The Complete Technology Book on Vermiculture and Vermicompost

Author: NPCS Board of Consultants and Engineers
Format: Paperback
ISBN: 9788178331362
Code: NI116
Pages: 368
Price: Rs. 750.00 **US$** 100.00
Publisher: Asia Pacific Business Press Inc.
Usually ships within **5** days

The production of degradable organic waste and its safe disposal have become the current global problem. The rejuvenation of degraded soils by protecting topsoil and sustainability of productive soils is a major concern at the international level. Vermicomposting is compatible process with sound environmental principles that value conservation of resources and sustainable practices. Vermicompost is known to be the world best organic fertilizer. Vermiculture is for vermicompost. Vermiculture means artificial rearing or cultivation of worms (Earthworms) and the technology is the scientific process of using them for the betterment of human beings. Vermiculture technology has improved the crop productivity by increasing soil fertility through ecological methods of farming. Vermiculture has been embraced throughout the world right from the developed countries to the developing countries. Vermicomposting is a panacea for solid waste management. It is a simple kindred process of composting, in which certain species of microorganism such as earthworms are used to enhance the process of waste conversion and produce a better end product. Earthworms serve as nature plowman to facilitate these functions. They form gift of nature to produce good humus, which is the most precious material to fulfill the nutritional needs of crops. The utilization of vermicompost results in several benefits to farmers, industries, environment and overall national economy. This contains experiments from the field, vermicomposting materials, earthworm life cycle, ecological types earthworms, role of earthworms, vermicomposting, advantages of vermiculture, vermitechnology.
This book majorly deals with advantages of vermicomposting, vermicomposting in daily life vermiculture v/s vermicomposting, earthworms: ecological types, physical and chemical effects of earthworms on soils, fertilizers use and deterioration of soil environment, vermicomposting materials, feeding vermicomposting materials, ideal conditions for life of earthworms, earthworms : their application in organic agriculture, maintenance of vermicomposting beds, vermicomposting : general procedures at agricultural farms vermicomposting : kiss plan, vermicomposting: a world scenario, soil fertility and texture, advantages of vermiculture, small scale or indoor vermicomposting, large scale or outdoor vermicomposting etc.
This book is an invaluable resource for readers, entrepreneurs, scientists, farmers, existing industries, technical institution, etc.

Contents

Progress of worm industry
Turning Garbage into Money
Chemical composition of the Vermicompost
Vermicomposting at Home
Vermicomposting on the Farm
The Business of Worms
Interaction of Vermicompost-Earthworm-Mulch-Plantroot (Vemp)
Earthworm Farming is not hard

2. EARTHWORMS : ECOLOGICAL TYPES
Trophic Classification of Earthworms
Drilosphere
Physical effects of Earthworms on soils
Chemical effects of Earthworms on soils
The effect of absence of Earthworms in soils

3. PHYLUM ANNELIDA : EARTHWORM
Earthworms
Economic Importance
Pheretima Poshuma
The Body Wall
Locomotion
The Coelom
The Digestive System
Food and Digestion
Respiration
Excretory Organs
Physiology of Excretion
Chloragogen Cells
Vascular System
The nervous system
Working of the Nervous system
Receptor Organs
Generative Organs
Copulation
Fertilization and Coccon Formation
Classification

4. EARTHWORMS : LIFE CYCLE
Life cycle studies
Life cycle patterns
Life cycle-Lampito mauritii
Cocoons
Juveniles
Non-clitellates
Clitellates
Life Cycle-Perionyx excavatus
Cocoons
Juveniles
Non-clitellates
Clitellates
Doubling Time
Biochemical changes during growth

5. EARTHWORMS: FOR CULTURE
Worms for Vermiculture
Earthworm Breeding
Vermicompost
Collecting local earthworms

6. WHY VERMICOMPOSTING
Fertilizers use and deterioration of Soil Environment
Testing the impact of Vermicomposting
Nitrogen and Humification in Vermicomposting
Vermicompost - a quality manure
Recycling of wastes through Vermi-composting
Minimizing Pollution Hazard
Providing growth promoters
Vermicomposting : Advantages
Black gold (worm castings) from worms
Adverse Effects on Crops
Economic Vibility

7. VERMICULTURE AND VERMITECH
How to Start Vermiculture
Preparation of Vermibeds
Setting Up of a Vermiwash Unit
An Enterprise
Economics of Vermitech (In Indian Rupees)
Construction and maintenance of a Twin Unit System Marketing

8. VERMICOMPOSTING MATERIALS
Animal dung
Agricultural waste
Forestry wastes
City leaf litter
Waste paper and cotton cloth etc.
City refuge
Biogas slurry
Industrial wastes
Feeding Vermicomposting Materials
What should not be Fed to Earthworms?
How much Earthworm Eat
How to Feed Earthworm?
Vermicomposting : Types
Small scale or Indoor Vermicomposting
Large scale or outdoor Vermicomposting
In-situ culturing of earthworms
Simple promotion of vermic activity in fields
Development of Eathworms in Gardens and Orchards
Large Scale Commercialized Vermicomposting in Open Heaps
Vermicomposting : Requirements
Environmental Requirements
Air (Aeration)
Moisture Content
Temperature

Epiges (Eisenia foetida)
Endoges (Eudrilus eugeniae)
Aneciques
Basic Characteristics of Suitable Species
Composting Material : Preliminary Treatment
Vermicomposting Schemes
Maintenance of Vermicomposting Beds
Scheme One
Scheme Two
Scheme Three
Scheme Four
Scheme Five
Scheme Six
Harvesting the Worms and Compost
Using Worm Compost
Vermicomposting Efficiency
Transportation of Live Worms
Vermicompost : Applications
Flower or Garden pots
In Horticulture
In Agriculture
Vermicomposts : Characterization
Vermiwash
Problems in Using Vermiwash
Earthworm Paste
Vermicomposting : General Procedure at Home
Vermicomposting : General Procedures at Agricultural Farms Vermicomposting : Kiss Plan
Advantages of KISS Plan
Step 1: Windrow Preparation
Important Considerations
Step 2: Extending the Windrow
Step 3: Making Quality Castings
Step 4: Moisture and Irrigation
Step 5: Windrow Cover
Step 6: Harvesting
Earthworms Predators and Parasites
Mite pests in Earthworm Beds
White or Brown Mites
Red Mites
Mite Prevention
Removal of Mite
Parasites and pathogens

12. EARTHWORMS : END USES AND POTENTIAL
Earthworms in Medicine
Earthworms as Feed
Economic potential
Legal constraints
Conclusion

13. EARTHWORMS : END USES AND POTENTIAL
The Future
Sampling Methods

Hand Sorting
Principle
Materials
Procedure
Washing and Sieving
Principle
Materials
Procedure
Use of Chemical Repellants
Principle
Materials
Procedure
Electrical Methods
Principle
Materials
Procedure
Trapping Methods
Materials
Procedure
Other Method
Flotation
Heat Extraction
Number of Casts
Measurement of Earthworm Biomass
Storage and Identification
Storage
Identification

14. VERMICOMPOSTING: A WORLD SCENARIO
Grace McKellar Centre, Geelong, Victoria, Australia
Hobart City Council, Tasmania, Australia
National Institue of Environmental Health Sciences, Research Triangle Park, North Carolina, United States Newcastle City Council, New South Wales, Australia Oregon Soil Corporation, Beaverton, Oregon, United States
Pacific Southwest Farms, Ontairo, California, United States
Resource Conversion Corporation/Canyon Recycling, San Diego, California, U.S.
Rideau Regional Hospital, Perth, Ontario, Canada
San Quentin Prison, California
Seattle Kingdome Stadium, Seattle, Washington, United States Sovadec, La Voulte, France
Vermiculture Production Center, Pinar del Rio Province, Cuba Vermicycle Organics, Inc., Charlotte, North Carolina, United States
India
Green Cross Society of Mumbai, India
Indian Aluminum Co. Ltd, Belgaum, India
M.R. Morarka - GDC Rural Research Foundation, Jaipur

15. ROLE OF EARTHWORMS
In sustainable Agriculture
Organic Farming
Earthworms Activities
Soil Fertility and Texture
Soil Aeration
Water Impercolation

Decomposition and Moisture

16. VERMITECHNOLOGY
Definition
History
In Other Coutries
In India

17. ADVANTAGES OF VERMICULTURE
Production of Cheap Animal Protein
Vermi Cast
Soil and Vermi Cast
Earthworm Inoculation in Soil
Decomposition of Bio-Degradeable Wastes and Vermicomposting
Vermiculture in Pollution Abatement

18. VERMICULTURE
General and Planning
Selection of Suitable Species
Basic Characteristics of Suitable Species
Description of Suitable Species
Family : Lumbricidae
1.Bimastos parvus (= Allolobophora (Bimastosparvus Eisen)
2.Eisenia foetida (Sav.)
Family : Eudrilidae
1.Eudrilus eugeniae (Kinb.)
Family : Megascolecidae
1.Lamptio mauritii (Kinb.)
2. Metaphire anomala Mich. (= Pheretima anomala)
3. Metaphire posthuma (= Pheretima posthuma)
4. Perionyx excavatus E. Perr.
5. Perionyx sansbaricus Michaelson
Family: Octochaetidae
1. Octochaetus (Octochaetoides) surnensis Mich.
2. 2. Ramiella bishambari (Steph.)
Sub-family : Diplocardinae
1. Dichogaster bolaui (Mich.)
2. Dichogaster affinis (Mich.)
3. Dichogaster curgensis (Micha.)
4. Dichogaster saliens (Bedd.)
5. Ramiella bishambari (Steph.)
6. Erythodraeodrilus suctorius (Steph.)
7. Ocnerodrilus (Ocnerodrilus) occidentails (Eisen.) Family : Moniligastridae
1. Moniligaster perrieri (Mich.)
2. Drawida willisi (Mich.)
Maintenance of Base Culture

19. VERMICOMPOSTING
General
Advantages of Vermicomposting
Vermicomposting Materials
Preliminary Treatment of Composting Material
Small Scale or Indoor Vermicomposting

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

NIIR PROJECT CONSULTANCY SERVICES , 106-E, Kamla Nagar, New Delhi-110007, India. **Email**: npcs.india@gmail.com **Website**: NIIR.org
