Pigments are finely ground particles that give paint its color. They can be organic or inorganic and come in a vast array of shades. The type and quality of pigments used can greatly affect the appearance and longevity of the finish. Different types of paints include acrylic, oil-based, water-based, and specialty paints like metallic or chalk paint.

Varnishes are transparent or translucent finishes applied over painted surfaces to protect and enhance the underlying colors. They provide a glossy, satin, or matte sheen and offer protection against UV rays, moisture, and abrasion. Varnishes can be solvent-based or water-based and are available in various formulations for different purposes.

Additives are substances added to paints, varnishes, or pigments to alter their properties. They can improve flow and leveling, prevent sagging or foaming, or enhance drying time and durability. Additives are often used in specific applications such as automotive coatings, industrial finishes, or decorative paints.

Surface coating products encompass a wide range of materials that are used to protect and enhance surfaces. These products go beyond just paints and varnishes and include coatings specifically designed for different applications and industries.

The global resin market is expected to grow at a CAGR of 6.4%. The growing demand for epoxy resin in the paints and coatings industry is driving the market. In addition, demand is likely to be driven by the growing use of epoxy in the electronics and electrical industries as an insulator and to protect components from dust, short-circuiting, and moisture. Resins offer excellent adhesion, durability, and flexibility, making them an essential component in creating beautiful and long-lasting finishes for a wide range of surfaces. The market for resins is driven by various factors, including the growing construction industry, the increasing use of coatings in automotive and aerospace sectors, and the rising demand for eco-friendly and sustainable products. Manufacturers are constantly developing new resin formulations to meet these evolving needs and regulations. In addition to traditional applications, such as architectural coatings and industrial finishes, resins are finding new markets in the growing sectors of 3D printing and advanced materials. These emerging applications present exciting opportunities for resin manufacturers to expand their product offerings and cater to evolving customer needs.

The book covers a variety of topics related to Oleoresinous Media, Varnishes, Alkyd Resin, Polyesters, Amino Resins, Phenolic Resins, Polyurethane Resins, Epoxy Resins, Water Dispersible Epoxy Coatings, Silicone Resins, Acrylic Solution Resins, Emulsion Polymerization, Emulsion Polymers, Water-Reducible Resins, Water-Soluble Polymers, Solvents, Inorganic Pigments, Titanium Dioxide Pigments, Organic Pigments, Extender Pigments, Paint Driers, Paint Additives, Architectural Paints. This book is primarily intended for entrepreneurs and startups, but it is also a priceless tool for academics, consultants, financiers, and the Resins industry. Because of its all-encompassing perspective, it may serve a wide range of readers, all of whom have an interest in the Resin industry's continued success.

## Contents

### Contents

#### 1. THE PAST, PRESENT AND FUTURE OF THE SURFACE COATINGS INDUSTRY

#### 2. OLEORESINOUS MEDIA

Industry Terminology

Raw Materials Used in Oleoresinous Production

Finished Products Based on Oleoresinous Media

Manufacturing Equipment

Process Control Testing

#### 3. VARNISHES: COMPOSITION, MANUFACTURE AND USE

Composition

Oils Used in varnishes

Gasproofing

Water and Alkali Resistance

Manufacture of Oleoresinous Varnishes

Varnishes Vs. Alkyds

#### 4. ALKYD RESIN TECHNOLOGY

Raw Materials

Formulation of Alkyd Resins

Calculation of Alkyd Formulations

Calculation of Raw Materials for an Alkyd Prepared by the Monoglyceride Process

Typical Formulations (all quantities by mass)

#### 5. MANUFACTURE OF ALKYD RESINS

Alcoholysis

Catalysts

Control of Alcoholysis

Fatty and Process

Comparison of Fusion and Azeotrope Processes

Raw Materials Handling

Alkyd Manufacturing Plant

#### 6. POLYESTERS

Main Components of Unsaturated Polyesters

Functions of Initiators, Accelerators, Inhibitors

Effect of Structure on Properties of Cured Products

Polyester Coating Compositions

#### 7. APPLICATIONS OF ALKYD RESINS

Very Long Oil Alkyds: 75 per cent and above

Long Oil Alkyds: 60 to 75 per cent

#### 8 AMINO RESINS

Formation of Amino Resins

Urea Formaldehyde Resins  
Melamine Formaldehyde Resins  
Uses of Amino Resins  
Water Based Coatings  
9. PHENOLIC RESINS  
Phenol-Formaldehyde Reactions  
Oil Soluble 100 per cent Phenolic Resins  
Baking Phenolics  
10. POLYURETHANE RESINS  
Tolylene Diisocyanate (TDI)  
4, 4 Diphenylmethane Diisocyanate (MDI)  
Other Diisocyanates Used in Coating Systems  
Hydroxy Component  
Hazards of Isocyanates  
Classification of Polyurethanes  
Moisture-cured Urethanes  
Blocked Isocyanate Systems  
Two-component Catalyst-cure Polyurethanes  
11. EPOXY RESINS  
Epoxide Group Content (ECG)  
Curing Agents for Epoxy Resins  
Principles in Formulating with Epoxy Resins  
Solvent-based Coatings  
Single-pack Thermoplastic Epoxy Systems  
12. WATER DISPERSIBLE EPOXY COATINGS  
Epoxy/Polyamide Emulsions  
Water-dispersible Epoxy Resin Coatings for Electrodeposition  
13. SILICONE RESINS  
Preparation of Silicones  
Polymerization  
Methyl-and Phenyl-content  
Blending Resins  
Preparation and Formulation of Silicone-Resin based Coatings  
Application Guides  
Applying the Coating  
14. ACRYLIC SOLUTION RESINS  
Backbone Monomers  
Addition Polymerization  
Copolymerization  
Thermoplastic Acrylics  
Thermosetting Acrylics  
Acid Copolymers  
15. EMULSION POLYMERIZATION THEORY  
Polymerization in Emulsion Systems  
16. EMULSION POLYMERS: MANUFACTURE AND TESTING  
Process Variables  
Delayed Addition Process  
Alternative Processes  
Surfactant Addition Techniques  
Agitation  
Surfactant Addition Techniques  
Emulsion Testing  
Ultracentrifugation

## 17. APPLICATIONS OF EMULSION POLYMERS

Architectural Applications

Examples of Decorative Paints

Industrial Applications

Adhesives Industry

Pressure Sensitive Uses

## 18. WATER-REDUCIBLE RESINS

Water-soluble Polymers

Acrylic-modified Water-soluble Alkyds

Silicone-modified Alkyds and Polyesters

Keeping the Epoxide Ring Available for Subsequent Cross-linking

Thermoplastic Polymers

Thermosetting Polymers

Melamine Formaldehydes

Other Water-soluble Polymers

Variation of Amine Levels

Drying Properties

Coupling Efficiency

Driers for Air Dry and Force Dry Systems

Cross-linking of Water-soluble Coatings

Trouble Shooting with Water-Soluble Polymers

## 19. WATER-SOLUBLE POLYMERS

Cellulose and its Derivatives

Flow Characteristics of Water Soluble Polymer Solutions

Thixotropy

Rheology

## 20. SOLVENTS

Evaporation Rate

Liquid/Liquid Boiling Equilibrium

Applications Technology

Evaporation from Polymer Film

Chemical Solvents

Nitrocellulose and Other Lacquers

Latex Paints

Solvent Control

Gas Chromatography

## 21. INORGANIC PIGMENTS

The Functions of a Pigment

Properties of Pigments

The Classification of Pigments

Properties of Inorganic Pigments

Lead Chromate

Chrome Oxide Pigments

Zinc Oxide

Zinc Sulfide Lithopone

Calcium Plumbate

Mixed Phase Pigments

## 22. TITANIUM DIOXIDE PIGMENTS

The Chloride Process

Applications of Titanium Pigments

Dispersion of Titanium Pigments

Gloss Development

## 23. ORGANIC PIGMENTS

Colour and Chemical Constitution

Azo-Condensation Pigments

Pigment Conditioning

Dyestuffs

Colour Index Classification

## 24. EXTENDER PIGMENTS

Particle Size and Shape

Particle Size Distribution

Types of Extender Pigment

China Clay (Kaolin)

## 25. PAINT DRIERS

Drier Recommendations

Stability of Drying Performance on Storage

Driers for Use in Water based Systems

## 26. PAINT ADDITIVES

Wetting and Dispersing Agents

Aluminium Soaps

Hydrogenated Castor Oil (Triglyceride of 12-hydroxy Stearic Acid)

Anti-skinning Agents

Anti-flood and Anti-float Additives

Recognizing Flooding and Floating

Identification of Mildew

Latex Paint Additives

Stabilizing Surfactants (Non-ionics)

Latex Thickening Agents

Coalescing Aids

## 27. MANUFACTURE OF PAINTS

## 28. ARCHITECTURAL PAINTS

Formulating Exterior Paints for Wood

Interior Paints for Plaster and Wallboard

Exterior Emulsion Paints for Masonry

Exterior Solution Type Paints for Masonry

Interior and Exterior Enamels

Enamels for Wood and Concrete Floors

## 29. INSIDE IMAGES OF A PAINT FACTORY

## 30. PHOTOGRAPHS OF PLANT & MACHINERY WITH SUPPLIER'S CONTACT DETAILS

# About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study,

Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
