

Steel Rolling Technology Handbook (2nd Revised Edition)

Author: NIIR Board of Consultants & Engineers

Format: Paperback

ISBN: 9788178331690

Code: NI167

Pages: 576

Price: Rs. 1,775.00 **US\$** 150.00

Publisher: Asia Pacific Business Press Inc.

Usually ships within **5** days

The steel industry has had a long history of development, yet, despite all the time that has passed, it still demonstrates all the signs of longevity. The steel industry is expanding worldwide. The economic modernization processes in these countries are driving the sharp rise in demand for steel. Rolling is a metal forming process in which metal stock is passed through a pair of rolls. Rolling is classified according to the temperature of the metal rolled.

Being a core sector, steel industry reflects the overall economic growth of an economy in the long term. Also, steel demand, being derived from other sectors like automobiles, consumer durables and infrastructure, its fortune is dependent on the growth of these user industries. Steel consumption is forecast to grow annually by about 5%–6%.

This handbook describes different classes of steel making processes, welding processes and plant & machinery suppliers with their photographs. Techniques of steelmaking have undergone vast changes in scale and new processes have been developed to meet the demands of speed, quantity and quality. There are various hot mills involved in the production of steel plate mill, hot strip mill, bar and rod mills etc. This handbook deliberated on the fundamental of mechanical working and its theory in a very simpler way. In addition it describes statistical methods of quality control, total quality management, quality assurance & raw material which are used in making of steel.

The major contents of the handbook are fusion welding processes, grinding and abrasive processes, width change by rolling and pressing, metallurgical defects in cast slabs and hot rolled products, primary steel-making processes, optimization and control of width change process, fundamentals of metal casting, steel making technology, basic principles of width change, plate mills, hot strip mills, quality assurance, testing and inspection, bar and rod mills.

It will be a standard reference book for professionals, entrepreneurs, those studying and researching in this important area and others interested in the field of steel rolling.

Contents

CHAPTER 1

FUSION WELDING PROCESSES

Introduction

Oxyfuel Gas Welding

Types of flames

Filler metals

Welding practice and equipment

Process capabilities

Arc-Welding Processes: Consumable Electrode

Shielded metal-arc welding

Process capabilities

Submerged arc welding

Process capabilities

Gas metal-arc welding

Process capabilities

Flux-cored arc welding

Process capabilities

Electrode Gas Welding

Process Capabilities

Electroslag Welding

Process capabilities

Electrodes

Electrode coatings

Arc-Welding Processes

Nonconsumable Electrode

Gas tungsten-arc welding

Process capabilities

Atomic hydrogen welding

Plasma-arc welding

Process capabilities

Thermit Welding

Process capabilities

Electron-Beam Welding

Process capabilities

Laser-Beam Welding

Process capabilities

Cutting

Oxyfuel gas cutting

Process capabilities

Arc cutting

Welding Safety

CHAPTER 2

GRINDING AND ABRASIVE PROCESSES

Grinding and Abrasive

Practices

Processes

Cylindrical Grinder

Internal Grinders

Surface Grinding

Tool and Cutter Grinders
Honing
Lapping
Superfinishing
Abrasive-Belt Grinding
Mass Media Finishing
Abrasive-Media Flow Deburring Machine
Miscellaneous Finishing Operations
Wire Brushing
Polishing
Buffing
Abrasives, Grinding Wheels, and Stones
Materials
A. Natural
B. Manufactured
Grinding Wheels
Bonding Processes
Vitrified process
Silicate process
Shellac process
Rubber process
Bakelite or resinoid process
Wheel Selection
Size and shape of wheel
Type of abrasive
Grain size of abrasive particles
Grade or strength of bond
Structure of grain spacing
Type of bond material
Coated Abrasives
Mass Media Abrasives

CHAPTER 3

WIDTH CHANGE BY ROLLING AND PRESSING

Methods of Width Change by Rolling
Vertical Edgers
Examples of edging practice
Slab Sizing Mills
Effect of Edging Practice on Workpiece End shape
Effect of Edging Practice on Workpiece Metallographic Properties
Edging in Finishing Mills
Methods of Width Enlargement by Rolling
Width Enlargement with Tapered Rolls
Classification of Sizing Presses
Design of Short-Tool Start-Stop Sizing Presses
Performance of Short-Tool Start-Stop Sizing Presses
Flying Type Sizing Presses
Rocking Type Sizing Presses
Design Optimization of Sizing Presses

CHAPTER 4

METALLURGICAL DEFECTS IN CAST SLABS AND

HOT ROLLED PRODUCTS

Classification of Defects in Cast Slabs

Internal Defects in Slabs

Segregation

Non-metallic inclusions

External Cracks in Slabs

Surface Defects in Slabs

Slab Shape Defects

Scaling of Steel During Reheating

Scaling Rate

Effect of the Atmosphere on Scaling

Effect of Residual and Alloying Elements on Scaling

Scaling and Decarburization

Scaling of Steel During Roughing Passes

Scaling of Steel During Finishing Passes

Scaling of Steel During Coiling

Classification of Scale

Primary and Heavy Primary Scales

Furnace Scale

Refractory Scale

Secondary Scale

Red Oxide Scale

Scale Related to Descaling Process

Scale Related to Roll Wear

Contraction Gouges

Scratches and Gouges

Slivers

CHAPTER 5

PRIMARY STEEL-MAKING PROCESSES

Raw Materials

Open-Hearth Steel-making

Oxygen Steel-making

Top-blown (BOP) process

Bottom-blown (Q-BOP) process.

Combination-blown process

Electric-Furnace Steel-making

Chemical Formulas of Steel-making

Chemistry of Refining

Affinity for Oxygen

Basic And Acid Steel-making

Deoxidation of Steel

Optimization of Primary Steel-making Process

Secondary Steel-making Processes

Purpose of Secondary Steel-making

Vacuum Stream Degassing

Recirculation Degassing

Vacuum Ladle Degassing

Argon-Oxygen Decarburization

Non-vacuum Argon Bubbling

Electro-Slag Remelting

Ladle Injection

Vacuum Degassing with Heating

Comparison of Secondary steel-making Processes
Casting of Steel for Flat Products
Type of Cast Products
Casting of Ingot
Types of Ingots
Methods of Continuous Casting of Thick Slabs
Continuous Casting of Thick Slabs
Slab Width Control
Continuous Casting of Thin Slabs and Strip
Requirements for Continuously Cast Steels
Oxide Inclusions in Concast Steel
Formation of Oxide Phases
Influence of Caster Type on Steel Quality
Defects in Ingots and Slabs
Internal Defects of Ingots and Slabs
External Cracks in Ingots and Slabs
Surface Defects Typical for Ingots
Slab ingot-narrow side
Surface Defects for Concast Slabs
Surface Defects Common for Ingots and Concast Slabs
Slab Shape Defects

CHAPTER 6

OPTIMIZATION AND CONTROL OF WIDTH

CHANGE PROCESS

Methods of Reducing Crop Losses
Pre-forming Slab Ends by Pressing
Methods of Preventing Out-of-Square Slab Cross-Section
Selection of Optimum Width Change Technology
Width Measuring Systems
Camber Measuring Systems
Width Control Actuators
Purpose of Width Control During Edging
Automatic Width Control Systems for Vertical Edgers
Feedforward Control Mode
Combined Feedforward and Feedback Control Mode
Integrated Width Control Systems for Hot Strip Mills
Principle of Plan View Control
MAS Rolling Process
Automatic Plan View Control Systems
Automatic Camber Control Systems

CHAPTER 7

FUNDAMENTALS OF METAL CASTING

Introduction
Solidification of Metals
1 Pure metals
2 Alloys
Structure-property Relationships
Fluid Flow and Heat Transfer
Fluid Flow
Fluidity of molten metal
Heat transfer

Solidification time
Shrinkage
Defects

CHAPTER 8

STEEL MAKING TECHNOLOGY

Principle of Gauge Control
Causes of Gauge Variation
Actuators for Roll Gap Control
Methods of Measurement of Roll Gap
Position Sensors
Closed Loop Control of A Hydraulic Actuator
Dynamic characteristics of Roll Gap Control
Gaugemeter control
Differential Gauge Control
Spacer Gauge Control
Gauge Deviation Control
Strip Tension Control System
Three Stage AGE for Tandem Cold Mill
Feed-forward AGC for Tandem Cold Mill
Flow-Stress Feed-Forward AGC
Non-Interactive AGC
Automatic Tension and Gauge Control System
Interstand Tension Control in Hot Strip Mills
Three-Stage AGC for Tandem Hot Strip Mill
Feed-Forward AGC for the Hot Tandem Mill
Compensation for Imperfection of Mill Equipment
Modeling of Dynamic Characteristics of HAGC
Block Diagram of a Single Stand HAGC
Position Error Amplifier
Lead-Lag Network
Current Controller
Servovalve
Hydraulic Actuator
Mill spring
Mill Stiffness and Mill Structure Weight
Servovalve Droop
Transducers
Actuator Pressure and Force
Mill Stiffness Multiplier
Transfers Functions of Synthesized Blocks
Amplitude Ratios and Phase Shifts of Individual Blocks
Frequency Response Characteristics of Control System
Position Errors and Control Margins
Time Domain Response Characteristics
Compensation of Control System
Compensation for Material Stiffness
Compensation for Oil Height in Actuator
Compensation for Roll Force
Performance of the System Without Strip
Principles of Width and Plan View Control
Lateral Spread
Wusatowski's Formula for Spread

Hill's Formula for Spread
El-Kalay and Sparling's Formula for Spread
Helmi and Alexander's Formula for Spread
Beese's Formula for Spread
Ekelund's Formula for Spread
Principle of Edging
Edging with Flat Cylindrical Rolls
Edging Followed by Reduction in Thickness
Effective Width Reduction
Edging With Grooved Rolls
Fish Tail
Buckling
Width Change and Control in Rolling Mills
Main Objectives and Methods of Width Change
Width Reduction by Rolling
Slab Sizing Mills
Width Reduction by Pressing
Long-tool Sizing Presses
Short-tool Sizing Presses
Start-Stop Type Sizing Press
Flying Type Sizing Press
Improving The Edging Efficiency
Decreasing The Slab Distortion
Methods of Preventing a Fish Tail
Width Enlargement
Automatic Width Control During Edging
Automatic Width Control In Hot Strip Mill
Plan View Control

CHAPTER 9

BASIC PRINCIPLES OF WIDTH CHANGE

Lateral Spread of Initially Flat Workpiece
Main Factors Affecting Lateral Spread
Effect of Slab Initial Thickness on Lateral Spread
Effect of Friction on Lateral Spread
Edging with Flat Rolls
Main Parameters of Dog Bone Shape
Edging Followed by Reduction in Thickness
Effective Width Reduction and Edging Efficiency
Edging with Grooved Rolls
Distortion of Workpiece Plan View
Shape of Workpiece Ends
Buckling
Edge Cross- Sectional Shape

CHAPTER 10

PLATE MILLS

Introduction
Types Of Mills Used for The Rolling of Plates
Plate-Mill Design
The Levelling of Plates
The Cooling, Marking and Cutting of Plates
The Ultrasonic Inspection and Gaging Of Plates

Modern Plate-Mill Installations

CHAPTER 11

HOT STRIP MILLS

Introduction

Steckel Hot Mills

Planetary Mills

Sendzimir Planetary Mills

Single Planetary Mills

The Krupp-Platzer Planetary Mill

Semi-Continuous Hot-Strip Mills

Semi-Continuous "Three-Quarter" Hot-Strip Mills

Continuous Hot-Strip Mills

Roughing Trains

Coilboxes In Hot-Strip Mills

Crop Shear And Descaling Unit

Finishing Trains

Runout Tables and Strip-Cooling Systems

Coilers

CHAPTER 12

QUALITY ASSURANCE, TESTING, AND INSPECTION

Introduction

Product Quality

Quality Assurance

Total Quality Management

Quality engineering as a philosophy

Deming methods

Taguchi methods

Juran methods

The ISO 9000 standard

Statistical Methods of Quality Control

Statistical quality control

Statistical Process Control

Control charts

Process capability

Acceptance Sampling and Control

Reliability

Nondestructive Testing

Liquid penetrants

Magnetic-particle inspection

Ultrasonic inspection

Acoustic methods

Radiography

Eddy-current inspection

Thermal inspection

Holography

Destructive Testing

Automated inspection

Sensors for automated inspection

Chapter 13

BAR AND ROD MILLS

Introduction

The Evolution Of Merchant And Bar Mills

The Development Of Rod Mills

“Jumping” Three-High Stands

“Housingless” Stands for Bar And Rod Mills

The Contilooop Arrangement Of Roll Stands

“No-Twist” Mills

The Three-Roll Planetary Mill

Kocks’ Three-Roll Rod And Bar Mills

Guides

Flying Shears

Cooling Beds

Coiling Facilities

The Stelmor Process

The “Easy-Draw” (E.D.) Process

The Design Of Modern Merchant Mills

Modern Rod Mills

Chapter 14

PHOTOGRAPHS OF PLANT & MACHINERY WITH SUPPLIER’S CONTACT DETAILS

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

NIIR PROJECT CONSULTANCY SERVICES , 106-E, Kamla Nagar, New Delhi-110007, India. **Email:** npcs.india@gmail.com **Website:** NIIR.org
