

# Detailed Project Profiles on Dairy & Dairy Products (2nd Edn.)

**Author:** NPCS board

**Format:** Hardcover

**ISBN:** 9789381039106

**Code:** NI16

**Pages:** 163

**Price:** Rs. 1,495.00 **US\$** 150.00

**Publisher:** NIIR PROJECT CONSULTANCY SERVICES

Usually ships within **5** days

\*\*\*\*\*Limited Edition- available in Photostat Version Only\*\*\*\*\*

A dairy is a business enterprise established for the harvesting of animal milk mostly from cows or goats, but also from buffaloes, sheep, horses or camels – for human consumption. A dairy is typically located on a dedicated dairy farm or in a section of a multi-purpose farm (mixed farm) that is concerned with the harvesting of milk. The farm area where milk is stored in bulk tanks is known as the farm's "milk house." Milk is then hauled (usually by truck) to a "dairy plant," also referred to as a "dairy", where raw milk is further processed and prepared for commercial sale of dairy products. Dairy plants process the raw milk they receive from farmers so as to extend its marketable life. Two main types of processes are employed: heat treatment to ensure the safety of milk for human consumption and to lengthen its shelf-life, and dehydrating dairy products such as butter, hard cheese and milk powders so that they can be stored. A dairy product or milk product is food produced from the milk of mammals. Dairy products are usually high energy-yielding food products. A production plant for the processing of milk is called a dairy or a dairy factory. Apart from breastfed infants, the human consumption of dairy products is sourced primarily from the milk of cows, water buffaloes, goats, sheep, yaks, horses, camels, domestic buffaloes, and other mammals.

India is making efforts for strengthening the dairy sector through various development schemes like Intensive Dairy Development Programme, Strengthening Infrastructure for Quality & Clean Milk Production, Assistance to Cooperatives and Dairy Entrepreneurship Development Scheme. The share of value added dairy products (VADP) in the milk and milk derivatives segment is expected to grow by around 25 per cent till 2019-20, the Indian dairy industry has shown constant growth in milk production as well as per capita milk availability, i.e., 51.4 million tonne to about 127 million tonne and 291 gm/day respectively. With current growth the rate of approximately 3%-4%, it is thought to grow to 185 million tonne and become a \$24 billion (Rs 1, 44,000 crore) organized industry by 2020 and \$140 billion (Rs 8, 40,000 crore) including the unorganized sector. However our research considers the same production levels by 2022-23.

The content of the book includes information about dairy and dairy products. the major contents of this book are project profiles of projects like dairy industry, dairy processing 22, dairy packaging 32, organic dairy farming 39, casein from milk 43, cheese analogue 51, chocolate and confectionary 61, dairy farming &

packing of milk 75, ice-cream of different flavours 90, milk chilling plant 106, hut milk plant 119, yogurt 136. Project profile contains information like uses and applications, properties, B.I.S specification, manufacturing process, flow diagram, plant economics, , land and building, plant and machinery, fixed capital, working capital requirement/month, total working capital/month, cost of project, total capital investment, turn over/annum, profit sales ratio, rate of return, breakeven point (B.E.P). This book is very useful for new entrepreneurs, technical institutions, existing units and technocrats.

## Contents

### 1) DAIRY INDUSTRY

- a) Introduction
  - i) Dairy Farming
  - b) Milk Composition
  - c) Properties of Milk
    - i) Minor Milk Constituents
    - ii) Acidity and Ph of Milk
    - iii) Density and Specific Gravity
    - iv) Freezing Point of Milk
    - v) Organoleptic Properties of Raw Milk
    - vi) Density of Milk
    - vii) Determination of Fat Content in Milk and Cream
    - viii) Determination of Protein Content in Milk and Cream
    - ix) Detection of Preservatives and Antibiotics in Milk
    - x) Measurement of Ph
  - d) Standardisation of Whole Milk and Cream
  - e) Dairy Products
  - f) Significance of Milk and Dairy Products for Humans
  - g) Milk Testing Procedure
    - i) Fat & Snf
    - ii) Homogenization Efficiency
    - iii) Methyl Blue Reduction Test (MBRT)
    - iv) Keeping Quality of Milk
    - v) Titrable Acidity
    - vi) Cob
    - vii) Neutralizers
    - viii) Appearance of the Test
    - ix) Problems in test Result
  - h) Quality Control of Pasteurised Milk
- ### 2) DAIRY PROCESSING 22
- a) Introduction
  - b) Types of Milk
  - c) Heat Treatment of Milks
  - d) Sterilization of Milk
  - e) Ultra Heat Treatment of Milk
  - f) Evaporation of Milk
  - g) Condensation of Milk
  - h) Filtration of Milk
  - i) Dehydration of Milk
  - j) Homogenisation
  - k) Industrial Processing

- l) Impacts of Dairy Processing
- 3) DAIRY PACKAGING 32
  - a) Introduction
  - b) Aseptic Packaging
  - c) Advantages of Aseptic Packaging Technology
  - d) Advantages of Aseptically processed Milk Are
  - e) Sterilisation of Aseptic Packaging Materials and Equipment
  - f) Types of Aseptic Packs
  - g) Modified Atmosphere Packaging
- 4) ORGANIC DAIRY FARMING 39
  - a) Introduction
  - b) Organic Dairy Production
  - c) Common Organic Dairy Production Requirements
  - d) Organic Milk
  - e) Benefits of Organic Milk
  - f) Differences in the Milk
  - (v)
- 5) CASEIN FROM MILK 43
  - a) Introduction
  - b) Characteristics of Casein
  - c) Uses & Applications
  - d) Properties
  - e) Availability of Raw Material
  - f) B.I.S. Specification
  - g) Manufacturing Process
  - h) Flow Diagram for Casein Manufacture
  - i) Plant Economics
    - i) Plant Capacity
    - ii) Land & Building
    - iii) Plant & Machinery
    - iv) Fixed Capital
    - v) Working Capital Requirement
    - vi) Raw Materials
    - vii) Total Working Capital
    - viii) Cost of Project
    - ix) Total Capital Investment
    - x) Turn Over
    - xi) Profit Sales Ratio
    - xii) Rate of Return
    - xiii) Break Even Point (B.E.P)
- 6) CHEESE ANALOGUE 51
  - a) Introduction
  - b) Uses
  - c) Properties
  - d) Manufacturing Process
  - e) Process
  - f) Sterilization
  - (vi)&emsp;
  - g) Manufacturing Process Flow Diagram
  - h) Plant Economics
    - i) Plant Capacity
    - ii) Land & Building Cost
    - iii) Plant & Machinery

- iv) Fixed Capital
- v) Working Capital requirement
- vi) Raw Materials
- vii) Total Working Capital
- viii) Cost of Project
- ix) Total Capital Investment
- x) Turn Over
- xi) Profit Sales Ratio
- xii) Rate of Return
- xiii) Break Even Point (B.E.P)

#### 7) CHOCOLATE AND CONFECTIONARY 61

- a) Introduction
- b) Types of Chocolate
- c) B.I.S. Specification
- d) Nutritional Properties of Chocolates Products
- e) Chocolate Manufacturing
- f) Manufacturing Process Flow Diagram
- g) Plant Economics
- i) Plant Capacity
- ii) Land & Building Cost
- iii) Plant & Machinery
- iv) Fixed Capital
- v) Working Capital Requirement
- vi) Raw Materials
- vii) Total Working Capital
- viii) Cost of Project
- (vii)&emsp;
- ix) Total Capital Investment
- x) Turn Over
- xi) Profit Sales Ratio
- xii) Rate of Return
- xiii) Break Even Point (B.E.P)

#### 8) DAIRY FARMING & PACKING OF MILK 75

- a) Introduction
- b) Uses & Applications of Milk
- c) B.I.S. Specification
- d) Composition of Milk
- e) Some Physical Characteristics of Milk
- f) Properties of Milk
- g) Changes in Milk and its Constituents During Storage and Processing
- h) Effect of Heat Treatment
- i) Milking Process
- j) Cooling & Storing Milk
- k) Milk Processing for Packing in Pouches & Cans
- l) Packaging & Storage of Pasteurized Milk Process Flow Diagram
- m) Plant Economics
- i) Plant Capacity
- ii) Land & Building Cost
- iii) Plant & Machinery
- iv) Fixed Capital
- v) Working Capital Requirement
- vi) Raw Materials
- vii) Total Working Capital

- viii) Cost of Project
  - ix) Total Capital Investment
  - x) Turn Over
  - xi) Profit Sales Ratio
  - xii) Rate of Return
  - (viii)
  - xiii) Break Even Point (B.E.P)
- 9) ICE-CREAM OF DIFFERENT FLAVOURS 90

- a) Introduction
- b) Ice Cream Mix Properties
- c) Properties of Ice Cream and Ice-Cream Mix
- d) Ice Cream Ingredients
- e) B.I.S. Specification
- f) Process of Manufacture
- g) How the Plant Operates
- h) Receiving Raw Products
- i) Mix Assemble
- j) Pasteurizing, Homogenizing and Cooling
- k) Freezing Packing and Storing
- l) Loading Out
- m) Plant Economics
- i) Plant Capacity
- ii) Land & Building Cost
- iii) Plant & Machinery
- iv) Fixed Capital
- v) Working Capital Requirement
- vi) Raw Materials
- vii) Total Working Capital
- viii) Cost of Project
- ix) Total Capital Investment
- x) Turn Over
- xi) Profit Sales Ratio
- xii) Rate of Return
- xiii) Break Even Point (B.E.P)

10) MILK CHILLING PLANT 106

- a) Introduction
- b) Kinds of Milk
- (ix)&emsp;
- c) Factors Affecting Composition of Milk
- d) Food and Nutritive Value of Milk
- e) Physicochemical Properties of Milk Constituents
- f) Physico-Chemical Properties of Milk
- g) Properties of Milk
- h) Uses of Milk
- i) B.I.S. Specification
- j) Microbiological Parameters in Relation to Safety of Milk
- k) Substances in Milk Error! Bookmark not defined.
- l) Testing for Residual Pesticide in Milk
- m) Low Temperature Microbiology and Long Distance Rail Transport
- n) Quick Enumeration of Psychotropic
- o) Milk Collection & Processing
- p) Milk Processing Flow Diagram
- q) Plant Economics

- i) Plant Capacity
  - ii) Land & Building Cost
  - iii) Plant & Machinery
  - iv) Fixed Capital
  - v) Working Capital Requirement
  - vi) Raw Materials
  - vii) Total Working Capital
  - viii) Cost of Project
  - ix) Total Capital Investment
  - x) Turn Over
  - xi) Profit Sales Ratio
  - xii) Rate of Return
  - xiii) Break Even Point (B.E.P)
- 11) UHT MILK PLANT 119
- a) Introduction
  - b) Terminology
  - (x)&emsp;
  - c) Physical and Chemical Structure of Milk
  - d) Milk Processing
  - e) Composition of Milk
  - f) Nutritional Value
  - g) Bovine Growth Hormone Supplementation
  - h) Nutrition - Comparison by Animalsource
  - i) Milk Composition Analysis
  - j) B.I.S. Specifications
  - k) Manufacturing Process
  - l) Packaging
  - m) Process Flow Diagram
  - n) Plant Economics
- i) Plant Capacity
  - ii) Land & Building Cost
  - iii) Plant & Machinery
  - iv) Fixed Capital
  - v) Working Capital Requirement
  - vi) Raw Materials
  - vii) Total Working Capital
  - viii) Cost of Project
  - ix) Total Capital Investment
  - x) Turn Over
  - xi) Profit Sales Ratio
  - xii) Rate of Return
  - xiii) Break Even Point (B.E.P)
- 12) YOGURT 136
- a) Introduction
  - b) Properties of Yoghurt
  - c) Chemical Composition of Yoghurt
  - d) Uses & Application
  - e) Users
  - (xi)&emsp;
  - f) Manufacturing Process Flow Diagram
  - g) Manufacturing Process
  - h) Plant Economics
  - i) Plant Capacity

- ii) Land & Building Cost
- iii) Plant & Machinery
- iv) Fixed Capital
- v) Working Capital Requirement
- vi) Raw Materials
- vii) Total Working Capital
- viii) Cost of Project
- ix) Total Capital Investment
- x) Turn Over
- xi) Profit Sales Ratio
- xii) Rate of Return
- xiii) Break Even Point (B.E.P)

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
