

# The Complete Technology Book on Industrial Polymers, Additives, Colourants and Fillers

**Author:** NIIR Board of Consultants & Engineers

**Format:** Paperback

**ISBN:** 8178330091

**Code:** NI180

**Pages:** 512

**Price:** Rs. 1,100.00 US\$ 125.00

**Publisher:** Asia Pacific Business Press Inc.

Usually ships within **5** days

The Indian plastic and polymer industry has taken great strides. In the last few decades, the industry has grown to the status of a leading sector in the country with a sizable base. The material is gaining notable importance in different spheres of activity and the per capita consumption is increasing at a fast pace. Numerous plastics and fibers are produced from synthetic polymers; containers from propylene, coating materials from PVC, packaging film from polyethylene, experimental apparatus from Teflon, stockings from nylon fiber, there are too many to mention them all. The reason why plastics are popular is that they may offer such advantages as transparency, self lubrication, light weight, flexibility, economy in fabricating and decorating. Properties of plastics can be modified through the use of fillers, reinforcing agents and chemical additives. Silicones are by far the most important industrial polymers and are based on silicon, an element abundantly available on our planet. Polymers are classified in three broad groups; addition polymers, condensation polymers and special polymers. It is well known that the major consumption of additives is in PVC compounds. Approximately 80% of additives are being used in PVC; however the left over 20% is consumed in compounding of other thermoplastics. Plastic master batches and fillers have their own importance in plastic processing industries. Colorants are the materials that give colour and opacity to plastics are chemically characterized as either pigments or dyes. Pigments are finely pulverized natural or synthetic particles which may be of inorganic or organic origin and insoluble in the matrix in which they are dispersed. Permanent red 2B is a mono azo pigment that is widely used in thermoplastics because it is inexpensive and has high tinting strength and good bleed resistance. Fillers are commonly employed in opaque PVC compounds to reduce cost and to improve electrical insulation properties, to improve deformation resistance of cables, to increase the hardness of a flooring compound and to reduce tackiness of highly plasticized compounds. Various calcium carbonate are used for general purpose work, china clay is commonly employed for electrical insulation, and asbestos for flooring applications. Also employed occasionally are the silicas and silicates, talc, light magnesium carbonate and barites (barium sulfate). Polymer Energy system is an award winning, innovative, proprietary process to convert waste plastics into renewable energy. Polymers are the most rapidly growing sector of the materials industry. No wonder polymers are found in everything from compact discs to high tech aerospace applications. On the basis of value added, Indian share of plastic products industry is about 0.5% of national GDP. Some of the astonishing fundamentals of the book are industrial polymers, addition polymers polyolefins, polyethylene, chlorinated polyethylene, cross linked polyethylene, linear low density polyethylene (LLDPE), high molecular weight polyethylene, high density polyethylene, ultrahigh molecular weight polyethylene, polypropylene, poly(vinyl chloride), stabilizers, plasticizers, extenders, mineral filled or glass bead/milled glass grades, antistatic/electro conductive grades, electroplatable grades, etc. The present book enlightens the processing of industrial polymers, additives, colourant and fillers. This book is an invaluable resource to new entrepreneurs, technocrats, researchers, professionals etc.

# Contents

## 1. INDUSTRIAL POLYMERS

### INTRODUCTION

### PART I: ADDITION POLYMERS

#### POLYOLEFINS

Polyethylene

Chlorinated Polyethylene

Cross-Linked Polyethylene

Linear Low-Density Polyethylene (LLDPE)

High-Molecular-Weight High-Density Polyethylene

Ultrahigh-Molecular-Weight Polyethylene

Polypropylene

Poly(Vinyl Chloride)

Stabilizers

Plasticizers

Extenders

Lubricants

Fillers

Pigments

Impact Modifiers and Processing Aids

Properties and Applications

Pastes

Poly(Vinylidene Chloride)

Polytetrafluoroethylene

Processing

Applications

Polyisobutylene

Polystyrene

Polybutadiene (Butadiene Rubber)

Polyisoprene

Polychloroprene

#### OLEFIN COPOLYMERS

Styrene-Butadiene Rubber

Nitrile Rubber

Ethylene-Propylene Elastomer

Butyl Rubber

Thermoplastic Elastomers

Styrene-Diene-Styrene Triblock Elastomers

Thermoplastic Polyester Elastomers

Thermoplastic Polyurethane Elastomers

Thermoplastic Polyolefin Elastomers

Ionic Elastomers

Fluoroelastomers

Styrene-Acrylonitrile Copolymer

Acrylonitrile-Butadiene-Styrene Terpolymer

Ethylene-Methacrylic Acid Copolymers (Ionomers)

Ionomers

#### ACRYLICS

Polyacrylonitrile

Polyacrylates

Polymethacrylates

Polyacrylamide  
Poly(acrylic acid) and Poly(methacrylic acid)  
Acrylic Adhesives  
VINYL POLYMERS  
Poly (Vinyl Acetate)  
Poly(Vinyl Alcohol)  
Poly(Vinyl Acetals)  
Poly(Vinyl Cinnamate)  
Poly(Vinyl Ethers)  
Poly(Vinyl Pyrrolidone)  
Poly(Vinyl Carbazole)  
PART II: CONDENSATION POLYMERS  
POLYESTERS  
Poly(Ethylene Terephthalate)  
Poly(Butylene Terephthalate)  
Poly(Dihydroxymethylcyclohexyl Terephthalate)  
Unsaturated Polyesters  
Polyester-Glass-Fiber Laminates (GRP, FRP)  
Polyester Molding Compositions  
Aromatic Polyesters  
Wholly Aromatic Copolyester  
Polycarbonates  
POLYAMIDES  
Aliphatic Polyamides  
Properties  
Applications  
Aromatic Polyamides  
Polyimides  
Modified Polyimides  
FORMALDEHYDE RESINS  
Phenol-Formaldehyde Resins  
Resols  
Novolac  
Urea-Formaldehyde Resins  
Molding Powder  
Processing  
Properties and Applications  
Melamine-Formaldehyde Resins  
POLYURETHANES  
Polyesters  
Polyethers  
Polycaprolactone  
Polyurethane Rubbers and Spandex Fibers  
Cross-Linked Polyurethane Rubbers  
(a) Prepolymer formation  
(b) Chain extension of prepolymer  
(c) Cross linking of chain-extended polyurethane  
Thermoplastic Polyurethane Rubbers  
Spandex Fibers  
Flexible Polyurethane Foam  
Applications  
Rigid and Semirigid Polyurethane Foams  
Polyisocyanurates

Polyurethane Coatings  
ETHER POLYMERS  
Polyacetal  
Poly(Ethylene Oxide)  
Applications  
Polyethylene Glycol  
Poly(ethylene Oxide)  
Poly [Propylene Oxide]  
Epoxy Resins  
Resin Preparation  
Curing  
Other Epoxies  
Applications  
POLY(PHENYLENE OXIDE)  
CELLULOSIC POLYMERS  
REGENERATED CELLULOSE  
Cellulose Nitrate  
Cellulose Acetate  
Other Cellulose Esters  
Cellulose Ethers  
PART III: SPECIAL POLYMERS  
Heat-Resistant Polymers  
POLY(PHENYLENE SULFIDE)  
POLYSULFONE  
Properties  
Polyether Ether Ketone  
Polybenzimidazole  
SILICONES AND OTHER INORGANIC POLYMERS  
Silicones  
Silicone Fluids  
Silicone Resins  
Silicone Rubbers  
Polyphosphazenes  
Polythiazyl  
FUNCTIONAL POLYMERS  
Ion-Exchange Resins  
Applications  
Polymeric Reagents  
Photoconductive Polymers  
Electroconductive Polymers  
Light-Sensitive Polymers  
Piezoelectric Polymers  
2. POLYETHYLENE, HIGH DENSITY (HDPE)

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.
