

# Handbook on Biodegradable Plastics (Eco Friendly Plastics)

**Author:** NIIR Board  
**Format:** Paperback  
**ISBN:** 8186623531  
**Code:** NI26  
**Pages:** 276  
**Price:** Rs. 600.00 **US\$** 100.00  
**Publisher:** National Institute of Industrial Research  
Usually ships within **5** days

Plastic has brought immense benefits to the whole human race. The light weight, cheap chemical resistant and strong material has got almost omnipotent presence. When we talk of its strength we talk of the time till it survives and to everyone's knowledge plastic does not bio-degrade. Yes, plastic the greatest invention of mankind has the power to even destroy mankind. Plastic that is not biodegradable brings a lot of environmental issues. It deteriorates the ozone layer. For the most part plastic is produced from oil. The world is progressively running out of oil. Research says plastic brings number of harms not only to humans but also the entire cosmos. The plastic which cannot be recycled has to be disposed off in some or the other way. Let's say if we dispose in water it has the tendency to destroy marine life. So the only way left to reduce the ill effects of plastic is to use eco-friendly or biodegradable plastic.

Biodegradable plastics are plastics that will decay in usual aerobic environments. These include plastics that are made from vegetable oil and other organic matter. The book, Handbook on Bio Degradable Plastics (Eco friendly plastics) is one of its kinds which give the information about biodegradable plastics. The book gives comprehensive information about Standard Methods for Biodegradation of Plastics, Commercialization of Eco-Friendly Plastics, and multipurpose exploitation of municipal solid waste (plastics), management of non recoverable plastic waste, guidelines to be followed in recycling of plastic and several other crucial topics required for the understanding of recycling of plastic. According to a report out of 200 million plastic produced in the world 26 million is produced by the United States and only 6%(approximately) of plastic waste gets recycled posing both a challenge and opportunity. Challenge in the sense that it is causing environmental issue and opportunity for the young entrepreneurs to penetrate in this sector. The book provides important and descriptive information on the whole topic of biodegradable plastic, the benefits and the techniques used. The book also contains information on topics arising social concern like present technologies for recycling of polyethylene terephthalate (pet) waste, how to minimise the impact of packaging materials on the environment and also provides information on new bio-degradable plastic, as business options for entrepreneurs.

The book at the end contains a list of directory providing information on List of Plant & Machinery, List of Raw Material, Plant/Machinery Suppliers, Overseas Suppliers of Machinery and Raw Material Suppliers.

# Contents

1. INTEGRATED PLASTIC WASTE MANAGEMENT : AN INDIAN PERSPECTIVE
  - Introduction
  - Degradation of Plastics in Environment
  - Biodegradability Vs Eco-Friendliness
  - Standard Methods for Biodegradation of Plastics
2. ECO-FRIENDLY PLASTICS FOR A NICHE MARKET
  - Disposal of Plastics Disturbs Eco-System
  - Biodegradable Polymeric Materials
  - Agricultural Mulches
  - Agricultural Planting Containers
  - Plastics in Municipal Solid Waste (MSW)
  - Commercialization of Eco-Friendly Plastics
  - Starch
  - Ampacet
  - Biofine™ Foils
  - REXflex Flexible Polyolefin (FPO)
  - PBHV-Biodegradable Plastics
  - Prospective Markets for Biodegradable Polymer
  - Factors Affecting Degradability
  - Possibility of Recyclable Biodegradable Polymers
  - Biodegradable Additives
  - Assessment of Biodegradable Polymers
  - Test Conditions
  - Biodegradability of Polyolefins
  - Mixed Cultures and Microbial Communities
  - Conclusion
3. MULTI PURPOSE EXPLOITATION OF MUNICIPAL SOLID WASTE (PLASTICS)
  - Introduction
  - Some Definitions
  - Chemical Products
  - Economic and Social Benefits
  - Ecological Implications
  - Fuel cells turn landfill gas into electric power
  - Conclusion
  - Activity Plan
  - Steps to be Taken
  - Expected Outcome
4. MANAGEMENT OF RECOVERABLE PLASTIC WASTE
  - Incineration
  - Mechanical Recycling
  - Recent trends in recycling
  - Feedstock Recovery
  - Biodegradable plastics
  - Energy Recovery
5. MANAGEMENT OF NON RECOVERABLE

## PLASTIC WASTE

Photodegradable plastic

Landfill and composting

Biodegradable plastics from microbial origin

India Scenario

Conclusions and Future Outlook

## 6. STANDARDS ON ENVIRONMENT FRIENDLY

### PACKAGING AND ECO MARKING

ECO-Mark Scheme

Criteria for ECO-Mark

Product General Requirements

Product Specific Requirements

Procedure for Grant of Licence

ECO logo

General Requirements

Product Specific Requirements

Guidelines for Recycling of Plastics

International Guideline

## 7. DREAMS AND MYTHS ABOUT BIODEGRADABLE POLYMERS

### FOR PLASTICS PACKAGING

Origin and Myths of Biodegradable Polymers

Paper

Starch Based films

Suitability of Biodegradable Plastics in Packaging

## 8. PRESENT TECHNOLOGIES FOR RECYCLING OF POLYETHYLENE TEREPHTHALATE (PET) WASTE

Introduction

Methods for PET Recycling

Mechanical Recycling

Flotation/Hydrocyclone Process

Water Bath/Hydrocyclone Process

Solution/Washing Process

Solvent/Flotation Process

Depolymerisation

New Chemical Recycling Technique for PET

Recycling in India

## 9. BIO-DEGRADABLE PLASTIC FILM

MADE OUT OF SOYBEANS: A BREAK

THROUGH INPLASTIC INDUSTRY

## 10. BIO-DEGRADABLE PLASTIC: A NEW

PTIONS FOR ENTREPRENEURS

## 11. PLASTIC WASTE RECYCLING TECHNOLOGIES

ECO FRIENDLY SOLUTION

Plastic and Environment

Plastic Waste Management Strategies

Incineration

Recycling

Mechanical Recycling

Recycling to Feedstock and Energy

Process Components

Prereatment

Liquefaction

Pyrolysis

Co-processing

Hydrocracking  
Commercial Technologies  
BP Technology  
CFFLS Pyrolysis Technology

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help,

Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
