"Asia-Pacific Cybersecurity Market

With increased internet penetration, cyberattacks are becoming more powerful, allowing hacker's greater access to new technology. One such example is the production a malware called 'Flame'. Asia-Pacific cybersecurity market is anticipated to grow at an overall compound annual growth rate (CAGR) of 15% and will be worth of USD 46.09 Bn by 2023. The improved accuracy and frequency of cyber threats across different parts of the Asia-Pacific region is one of the predominant factors that is anticipated to drive the demand of various cybersecurity solutions.

Increase in cloud services, for social media and mobile devices, has made traditional security systems obsolete. Digital identity has become the crucial access to control mechanism. Hence, it enforces the adoption of cybersecurity solutions among Enterprises.

By countries, the Asia-Pacific cybersecurity market is divided into China, Japan, India and the rest of APAC. Japan is one of the largest markets in the Asia-Pacific region. This is because the country had already mandated uniform cybersecurity standards for government organizations in 2014, to prevent unauthorized access and activity. The Japanese government is working on a number of policies and awareness initiatives to improve the cyber rating of the country. On the other hand, China has allowed massive internet penetration in the past few years, this region makes the maximum use of digitized platforms to ease payments and other services. And is hence expected to face severe cyberattack. Thus, the China cybersecurity market is expected to grow at high pace.

By end use industries, Asia-Pacific's cybersecurity solution are classified into financial services, telecommunication, healthcare, public sector, and others. The Financial sector is expected to dominate the market because this sector is heavily targeted by cyber threats. In 2016, Japan witnessed a massive cyber-attack- around 14000 ATMs were attacked and the banking sector had to face huge cybercrime costs.

Key growth factors:

- o The prime factor that is propelling the cybersecurity market in the Asia-Pacific region is the huge risk associated with cyberattacks. APAC had already faced a loss of USD 81 Bn in 2016.
- o It is reported that more than 80% of organizations in the region are targeted owing to rising digitization, hence, increase in the severity of attacks is likely to propel the market.

Threats and key players:

- o The factors that hinder cybersecurity are lack of sufficient budget, lack of management support, shortage of resource. It is also reported that about 75% of the Asian population lacks a proper understanding of cybersecurity

- o APAC countries facing data breaches shows growing concerns about company reputations, profit downtime, etc.
- o The key players in this markets area Cisco System, IBM Corporation, check point Software, Palo Alto Network Inc., Symantec, and Trend Micro Inc.

What's covered in the report?

- o Overview of the Asia-Pacific cybersecurity market
- o The current and forecasted market size data for the Asia-Pacific cybersecurity market
- o The current and forecasted market size data for the segments of the market, by end users industries - financial services, telecommunication, healthcare, public sector, and others
- o The current and forecasted market size data for the segments of the market, by solution- identity and access management, encryption, governance regulation and compliance, unified threat management, and security information and event management
- o Market trends in the Asia-Pacific cybersecurity market
- o Market drivers and challenges in the Asia-Pacific cybersecurity market
- o Current and forecasted countries - Japan, China, India, and rest of APAC market size data for the Asia-Pacific cybersecurity market.
- o Analysis of company profiles of the major players operating in the market

Why buy?

- o Get a broad understanding of the Asia-Pacific cybersecurity market and its segments - By region, by solution, and by end-user industries
- o Get region-specific drivers and challenges affecting the Asia-Pacific cybersecurity market?
- o Recognize significant competitors' business and market dynamics, and respond accordingly

Contents

"Chapter 1: Executive summary

- 1.1. Market scope and segmentation
- 1.2. Key questions answered in this study
- 1.3. Executive summary

Chapter 2: Asia-Pacific cybersecurity market

- 2.1. Market overview- Key observations, global historical (2016-2017) and forecasted (2018-2023) market size (USD bn)
- 2.2. Market drivers
- 2.3. Market trends

Chapter 3: Asia-Pacific cybersecurity market - by industries (financial services, telecommunication, healthcare, public sector, and others)

- 3.1. Market size
- 3.2. Market overview- drivers, trend, and challenges

Chapter 4: Asia-Pacific cybersecurity market - by solution

- 4.1. Identity and Access management- Historical (2016-2017) and forecasted (2018-2023) market size (USD

Bn), key observations

4.2. Encryption- Historical (2016-2017) and forecasted (2018-2023) market size (USD Bn), key observations

4.3. Governance Regulation and Compliance- Historical (2016-2017) and forecasted (2018-2023) market size (USD Bn), key observations

4.4. Unified Threat Management- Historical (2016-2017) and forecasted (2018-2023) market size (USD Bn), key observations

4.5. Security information and event management- Historical (2016-2017) and forecasted (2018-2023) market size (USD Bn), key observations

Chapter 5: Asia-Pacific cybersecurity market- by countries

5.1. Japan cybersecurity market- Historical (2016-2017) and forecasted (2018-2023) market size (USD Bn), drivers, trends and challenges

5.2. China cybersecurity market- Historical (2016-2017) and forecasted (2018-2023) market size (USD Bn), drivers, trends and challenges

5.3. India cybersecurity market- Historical (2016-2017) and forecasted (2018-2023) market size (USD Bn), drivers, trends and challenges

5.4. Rest of APAC cybersecurity market- Historical (2016-2017) and forecasted (2018-2023) market size (USD Bn), drivers, trends and challenges

Chapter 6: Company profiles

6.1. IBM Corporation (*)

- Company snapshot

- Product/services

- Global presence

- Other major initiatives/highlights

- Key numbers

- Growth strategy

6.2. Cisco System

6.3. Symantec Corporation

6.4. Check point Software

6.5. Palo Alto Network Inc.

6.6. Trend Micro Inc.

(*) all the information are similar for the mentioned companies

Chapter 7: Conclusion

7.1. Conclusion

Appendix

1. List of Tables

2. Research Methodology

3. Assumptions

4. About Netscribes Inc.

Disclaimer: The Table of Contents (ToC) provided above contains the targeted coverage. The coverage is subject to change as we progress with the research.

COMPANIES COVERED

o IBM Corporation

o Cisco System

o Symantec Corporation

o Check point Software

o Palo Alto Network Inc.

o Trend Micro Inc.

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.
