Natural foods such as fruits and vegetables are among the most important foods of mankind as they are not only nutritive but are also indispensable of the maintenance of the health. India is the second largest producer of fruits and vegetables in the world. Fertile soils, a dry climate, clean water and abundant sunlight help the hard working farmers to produce a bountiful harvest. Although there are many similarities between fruits and vegetables, there is one important difference that affects the way that these two types of crop are processed like fruits are more acidic than vegetables. Food processing is the set of methods and techniques used to transform raw ingredients into food or to transform food into other forms for consumption. Food processing typically takes clean, harvested crops or butchered animal products and uses these to produce attractive, marketable and often long shelf-life food products. Canning is a method of preserving food in which the food is processed and sealed in an airtight container. Food preservation is the process of treating and handling food to stop or greatly slow down spoilage (loss of quality, edibility or nutritive value) caused or accelerated by micro organisms. One of the oldest methods of food preservation is by drying, which reduces water activity sufficiently to prevent or delay bacterial growth. Drying also reduces weight, making food more portable. Freezing is also one of the most commonly used processes commercially and domestically for preserving a very wide range of food including prepared food stuffs which would not have required freezing in their unprepared state. Fruits and vegetable processing in India is almost equally divided between the organized and unorganized sector, with the organized sector holding 48% of the share. The present book covers the processing techniques of various types of fruits, vegetables and other food products. This book also contains photographs of equipments and machineries used in fruits, vegetables and food processing along with canning and preservation. This book is an invaluable resource for new entrepreneurs, food technologists, industrialists etc.

Contents

1. Characteristics of the Food Industry
   Components of the Food Industry
   Allied Industries
   Interrelated Operations

2. Food Quality Assurance
   The Need
   A Role for Government
Microbiological Standards
A Role for Industry
Design of Company QA Program
Objectives
Raw Material Quality Assurance
In-process Quality Assurance
Finished Product Quality Assurance

3. Quality Factors in Foods
   Appearance Factors
   Color and Gloss
   Consistency
   Textural Factors
   Measuring Texture
   Texture Changes
   Flavor Factors
   Additional Quality Factors
   Quality Standards
   Planned Quality Control
4. Preserve, Candied and Crystallized Fruits and Vegetables
   Preserve
   General considerations
   Candied Fruits/Vegetables
   Process
   Glazed Fruits/Vegetables
   Crystallized Fruits/Vegetables
   Problems in Preparation of Preserves and Candied Fruits

5. Food Preservation by Fermentation
   Life with Microorganisms
   Fermentation of Carbohydrates
   Industrially Important Organisms in Food Preservation
   Order of Fermentation
   Types of Fermentations of Sugar
   Fermentation Controls
   Wine
   Preservation
   Sterilization Filtration
   Beer
   Vinegar Fermentation
   Principles of Vinegar Fermentation
   Vinegar Making
   Preparation of Yeast Starter
   Alcoholic Fermentation
   Acetic Fermentation
   Cheese
   Kinds of Cheese
   Cottage Cheese
   Swiss Cheese
   Blue Cheeses

6. Chemical Preservation of Foods
   What Are Food Additives?
Importance of Chemical Additives
Legitimate Uses in Food Processing
Undesirable Uses of Additives
Safety of a Food Additives
Functional Chemical Additive Applications
Specific Uses of Chemical Additives
Additives Permitted and Prohibited in the United States
Chemical Preservatives
Microbial Antagonists
Sorbic Acid
Antibiotics
Quality Improving Agents
Other Chemical Additives
Artificial Flavoring
Artificial Coloring

7. Cold Preservation and Processing
Distinction Between Refrigeration and Freezing
Refrigeration and Cool Storage
Requirements of Refrigerated Storage
Controlled low Temperature
Air Circulation and Humidity
Modification of Gas Atmospheres
Changes in Food During Refrigerated Storage
Freezing and Frozen Storage
Initial Freezing Point
Freezing Curve
Changes During Freezing
Choice of Final Temperature
Food Composition
Noncompositional Influences
Freezing Methods
Air Freezing
Packaging Considerations
Some Additional Developments

8. Heat Preservation and Processing
Sterilization
Commercially Sterile
Pasteurization
Blanching
Selecting Heat Treatments
Heat Resistance of Microorganisms
Thermal Death Curves
Margin of Safety
Heat Transfer
Conduction and Convection Heating
Cold Point in Food Masses
Determining Process Time and Process Lethality
Protective Effects of Food Constituents
Different Temperature-Time Combinations
Heating Before or After Packaging
9. Food Pickling and Curing
   Pickled Fruits and Vegetables
   Use of Salt Stock
   Sour Pickles, Sweet Pickles, Processed Dill Pickles
   Sauerkraut
   Olives
   Fermented and Pickled Products
   Deterioration
   Nutritional Value
   Bloater Damage Control
   Controlled Fermentations in Commercial Brining Tanks
   Brine Recovery
   Defect Reduction
   The Principles of Fish Salting
   The Influence of the Composition of Salt
   Commercial Methods of Salting Fish
   Brine-salting
   Dry-salting
   Comparative Efficiency of Brine-salting and Dry-salting
   Some-curing Processes
   Cold-smoking (Heavy Salt Cure)
   Smoked Salmon
   Hard-smoked Salmon
   Meat Curing and Smoking
   Pickled Meats
   Salt
   Sugar and Corn Syrup Solids
   Nitrite and/or Nitrate
   Nitrosamines
   Phosphates
   Sodium Erythorbate
   Cured Meat Color
   Role of Nitrite and/or Nitrate in Meat Color
   Sausages and Table-ready Meats
   Dry Sausage Manufacture
   Processing
   Fermentation

10. Food Preservation by Drying
    Drying-A Natural Process
    Dehydration-Artificial Drying
    Dehydration vs. Sun Drying
    Why Dried Foods?
    Dehydration Permits Food Preservation
    Humidity-Water Vapor Content of Air
    RH-The drying Medium
    Types of Driers
    Adiabatic Driers
    Heat Transfer through a Solid Surface
    Criteria of Success in Dehydrated Foods
    Freeze-Dehydration (Freeze Drying)
    Triple Point of Water
    Temperature Changes in Meat Freeze-dehydration
Influence of Dehydration on Nutritive Value of Food
Dehydration of Fruits
Dehydration of Vegetables
Dehydration of Animal Products
Dehydration of Fish
Dehydration of Milk
Dehydration of Eggs
Packaging of Dehydrated Foods

11. Food Preservation by Canning 1
Temperature vs. Pressure
Heat Resistance of Microorganisms Important in Canning
Factors Influencing the Heat Resistance of Spores
Heat Resistance of Enzymes in Food
Heat Penetration into Food Containers and Content
Storage of Canned Foods
External Corrosion of Cans
Coding the Pack
Influence of Canning on the Quality of Food
Color
Flavour and Texture
Protein
Improvements in Canning Technology
Retort Pouches
Testing a Good Seal
Hazard Analysis

12. Pickles
Preservation with Salt
Preservation with Vinegar
Preservation with Oil
Preservation with Mixture of Salt, Oil, Spices and Vinegar
Problems in pickle making

13. Chutneys and Sauces/Ketchups
Chutneys
Recipes for chutneys
Sweet mango chutney
Apple chutney
Plum chutney
Wood apple chutney
Apricot chutney
Papaya chutney
Tomato chutney
Aonla chutney
Sauces (Ketchups)
Recipes for sauces (ketchups)
Tomato sauce
Apple sauce
Plum sauce
Papaya sauce
Mushroom sauce
Aonla sauce
Problem in the preparation of sauces/ketchups

14. Mushroom Processing
   Dehydration
   Preparation of ketchup
   Preservation with salt and acetic acid
   Pickling
   Canning
   Mushroom poisoning

15. Tomato Processing

16. Jam, Jelly and Marmalade
   Jam
   Problems in jam production
   Jelly
   Important considerations in jelly making
   Pectin
   Acid
   Sugar
   Judging of end-point
   Marmalade
   After pectin extraction

17. Freezing of Fruits and Vegetables
   Preparation of fruits/vegetables for freezing
   Methods of freezing
   Sharp freezing (Slow freezing)
   Quick freezing
   By direct immersion
   Advantages
   Disadvantages
   By indirect contact with refrigerant
   By air blast
   Cryogenic freezing
   Dhydro-freezing
   Freeze-drying
   Changes during freezing and storage for frozen products
   Freezing process for fruits and vegetables

18. Vinegar
   Types of vinegar
   Steps involved in vinegar production
   Outline Scheme of Vinegar Production
   Preparation of vinegar
   Slow process
   Orleans slow process
   Quick process (Generator or German process)
   Precautions
   Problems in vinegar production

19. Drying and Dehydration of Fruits and Vegetables
   Advantages of dehydration over sun-drying
Spoilage of dried products
Reconstitution test for dried/dehydrated products
Reconstitution test

20. The Canning Process
Cans
Types of Cans
Square and Pullman Base
Pear Shaped
Round Sanitary
Drawn Aluminum
Oblong
Can Materials
Retorts
Nonagitating Retorts
Continuous Agitating Retorts
Hydrostatic Retorts
Establishment of Retort Schedule
Pasteurized Canned Products
Closing
Pasteurizing Cook
Cooling
Storage and Shelf Life
Aseptic Canning

21. Food Freezing
Development of a Frozen Food Industry
The Freezing Point of Foods
Percentage Water Frozen vs. Temperature of Food and
Its Quality
Size of Ice Crystals Formed
Volume Changes During Freezing
Refrigeration Requirements in Freezing Foods
Freezing in Air
Freezing by Indirect Contact with Refrigerants
Direct Immersion Freezing
Packaging Requirements for Frozen Foods
Influence of Freezing on Microorganisms
Influence of Freezing on Proteins
Influence of Freezing on Enzymes
Influence of Freezing on Fats
Influence of Freezing on Vitamins
Freezing of Bakery Products
Packaging
Storage Life of Frozen Bread
Cookies and Cakes
Frozen Dairy Foods
The Ice Cream Industry
Basic Ingredients
Manufacture of Ice Cream
The Mix
Pasteurization
Homogenization
Cooling
Freezing
Hardening
Hazard Analysis
Hazard Categories

22. Cookie and Cracker Production Technology
   Ingredients Handling
   Mixing
   Dough Relaxation and Fermentation
   Dough Machining and Forming
   Dough Relaxing
   Cutting Stage
   Scrap Return
   Salter or Sugar Sprinkling
   Rotary Molding
   Extruder-Dough Formers
   Wire Cut
   Rout Press
   The Fruit Bar Coextruder
   Baking
   Direct-Fired Ovens, Gas Fired
   Convection (Indirect) Ovens
   Post Conditioning
   Secondary Processes
   Icings
   Enrobing
   Sandwiched Cookies and Crackers
   Biscuit Packaging

23. Snack Foods
   Introduction
   Popcorn
   Four Types of Popcorn
   Mechanism of Popping
   Quality factors
   Processing
   Formulated Puffed Snacks
   Ingredients
   Other Grain Products
   Expandable Ingredients
   Frying Fats
   Antioxidants
   Sweeteners
   Other Ingredients
   Extruders and Extruding
   Types of Extruders
   Snacks that Are Cooked and Formed
   Drying

24. Breakfast Cereals
   Introduction
   Present Status
Processing of Hot-serve Cereals
Wheat Cereals
Corn Cereals
Oat Cereals
Processing Ready-to-Eat Breakfast Cereals
Flakes
General Considerations
Corn Flakes
Wheat flakes
Bran Flakes
Shreds
Shredded Wheat Biscuits
Puffed Cereals
General Considerations
Oven-puffed Rice
Puffing by Extrusion
Sugar-coated Products
Ovens

25. Canned Meat Formulations
Corned Beef Hash
Federal Meat Inspection Regulations
Preparation
Meat
Potatoes
Onions
Canning
Beef Stew
Federal Meat Inspection Regulations
Preparation
Meat
Potatoes
Carrots
Onions
Preparation
Canning
Chili Con Carne
Federal Meat Inspection Regulations
Preparation
Canning
Vienna Sausages
Federal Meat Inspection Regulations
Preparation
Canning
Meat Balls with Gravy
Federal Meat Inspection Regulations
Preparation
Canning
Sliced Dried Beef
Federal Meat Inspection Regulations
Preparation
Drying and Smoking
Canning
Luncheon Meat
Federal Meat Inspection Regulations
Preparation
Canning
Processing
Sterile
Pasteurized
Potted Meat
Federal Meat Inspection Regulations
Preparation
Canning
Canned Hams-Pasteurized and Sterile
Federal Meat Inspection Regulations
Preparation
Smoking
Canning
Filling and Pressing
Closing
Processing
Pasteurized
Sterile
Plastic Packaged Hams
Preparation
Packaging
Processing

26. Cured or Smoked Meats
Hams
Classification of Ham
Internal Temperature
Added Substance
Presence of Bone
Commercial Ham Manufacture
Curing
Smoking/Cooking
Cooked Ham
Baked Ham
Preparation
Country Ham
Preparation
Westphalian Ham
Preparation
Scotch Ham
Prosciutti Ham
Preparation
Honey Cured Hams
Preparation
Bacon
Canadian Bacon
Wiltshire Bacon
Beef Bacon
Jowl Bacon
Fat Backs and Heavy Bellies
Smoked Pork Loin
Picnic
Shoulder Butt
Corned Beef
Smoked Fresh Meat
Dried Beef
Procedure
Smoked and Cured Lamb
Smoked Tongue
Pickled Pigs Feet

27. Sausage Formulations
Ground Sausages
Instructions
Instructions
Instructions
Instructions
Instructions
Semidry or Summer Sausages
Instructions
Instructions
Instructions
Instructions
Dry Sausages
Instructions
Instructions
Instructions
Instructions
Emulsion-Type Sausages
Instructions
Instructions
Instructions
Instructions
Instructions
Liver Sausage and Braunschweiger
Instructions
Instructions
Instructions
Speciality Items
Instructions
Instructions
Instructions
Mortadella
Instructions
Linguica (Portuguese Sausage)
28. Processing of Rice

Introduction
Quality of Rice
Milling of Rice
Small-scale Milling
Modern Conventional Milling
Abrasive Milling of Rice
Lye-peeling
Extractive Milling
Rice Flour
Further Processing of Rice
Boiling and Steaming
Parboiling
Quick-cooking Rice
Shelf-stable Cooked Rice
Rice Cakes
Rice Milk

29. Creaming, Emulsions, and Emulsifiers

Emulsifier and Emulsions
Classification
Hydrophilic-Lipophilic Balance (HLB)
Oil-in-Water Emulsions
Type of Emulsifier used in Cookies and Crackers
Phosphatides and Lecithin
Synthetic Emulsifiers
Function of Emulsifiers in Cookies and Crackers
Eggs
Emulsifier
Mixing Operation in Cookie and Cracker Doughs
Mixing Operation
Creaming Method
Two-stage Method
Three-stage Method
Baking Cookies and Crackers
Emulsion Stability
Viscosity
To Lower Viscosity
To Increase Viscosity
Elevated Temperature
Inversion Phase
Phase Equilibria
Batter Aeration

30. Principles of Food Packaging

Introduction
Functions of Food Packaging
Requirements For Effective Food Packaging
Types of Containers
Primary, Secondary, and Tertiary
Form-Fill-Seal Packaging
Hermetic Closure
Food-Packaging Materials and Forms
Metal
Metal Cans
Can Construction
Can Corrosion
Can Sizing
Glass
Glass Containers
Paper, Paperboard, and Fiberboard
Plastics
Laminates
Retortable Pouches and Trays
Edible Films
Wood and Cloth Materials
Package Testing
High Barrier Plastic Bottles
Aseptic Packaging in Composite Cartons
Military Food Packaging

Directory Section
Suppliers of the Plant and Machinery
Addresses of Packaging Machinery
Suppliers of Raw Material Suppliers

Machinery & Equipments (Photographs)

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

NIIR PROJECT CONSULTANCY SERVICES , 106-E, Kamla Nagar, New Delhi-110007, India. Email: npcs.india@gmail.com Website: NIIR.org
