

# The Complete Technology Book on Polymers with Processing & Applications

**Author:** NIIR Board of Consultants & Engineers

**Format:** Paperback

**ISBN:** 8178330105

**Code:** NI181

**Pages:** 560

**Price:** Rs. 1,100.00 US\$ 29.73

**Publisher:** Asia Pacific Business Press Inc.

Usually ships within **5** days

Polymers are the most rapidly growing sector of the materials industry. No wonder polymers are found in everything from compact discs to high tech aerospace applications. The Indian plastic and polymer industry has taken great strides. In the last few decades, the industry has grown to the status of a leading sector in the country with a sizable base. The material is gaining notable importance in different spheres of activity and the per capita consumption is increasing at a fast pace. Continuous advancements and developments in polymer technology, processing machineries, expertise and cost effective manufacturing is fast replacing the typical materials in different segments with plastics. Monomers and polymers are of little or no practical use until the raw product from the manufacturing process been transformed by more or less standardized fabrication and processing techniques into useful forms. There are different methods of processing of polymers for solid; molding, extrusion, calendaring, sheet forming, laminating and impregnating and for liquids and melts; coating, expanding or foaming, casting, spinning, laminating and impregnating. Plastics are divided into thermosetting and thermoplastic materials. Compression and transfer molding are the two main methods used to produce molded parts from thermosetting plastics; however, injection molding is under development and may become important in future. Plastic foams are from a wide variety of polymers have a wide range of applications and are made by a variety of methods depending upon the polymer and the application. Elastomers are indispensable to our modern civilization, without them two of largest industries; transportation and electrical, would never have attained their present state of development. The reason why plastics are popular is that they may offer such advantages as transparency, self lubrication, light weight, flexibility, economy in fabricating and decorating. Properties of plastics can be modified through the use of fillers, reinforcing agents and chemical additives. Polymer Energy system is an award winning, innovative, proprietary process to convert waste plastics into renewable energy. On the basis of value added, Indian share of plastic products industry is about 0.5% of national GDP. Some of the fundamentals of the book are modified natural products, synthetic condensation products, melamine formaldehyde resins, aniline formaldehyde resins, miscellaneous amino plastics, sulfonamide formaldehyde resins, polyesters, saturated polyesters, linear polycarbonates, unsaturated polyesters, polymerized oils, synthetic addition products, aliphatic hydrocarbons and derivatives polyethylene, powder technology for coating of plastics, acrylic and polyurethane dispersions in industrial coatings for plastics, water borne coatings for plastics adhesion of water borne coatings on plastics, fabricating and processing, cold bending, hot bending, stretch forming, plug and ring forming, slip forming, drawing die pressing, roto forming, veneering, post forming, fluid pressure forming, vacuum forming methods, pressure forming methods, laminating and impregnating etc. Three factors are essential for any successful processing of polymers, namely materials, machinery and process control. Polymers have importance in manufacturing of various domestic and industrial products.

This book is an invaluable resource to new entrepreneurs, technocrats, researchers, professionals etc.

## Contents

### 1. INTRODUCTION

VIEWPOINT OF THE CONSUMER  
VIEWPOINT OF THE INDUSTRIAL DESIGNER  
VIEWPOINT OF THE FABRICATOR  
VIEWPOINT OF THE PHYSICAL CHEMIST  
VIEWPOINT OF THE ORGANIC CHEMIST  
VIEWPOINT OF THE CHEMICAL ENGINEER  
VIEWPOINT OF THE ECONOMIST

### 2. MODIFIED NATURAL PRODUCTS

CUPRAMMONIUM RAYON  
VISCOSE RAYON  
REGENERATED CELLULOSE FILM  
CELLULOSIC DERIVATIVES  
Cellulose Esters  
Cellulose Nitrate  
CELLULOSE ACETATE  
CELLULOSE PROPIONATE  
HIGHER CELLULOSE ESTERS  
MIXED ESTERS OF CELLULOSE  
CELLULOSE ETHERS  
METHYL CELLULOSE  
ETHYL CELLULOSE  
CARBOXYMETHYL CELLULOSE  
HYDROXYETHYL CELLULOSE  
CYANOETHYL CELLULOSE

### 3. SYNTHETIC CONDENSATION PRODUCTS

PHENOPLASTS  
Other Aldehydes  
OTHER PHENOLS  
FILLERS  
OIL-SOLUBLE RESINS  
CAST RESINS  
MANUFACTURE  
APPLICATIONS  
Urea-Formaldehyde Resins  
MELAMINE-FORMALDEHYDE RESINS  
ANILINE-FORMALDEHYDE RESINS  
MISCELLANEOUS AMINOPLASTS  
SULFONAMIDE-FORMALDEHYDE RESINS  
POLYESTERS  
Saturated Polyesters  
Linear Polycarbonates  
Unsaturated Polyesters  
Polymerized Oils  
Alkyd Resins  
Unsaturated Polyester Resins  
LINEAR POLYAMIDES

POLYURETHANES

SILICONES

POLYOXYMETHYLENES

POLYOXYETHYLENES

EPOXY RESINS

THIOPLASTS

FURAN RESINS

4. SYNTHETIC ADDITION PRODUCTS

ALIPHATIC HYDROCARBONS AND DERIVATIVES POLYETHYLENE

High-Pressure Process

Low-Pressure Process

Irradiated Polyethylene

Chlorosulfonated Polyethylene

POLYTETRAFLUOROETHYLENE

POLYCHLOROTRIFLUOROETHYLENE

POLYPROPYLENE

POLYBUTENES

Butyl Rubber

POLYSULFONES

POLY(VINYL ACETATE)

POLY(VINYL ALCOHOL)

POLY(VINYL CETALS)

POLY(VINYL AND VINYLIDENE ETHERS)

POLY (VINYL KETONES AND ALDEHYDES)

POLY(VINYLIDENE CHLORIDE)

VINYLIDENE CHLORIDE COPOLYMERS

POLYACRYLONITRILE

Vinylidene Cyanide

ALIPHATIC DIENES

Polyisoprene

POLYCHLOROPRENE

POLYBUTADIENE

Butadiene-Acrylonitril Copolymers

Butadiene-Styrene Copolymers

AROMATIC VINYL COMPOUNDS

Polystyrene

POLY(A-METHYL STYRENE)

POLY (VINYL TOLUENES)

POLY(DIVINYL BENZENES)

HETEROCYCLIC VINYL COMPOUNDS

poly(N-vinyl carbazole)

POLY(N-VINYL PYRROLIDONE)

POLY(VINYL PYRIDINES)

CYCLIC UNSATURATED COMPOUNDS

Coumarone-Indene Resins

POLYCYCLOPENTADIENE

POLYTERPENES

5. POWDER TECHNOLOGY FOR COATING OF PLASTICS

WHY POWDER COAT PLASTICS

EFFECT OF COSMIC RADIATION

RESISTANCE TO MECHANICAL WEAR

ELECTRICAL PROCESSING CHARACTERISTICS

IMPROVING WEATHER RESISTANCE

EXTERNAL POWDER DRAIN TREATMENT  
PRETREATMENT OF PLASTICS  
ELECTRICAL CHARACTERISTICS  
6. ACRYLIC AND POLYURETHANE DISPERSIONS IN INDUSTRIAL COATINGS FOR PLASTICS  
INTRODUCTION  
PLASTICS NEED COATINGS  
PROBLEMS WHEN PAINTING PLASTICS  
WATER-BORNE COATINGS FOR PLASTICS  
ADHESION OF WATER-BORNE COATINGS ON PLASTICS  
HARDNESS  
WATER RESISTANCE  
CHEMICAL AND SOLVENT RESISTANCES  
SELECTION OF PRODUCTS FOR WATER-BASED PLASTIC COATINGS  
CONCLUSIONS  
7. FABRICATING AND PROCESSING  
MOLDING  
Cold Compression Molding  
Hot Compression Molding  
Transfer Molding  
Injection Molding  
Jet Molding  
EXTRUDING  
CALENDERING  
SKIVING  
SHEET FORMING  
ATMOSPHERIC PRESSURE FORMING  
Cold Bending  
Hot Bending  
Stretch Forming  
Plug-and-Ring Forming  
Slip Forming  
Drawing  
Die Pressing  
Rotoforming  
Veneering  
Postforming  
FLUID-PRESSURE FORMING  
Vacuum-Forming Methods  
Pressure-Forming Methods  
LAMINATING AND IMPREGNATING  
Cellular Laminates  
COATING  
Surface Coatings  
Strippable Coatings  
EXPANDING  
CASTING AND EMBEDDING  
SPINNING  
FINISHING OF PLASTICS  
8. APPLICATION  
FIBERS  
PLASTICS  
Constructional Uses  
Thermal, Electrical, and Optical Uses

Ion Exchange  
Adhesives, Coatings, and Films  
ADHESIVES  
COATINGS  
FILMS  
ELASTOMERS

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
