

# The Complete Technology Book on Aluminium and Aluminium Products

**Author:** NPCS Board of Consultants & Engineers

**Format:** Paperback

**ISBN:** 8178330156

**Code:** NI186

**Pages:** 672

**Price:** Rs. 1,450.00 US\$ 150.00

**Publisher:** Asia Pacific Business Press Inc.

Usually ships within 5 days

Aluminium, the second most plentiful metallic element on the earth, became an economic competitor in engineering applications as recently as the end of 19th century. It was become a metal for its time. Aluminium possesses many characteristics that make it highly compatible with recycling. It is resistant to corrosion and it thus retains a high level of metal value after use, exposure, or storage. Once produced, it can be considered a permanent resource for recycling, preferably in to similar products. It is essentially a soft and weak metal which has to be strengthened by alloying with suitable elements. The elements which are added to aluminium in appreciable quantities to increase its strength and improve other properties are surprisingly limited to only four, namely, magnesium, silicon, copper and zinc. These are added singly or in combination. It is theoretically 100% recyclable without any loss of its natural qualities. It is the most widely used non ferrous metal. The applications of aluminium are grown in many fields for example; electric conductors, windows and building components, aircraft, foil packaging etc. It has a major role in packaging industry especially in pharmaceuticals. It includes different types of packaging; unit packaging, bunch wrapping, strip packaging, thermoformed unit packaging and sachets Aluminium alloys with a wide range of properties are used in engineering structures. Aluminium alloys are divided into two major categories; casting compositions and wrought compositions. Further differentiation for each category is based on the primary mechanism. The most commercially mined aluminium ore is bauxite, as it has the highest content of the base metal. The primary aluminium production process consists of three stages. First is mining of bauxite, followed by refining of bauxite to alumina and finally smelting of alumina to aluminium. India has the fifth largest bauxite reserves with deposits 5% of world deposits. Indian share in world aluminium capacity rests at about 3%; it will touch almost 13% to 15% of the growth rate.

This book basically deals with aluminium production, heat treatable and non heat treatable alloys, properties of cast aluminium alloys, testing of liquid & solidification contraction of aluminium alloys, trends in the improving economic use of aluminium, laboratory investigation of carbon anode consumption in the electrolytic production of aluminium, alumina extraction from a pennsylvania diasporic clay by an ammonium sulfate process, the recovery of alumina from its ores by a sulfuric acid process, initial softening in some aluminium base precipitation hardening alloys, basic properties of aluminium foil, how to select a flexible foil packaging laminate, printing on aluminium foil, designing aluminium foil packs etc.

The present book covers the need within the industrial and academic communities for up to date information about production of aluminium and extrusion process due to the ever increasing use of this technology. The book provides concepts in the different areas of extrusion technology. It is hoped that its presentation will be very helpful to new entrepreneurs, technocrats, research scholars, libraries and existing units.

## Contents

## 1. GENERAL INTRODUCTION

- Aluminium Production
- Production Statistics
- Aluminium Alloys
- Heat-Treatable and Non-heat-Treatable Alloys
- Properties
- Manufactured Forms
- Standardized products
- Engineered Products
- Finishes
  - Mechanical Finishes
  - Chemical Finishes
  - Electrolytic Finishes
  - Non-Electrolytic Coatings
- Product Classifications
- Building and Construction Applications
- Containers and Packaging
- Transportation
- Electrical Applications
- Consumer Durables
- Machinery and Equipment
- Other Applications

## 2. PROPERTIES OF CAST ALUMINIUM ALLOYS

### 3. PHYSICAL METALLURGY OF ALUMINIUM ALLOYS

Aluminium-Magnesium Alloys

Al-Si alloys

Al-Cu alloys

Hardness Data for Al-3.8% Cu Alloy

Aluminium-zinc alloys

Complex Alloys

Aluminium-Zinc-Magnesium Alloys

Al-Cu-Mg alloys

Al-Mg-Si alloys

Effect of Plastic Deformation on Precipitation

Intermetallic Compounds and their Effects

Corrosion of Aluminium Alloys

### 4. TESTING OF LIQUID & SOLDIFICATION CONTRACTION OF ALUMINIUM ALLOYS

1. Derivation of Correlations

2. Experimental procedure

### 3. Results and Discussion

#### 5. TRENDS IN THE IMPROVING ECONOMIC USE OF ALUMINIUM

1. Reduction in Dimensions and Weight
  2. More Efficient Use of Metal
  3. Improvements in Methods of Protection
  4. New Concepts in Design
- Corrosion Studies Applied to Roofing Sheet and Water Pipes  
Using Structural Aluminium Efficiently  
Aluminium Electrical Conductors  
Overhead Conductors  
Underground Cable  
Transformer Windings  
Development of Welding Techniques and Weldable Alloys  
Welding Processes  
Development of Alloys  
Conclusion

#### 6. LABORATORY INVESTIGATION OF CARBON ANODE CONSUMPTION IN THE ELECTROLYTIC PRODUCTION OF ALUMINIUM

- Introduction  
Materials  
Anode Carbon  
Electrolyte Materials  
Apparatus  
Procedure  
General  
Operation at Different Current Densities  
Operation at Different Temperatures  
Operation at Different Electrolyte Compositions  
Results  
Effect of Anode Current Density  
Effect of Electrolyte Temperature  
Effect of Carbon Baking Temperature  
Effect of Electrolyte Composition  
NaF/AlF<sub>3</sub> Ratio  
Alumina Content  
Calcium Fluoride Content  
Sodium Chloride Content  
Graphite and Coke  
Mechanism of Anode Consumption  
Erosion of Particles of Coke from the Active Anode Surface  
Formation of CO

#### 7. ALUMINA EXTRACTION FROM A PENNSYLVANIA DIASPORE CLAY BY AN AMMONIUM SULFATE PROCESS

- Introduction  
Related Literature  
Raw Material  
Procedure  
Results and Discussion  
Crushing and Grinding  
Mixing and Pelletizing

Roasting  
Leaching and Primary Crystallization  
Alum Purification  
Alumina Precipitation and Ammonium Sulfate Crystallization  
Conclusion

## 8. THE RECOVERY OF ALUMINA FROM ITS ORES BY A SULFURIC ACID PROCESS

Introduction  
The C.S.I.R.O. Process  
Synopsis of Process  
Experimental Procedures  
Extraction Efficiency  
Nature of Ore  
Particle Size  
Pulp Density and Liquor Concentrations  
Temperature  
Time  
Excess Acidity  
Control of Impurities  
Silica  
Titanium  
Other trivalent Metals  
Bivalent Metals  
Univalent Metals  
Phosphate  
Recycling Operations  
Digestionâ€™Modification  
Reduction

Acid Regeneration  
Calcination  
Liquid-Solid Separations  
Digestion  
Modification Residue  
Modified Liquor  
Hydrolysis  
Costing  
Raw Materials  
Energy  
Equipment

## 9. AN IMPROVED ALUMINIUM CONDUCTOR

Electrical Properties of Aluminium  
Experimental Work  
The PM-2 Conductor  
Corrosion Tests  
Earthing Tests  
Conclusion

## 10. INITIAL SOFTENING IN SOME ALUMINIUM BASE PRECIPITATION HARDENING ALLOYS

Experimental Procedure  
Preparation of Alloys  
Heat Treatment

Hardness Measurements  
X-ray Diffraction Studies  
Results  
Dissussion  
Quenched Hardness  
Extent of Softening  
Time to Reach Minimum Hardness  
Range of Softening  
X-ray line width  
Conclusion

## 11. BASIC PROPERTIES OF ALUMINIUM FOIL

Introduction  
Production of Aluminium  
Manufacture of Aluminium Foil  
Metal Purity  
Alloying  
Annealing  
Soft Foil For Flexible Packaging  
Safety of Foil For Food Packaging  
Strength  
Perforations or Pinholes  
Foil Costs  
Need For Standardization  
Future of Foil in Packaging

## 12. HOW TO SELECT A FLEXIBLE FOIL PACKAGING LAMINATE

Introduction  
Materials  
Physical Properties of Foil  
Physical Properties of Paper  
Physical Properties of Films  
Cellulose Film  
Polyamide (Nylon)  
Polyester (Terylene)  
Polythene  
Polypropylene  
PVDC  
Note  
Laminating Processes  
Wax  
Hot Melts  
Pastes  
Polythene  
Lacquers  
Characteristics of Laminates  
Physical Characteristics  
Economic Characteristics  
Briefing The Supplier  
Typical Foil Laminates  
For Sweets and Chocolates  
For Cakes and Biscuits  
For Dairy Trades  
For Toiletries

Miscellaneous

General

The Future

### 13. DESIGNING ALUMINIUM FOIL PACKS

Introduction

Package Design Factors

Co-ordination of Design Policy

The Corporate Image

Packaging for Export

Aspects of Designing with Aluminium Foil

Methods of Rendering

### 14. PRINTING ON ALUMINIUM FOIL

The Printing Processes Used

1. Gravure

2. Letterpress

3. Flexography

4. Offset Lithography

5. Silk Screen

Special Requirements for Printing Aluminium Foil

Advantages and Limitations of the Printing Processes Used

Technical Considerations

Gravure

Flexography

Letterpress

Offset Lithography

Silk Screen

Economic Considerations

Other Printing Processes

Web Offset Lithography

Electrostatic Printing

### 15. HEAT SEALING FOIL PACKS

Importance of Heat-sealing

Principles of Heat-sealing

Sealing Coated Aluminium Foils by Heat

Determination of Optimum Heat-sealing Conditions

Factors Controlling the Heat-seal Strength

Failure by Peeling

Paper/Foil Laminates

Types of Thermoplastic Coatings

Sealing Temperatures of Typical Foil Laminates

### 16. AUTOMATIC PACKAGING IN FOIL

### 17. LIQUID PACKAGING IN ALUMINIUM FOIL

Introduction

Marketing and Economic Considerations

1. Economics

2. Convenience

3. Presentation

Types of Foil Pack that are Formed, Filled and Sealed from the Reel

Sachets  
Two-cavity Sachets  
Production of Sachets  
Rectangular and Tetrahedral Packs Incorporating Aluminium Foil  
For Milk and Cream  
For Fruit Juice  
Gusseted Bottom Packs  
Other Liquids And Semi-liquids  
The Value of Foil In Sealable Laminates  
What of the Future?

## 18. ALUMINIUM FOIL IN PHARMACEUTICAL PACKAGING

Introduction  
Aluminium Foil as a Cap Liner Facing for Rigid Containers  
Unit Packaging  
Bunch Wrapping  
Strip Packaging  
Thermoformed Unit Packaging  
Sachets

## 19. STERILIZABLE ALUMINIUM FOIL FOOD PACKS

Introduction  
Reasons for Using a Processable Pouch  
Laminate Structure  
Pinhole Damage in Foil  
Sterilizing Techniques  
Filling and Sealing Pouches  
Pouch Integrity  
Microbiological Aspects  
Storage Testing and Heat Penetration  
The Commercial Situation  
Summing-up

## 20. BENEFICIATION OF BAUXITE

Experimental Procedure and Results  
Evaluation of the Economics of Bauxite Beneficiation  
A Proposed Scheme for Beneficiation by Dry Screening

## 21. ALUMINIUM IN ENGINEERING

Transport Industry  
Air  
Road  
Rail  
Marine  
Automobile Ancillaries  
Airconditioning and Refrigeration  
Bearings  
Electrical Machinery  
Construction Industry  
Mining Industry  
Other Applications

## 22. ALUMINIUM DIE CASTINGS IN AUTOMOBILES

Automotive Applications  
Recent Trends for Bigger Automotive Castings  
Aluminium Die Castings in Indian Automobile  
Conclusion

## 23. NON-FUSION JOINING OF ALUMINIUM

Soldering  
Joint Design  
Soldering Methods  
Friction Soldering  
Flux Soldering  
Organic Flux Soldering  
Chloride Fluxes  
Reaction Soldering  
Selection of Solders  
Soft Soldering  
Hard Solders  
Brazing  
Joint Types  
Performance of Joints  
Typical Applications  
Cold Pressure Welding  
Pressure Welding Technique  
Butt Welding  
Lap Welding  
Applications  
Ultrasonic Joining  
Explosive Joining

## 24. SELECTIVE ABSORPTION OF FLUORINE FROM THE GASES FROM ALUMINIUM REDUCTION CELLS WITH VERTICAL SPIKE SODERBERG ANODES

Introduction  
Theoretical Analysis  
General Principles of Selective Absorption of Hydrogen Fluoride  
A Continuous Process Based on Controlled Addition of Alkali  
General Description  
Absorption of Hydrogen fluoride  
Absorption of Sulfur Dioxide  
Process Working with Pure Water as Absorbent  
General Considerations  
Absorption of Hydrogen Fluoride  
Absorption of Sulfur Dioxide  
Pilot Plant Investigations  
General  
Process with Controlled Alkali Addition  
Process Using Pure Water  
Comparison of the Two Processes  
Further Development of the Pure Water Process  
General Considerations  
A New Type of Gas Washer, Combining a very High Absorption Efficiency for Hydrogen Fluoride with Complete Selectivity and a High Dust Removal Efficiency  
Results of Technical Scale Operation

## 25. THE FLUORINE PROBLEM IN ALUMINIUM PLANTS

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
