

# Handbook on Pulp and Paper Processing

**Author:** NPCS Board of Consultants & Engineers

**Format:** Hardcover

**ISBN:** 9788178331140

**Code:** NI212

**Pages:** 704

**Price:** Rs. 1,875.00    **US\$** 50.67

**Publisher:** Asia Pacific Business Press Inc.

Usually ships within **5** days

The pulp and paper industry comprises companies that use wood as raw material and produce pulp, paper, board and other cellulose based products. The pulp and paper sector presents one of the energy intensive and highly polluting sectors within the Indian economy and is therefore of particular interest in the context of both local and global environmental discussions. Increases in productivity through the adoption of more efficient and cleaner technologies in the manufacturing sector will be most effective in merging economic, environmental, and social development objectives. Papers are mostly used product starting from writing to packaging. It plays an important role in commercial field as well as in academic field also. Without paper nothing is expressible and reliable, so paper is part and parcel of our life. Adequate amount of raw materials for processing paper and pulp is available. Bamboo is the main raw material for Indian paper industry. New bamboo areas even at high cost are being trapped. Some of the examples of high yield pulping process are mechanical process, semi chemical process, alkaline chemical process, sulfite process, etc. Physical strength properties of paper depend on the quality of raw material, its pulping, bleaching and subsequent paper making processes. Technology has made it easy to process these raw materials in an economic and lucrative way to meet the global demand. Raw materials like, straw, bagasse, wood, bamboo is almost available in most of the places. So it is great opportunity for the entrepreneurs to start up such kind of industry. Paper Industry has tremendously increased in India in the last 20 to 30 yrs. The Paper industry is a priority sector for foreign collaboration and foreign equity participation up to 100% receives automatic approval by Reserve Bank of India. Several fiscal incentives have also been provided to the paper industry, particularly to those mills which are based on non conventional raw material.

Some of the fundamentals of the book are bleaching of bamboo cold, high yield semi chemical pulping of mixture of bamboo and mixed hardwoods, sulphate semi chemical process, kraft green liquor semi chemical process, neutral sulphite semi chemical process, thermo mechanical pulps for newsprint, zeta potential concept in paper sizing, sodium carbonate in alkali extraction during bleaching bamboo, maintenance engineering in pulp and paper industry, design and application of refiners in stock preparation, paper machine effluent etc.

This book explains about the various raw material, their processing and utilizations and also the possible waste treatment of such paper and pulp making industry. To draw attention for manufacturing quality product with all possible latest technologies is the main purpose of this book. The book is very resourceful for new entrepreneurs, technocrats, existing units and research scholars.

## Contents

- 1. BLEACHING OF BAMBOO COLD  
SODA PULPS  
Results and Discussions

Constant Conditions  
 Pretreatment with Acid  
 Pretreatment with Alkali  
 Bleaching Conditions in Different Stages  
 Effect of Peroxide in Alkali Pretreatment  
 Pretreatment with Dye  
 Bleaching Conditions in Different Stages  
 Conclusions  
 Experimental  
 Raw Materials  
 Bleaching  
 2. HIGH YIELD SEMI-CHEMICAL PULPING OF  
 MIXTURE OF BAMBOO AND  
 MIXED HARDWOODS  
 Raw Material  
 Experimental and Results  
 Sulphate Semi-Chemical Process  
 Kraft Green Liquor-Semi-Chemical Process  
 Neutral Sulphite Semi-Chemical Process  
 Discussion  
 Sulphate Semi-Chemical Process  
 Green Liquor Semi-Chemical Process  
 Neutral Sulphite Semi-Chemical Process  
 Conclusion  
 3. DEVELOPMENT IN HIGH YIELD PULPING PROCESS  
 Mechanical Process  
 Semichemical Process  
 Chemical Process  
 Alkaline Chemical Process  
 Sulfite process  
 Organic Catalyst to High Yield Pulping  
 AQ Pulping Technology  
 Polysulfide-AQ Process  
 Alkaline Sulfite-AQ Pulping  
 Experimental  
 4. THERMO-MECHANICAL PULPS FOR NEWSPRINT  
 MANUFACTURE FROM TROPICAL PINES  
 Raw Materials  
 Experimental  
 Preparation of Thermo-Mechanical Pulps  
 Results and Discussions  
 5. A STUDY ON REPLACEMENT OF SODIUM  
 SULPHATE BY AQ-LARGE SCALE TRIAL  
 Anthraquinone an Aid to Pulping  
 Laboratory Scale Investigations at Central Research Laboratory, Dalmianagar  
 Plant Trial with AQ  
 Evaluation of Mill Pulp  
 Discussion and Results  
 Conclusions  
 6. ZETA POTENTIAL CONCEPT IN PAPER SIZING  
 Electro Kinetic (Zeta) Potential-A Concept  
 The Theory of Electrical Double Layer  
 Stern's Modified Double Layer

The Meaning and Limitations in the Application of  
 Electro Kinetic Theory  
 to the Paper Sizing  
 Behaviour of Alum in Water  
 Electro Kinetic Properties of Alum-rosin  
 Size Precipitate and the Sized Fibre  
 Conclusion  
 Nomenclature  
 Greeks  
 7. ECONOMICS OF BAMBOO AND HARDWOOD PULPING  
 BY ANTHRAQUINONE CATALYSED-KRAFT-PROCESS  
 Experimental Design & Observations  
 Results & Discussions  
 Conclusion  
 8. EFFECT OF BLEACHED PULP VISCOSITY ON STRENGTH  
 PROPERTIES OF BAMBOO SULFATE PULP  
 Experimental  
 Pulping  
 Bleaching  
 Physical Strength Properties  
 Chemical Analysis  
 Observations and Discussions  
 Conclusion  
 9. ALKALI/OXYGEN DELIGNIFICATION AND  
 BLEACHING OF SODA BAMBOO PULP  
 Experimental  
 Discussions  
 Conclusions  
 10. ALKALI/OXYGEN DELIGNIFICATION AND BLEACHING  
 OF SODA BAMBOO PULP, BAMBOO + MIXED HARD  
 WOOD PULP (70 : 30) AND MIXED HARDWOOD PULP  
 Experimental and Results  
 Discussions  
 Conclusion  
 11. SODIUM CARBONATE IN ALKALI EXTRACTION DURING  
 BLEACHING BAMBOO (D. STRICTUS) PULP  
 Experimental  
 Study on Sequentially Chlorinated (H/C) Pulp  
 Study on Chlorinated Pulp  
 Results and Discussion  
 Conclusions  
 12. EFFECT OF HEMICELLULOSES ON  
 UNBLEACHED SOFTWOOD KRAFT PULP  
 Materials and Methods  
 Enzyme Treatments  
 Bleaching Experiments  
 Chemical Composition and Kappa Number Analyses  
 Microscopic Analysis  
 Numerical Measurement of Colour  
 Results and Discussion  
 Chemical Changes After Enzyme Treatment  
 Bleaching Experiments  
 Graff's Stain

Numerical Measurement of Colour  
 Accessibility Changes and Simonsâ€™ Stain  
 Deuterium Oxide Exchange  
 Simonsâ€™ Stain  
 Conclusions  
 13. THERMODYNAMIC FUNCTIONS OF THE  
 REACTION BETWEEN LIGNIN AND  
 HYDROGEN PEROXIDE DURING BLEACHING  
 Experimental  
 Isolation of Thioglignin  
 Preparation of Hydrogen Peroxide Solution  
 Reaction of Thioglignin with Hydrogen Peroxide  
 Results and Discussion  
 Analysis of Kinetic Data  
 Order of the Reaction and Variation of Rate  
 Constant with Reaction Parameters  
 Validity of Arrhenius Equation (Reaction Rates and  
 Temperature Changes)  
 Estimation of various Thermodynamic Functions  
 Conclusions  
 14. SEQUENTIAL BLEACHING  
 Experimental Procedure  
 Discussions of the Results  
 Bleach Consumption  
 Physical and Chemical Properties  
 Pollution Load of the Filtrate  
 Conclusion  
 15. MANUFACTURE OF CORRUGATING MEDIUM PAPER  
 UTILIZING 100% BAGASSE FURNISH  
 Process Suggested for Making  
 Corrugating Medium from 100% Bagasse  
 Fibre Preparation  
 Depithing at Paper Mills  
 Digestion Cycle  
 Stock Preparation  
 16. EFFECTIVE UTILIZATION OF CHEMICALS IN  
 PULP AND PAPER MILLS  
 Digester House  
 Chemical Recovery Section  
 Bleach Plant  
 Chemical and Stock Preparation  
 Effluents  
 17. EFFECTIVE USE AND RECOVERY OF  
 CHEMICALS IN COLD SODA PULPING  
 Experimental  
 Chemical Treatment of E. Tereticornis  
 Eta Reed Sulphate Pulping  
 Evaporation and Burning Properties of Kraft and  
 Cold Soda Spent liquors  
 Results and Discussions  
 Chemical Consumption  
 Pulp Properties  
 Composition of Liquors

Pollution Loads  
Properties of Spent Liquors  
Material Balances  
Conclusions  
18. EFFECTIVE USE AND RECOVERY OF CHEMICALS IN  
COLD SODA PULPING WITH PARTIALLY CLOSED SYSTEM  
Chemical Treatment of E. Tereticornis  
Results and Discussions  
Conclusions  
19. MAINTENANCE ENGINEERING IN PULP  
AND PAPER INDUSTRY  
Inspection  
Lubrication  
Servicing  
Maintenance Problems  
20. LIMITATION TO SATISFACTORY OPERATION OF  
WET END OF PAPER MACHINE  
Basis Weight Profile  
Head Box Pulsation  
Drainage Formation and Sheet Structure  
The Head Box  
Rectifier Roll Head Boxes  
Micro Turbulence Head Boxes  
Web Formers  
Twin Wire Forming  
Schmidt Classification  
Norman Classification  
High Consistency Forming  
Ancillary Equipments  
Wet Web Strength  
Limitations of Water Removal on Pressing  
Conclusion  
21. DESIGN AND APPLICATION OF REFINERS  
IN STOCK PREPARATION  
Conical Refiners  
Shallow Angle Refiner  
Steep Angle Refiners  
Double Disc Refiners  
Safety Devices  
Influence of Machine Variables on Refining  
Batch Refining  
Machine Refiners  
22. WET FELT DESIGNING TECHNIQUES  
Pressing  
Case Study  
Recommendations  
23. MODERNIZATION AND OPTIMUM UTILIZATION OF  
EVAPORATORS FOR HARDWOOD BLACK LIQUORS-MILL  
EXPERIENCE  
Hardwood Black Liquors  
Recovery Boilers and Required Liquor  
Solids  
Original Evaporator Units

Installation of a Pump in Between First  
Pass and Second Pass of Concentration Effects of  
Both Units  
Conversion of Concentration Effect of  
First (OLD) Unit to a Finisher  
Introduction of a New Finisher Effect  
Utilization of Vent Vapour from Finisher  
Changing the Liquor Entry from Tangential to Radial and  
Modification of Flash Chamber  
Utilization of Vapour from Improvised Finisher of  
Old Street  
Conclusions

#### 24. PAPER MACHINE EFFLUENT

Experimental  
Discussions  
Mode of Treatment for Paper Machine Effluent  
Results  
Conclusion

#### 25. CONICAL REFINERS AND WIDE-ANGLE REFINERS IN CONTINUOUS AND BATCH REFINING SYSTEMS FOR BAMBOO AND HARDWOOD FURNISH

Introduction  
Types of Refining Systems in the Mill  
Conical and Wide Angle Refiners Strength, Development and Power Consumption

#### 26. USE OF “NO PICK”™ ROLL IN PAPER MACHINE PRESS SECTION BASED ON SHORT-FIBRED TROPICAL HARDWOODS AND AGRICULTURAL RESIDUES

Theoretical Considerations  
The Problem  
Press Section Before Modification  
Press Section After Modification

Discussion  
Conclusions

#### 27. CONSUMPTION OF FURNACE OIL IN RECOVERY BOILERS

Storage  
Viscosity  
Velocity  
Turbidity & Causticity  
Silica  
Inverse Solubility

#### 28. NECESSITY TO RENOVATE AND MODERNIZE PAPER MACHINE

Fourdrinier Part  
Press Part  
Dryer Section  
Calender Stacks  
Pope Reel  
Conclusion

#### 29. WET END OPERATION OF A PAPER MACHINE

Approach Flow  
Head Box

The Slice  
Approach System, Head Box and Slice at W.C.P.M.  
Sheet Formation and Drainage on the Fourdrinier  
Shake  
Suction Boxes  
Dandy Roll  
The Couch  
Conclusion  
30. CLEANING SYSTEM-SHOWER FOR PAPER MACHINE  
Mechanical Cleaning  
Classification of Water Shower  
Wire Cleaning Shower  
Knock off Shower  
Trim Knock-off Shower  
Couch Roll Cleaning Shower  
Return Roll Cleaning Shower  
Dandy Cleaning Shower  
Felt Shower  
Special Features of Water Showers  
Material of Construction  
Insert Type Nozzle  
Protective Shell  
Programming  
Filters  
31. SUITABILITY OF KENAF CTMP FOR LINERBOARD  
Experimental  
Raw Material  
Particle Size  
Reduction and Washing  
Injection Process  
Fiberizing and Refining  
Kraft Pulping  
Pulp Testing and Handsheet Formation and Testing  
Results and Discussion  
Andritz Sprout-Bauer Pulping Trials  
FPL Pulping Trials  
Kenaf and Loblolly Pine Pulp Blends  
Conclusions  
32. NEWSPRINT FROM BLENDS OF KENAF CTMP  
AND DEINKED RECYCLED NEWSPRINT  
Experimental  
Results and Discussion  
Conclusion  
33. FEASIBILITY OF USING KENAF  
CHEMITHERMOMECHANICAL PULP IN  
PRINTING AND WRITING PAPER  
Results and Discussion  
Andritz Sprout-Bauer and FPL Pulping Trials  
Postbrightened Kenaf Thermomechanical Pulp  
Conclusions  
Experimental  
Raw Material, Particle Size Reduction, and Material Wash  
Injection Process

Fiberizing and Refining Process

Testing of Pulp and Forming and Testing of Handsheets

Postbrightening of Kenaf TMP

Brightness Reversion

#### 34. MESTA/KENAF AS RAW MATERIAL FOR KRAFT PULPING

Raw Material

Experimental

Chemical Constituents of Mesta

Pulping and Sheet Making

Discussion

Physical Characteristics

Chemical Constituents

Pulping Bleaching and Black Liquor Characteristics

Morphological Studies

Properties of Pulp Sheets

Fibre Classification Results

Conclusions

#### 35. RESPONSE OF KENAF VARIETY, HC-583

TO DIFFERENT LEVELS OF NITROGEN

Materials and Methods

Results and Discussion

Plant Height

Basal Diameter of Stalk

Dry Yield of Stalk

Increase in Dry Yield of Stalk per Kg. N Applied

Conclusion

#### 36. PREHYDROLYSED KRAFT COOKING OF

JUTE STICK (EFFECT OF PREHYDROLYSIS CONDITION)

Experiments

Raw Materials

Digestion

Bleaching

Chlorine Water Bleaching

Analysis of the Pulp

Results & Discussion

A. Effect of Prehydrolysis Treatment on the Chemical Composition of Jute Stick

B. Loss of  $\alpha$ -Cellulose and Lignin after Prehydrolysis and Kraft Cooking of Jute Stick

Results of Bleached Pulps

Conclusions

#### 37. HIGH YIELD PULP FROM JUTE STICKS

#### 38. GREASE PROOF PAPERS FROM SULPHITE JUTE STICK PULP

Raw Material

Pulping

Conclusion

#### 39. CHEMICAL RECOVERY BOILERS FOR PULP MILLS

USING AGRICULTURAL RESIDUES AS RAW MATERIALS

Present and Future Prospects of Agricultural Residue Usage in India

Advantages of Use of Agricultural Residues

Special Shelter Type Design for Smaller Units

#### 40. PROBLEMS IN BL EVAPORATION IN INDIAN RAW MATERIALS

Black Liquor Screening

Black Liquor Soap Problem

Carbonaceous Deposits

Scale Formation and its Removal

Results Achieved

Technical

Vapour Side Scale

Method of Feeding Black Liquor

Mixed Feed

Quintuple Effect & Forced Circulation Evaporator

Forced Circulation Evaporator

#### 41. UTILIZATION OF UNCONVENTIONAL RAW MATERIALS

Advantages at a Glanceâ€™for New Process

Cooking Liquor and Position of pH (Cold) during Pulping

Pulping Conditions and Delignification

Yield and General Properties of Pulp

Chemical Composition of Unbleached Pulp

Bleaching of Pulp

Paper Making Properties

Black Liquor and Recovery

Environmental Protection

Air Protection

Water Protection

Future Looks

Sulfite Shuttles into Space

#### 42. UTILIZATION OF AGRICULTURAL RESIDUES USING

##### MECHANO-CHEMICAL PULPING PROCESS

Pilot Plant Trials at Cellulose and Paper Branch,

Forest Research institute and colleges, Dehradun

Production of Rice Straw Pulp

Production of Wheat Straw Pulp

Production of Bagasse Pulp

Production of Paper

Mechano Chemical Pulping on Industrial Scale

Chemical Preparation

Cooking

Search for Alternative Raw Material

Variables in the Process

Modification of Bagasse Pulping by Partial Replacement of

Sodium Hydroxide by Sodium Carbonate

Addition of Sodium Sulphide in Cooking Liquor in

Bagasse Pulping

Conclusion

#### 43. FEASIBILITY OF RECYCLED NEWSPAPERS HARDBOARDS

Experimental Design and Analysis

Materials

Processing

Acetylation

Adhesive Application

Board Manufacture

Testing

Results and Discussion

Static Bending Properties

Tensile Strength Properties

Water Absorption and Thickness Swell

Linear Expansion

Concluding Remarks

#### 44. RESTORING BONDING STRENGTH TO RECYCLED FIBERS

Dry-Fiberized Fiber Characteristics

Mechanical Treatment

Fractionation

Strength Additives

Chemical Treatments

Blending with Virgin Fiber

Papermaking Variables

Wet-Formed Papers

Pressing

Air-Formed Papers

Conclusions

Methods and Materials

#### 45. CHEMICAL MODIFICATION OF AGRO-FIBER FOR THERMOPLASTICIZATION

Experimental Procedures

Esterification Procedure

Thermal Analysis

Pressing of Esterified Fiber

Electron Microscopy of Pressed Fiber

Swelling of Pressed Fiber in Water

Results and Discussion

Esterification of Lignocellulosics

Thermal Analysis

Swelling of Pressed Fiber Pellets in Water

Conclusions

#### 46. POTENTIALS FOR COMPOSITES FROM JUTE AND

ALLIED FIBERS

Plant Utilization for Composites

Potential Composites for Agro-Resources

Geotextiles

Filters

Sorbents

Structural Composites

Non-structural Composites

Molded Products

Packaging

Combinations with Other Resources

Chemical Modification for Property Improvement

Conclusions

#### 47. AN APPROACH TO "INPLANT COLOUR REDUCTION"™ OF BLEACH PLANT EFFLUENT USING CALCIUM

HYPOCHLORITE

Experimental

Discussion

#### 48. DESILICATION OF SULPHATE WEAK BLACK

LIQUOR BY THE ADDITION OF LIME

Experimental

Procedure of Desilication

Results & Discussion

#### 49. TREATMENT OF PULP & PAPER MILL WASTES

Pulp and Paper Industry Water

Consumption

Nature and Effect of Impurities  
 Primary Treatment  
 Sedimentation Units  
 Sludge Handling & Disposal  
 Secondary Treatment  
 50. DECOLOURIZATION OF WASTE WATER  
 FROM BLEACHED-KRAFT PULP & PAPER  
 MILL USING ALUM AND CLAY  
 Materials and Methods  
 Results and Discussion  
 Sludge Blanket  
 Effluent Quality  
 Colour Removal  
 Removal of Suspended Solids  
 COD Reduction  
 Conclusion  
 51. REMOVAL OF SOLUBLE SILICA FROM  
 SULPHATE GREEN LIQUOR  
 Experimental  
 Carbonation  
 Green Liquor Analysis  
 Results & Discussion  
 52. TRENDS IN ASH CONTENT OF STRAW  
 PULPS-AN EXPLANATION  
 Experimental  
 53. MINI LIME TREATMENT OF DISSOLVING  
 PULP MILL COLOURED EFFLUENT  
 Sources of Colour in the Pulp Mill  
 Effluent  
 Present Work  
 Chlorination of Lime Treated Effluent  
 Calcining of Effluent Sludge  
 Causticization Using Lime Obtained from Effluent Sludge  
 Conclusion  
 54. COLOUR AND COD REDUCTION OF  
 BLEACH EFFLUENTS  
 Experimental  
 Results and Discussions  
 Colour of the Effluents  
 Phenolic Compounds  
 Rate of Colour Reduction  
 Chemical Oxygen Demand  
 Conclusions  
 55. EFFECT OF pH ON SULPHITE PULPING OF  
 HOLOCELLULOSE OF E. TERETICORNIS  
 Experimental  
 Preparation of Cooking Liquor  
 Titration of Cooking Liquor  
 Sulphite Pulping  
 Neutral Sulphite Pulping  
 Preparation of Cooking Liquor  
 Chemical Analysis of Sulphite and  
 Neutral Sulphite Cooked Holo cellulose

Results and Discussion Effect of pH and  
 Cooking Time on Yield  
 Effect of pH and Cooking Time on Klason Lignin  
 Effect of pH and Cooking Time on Alpha-Cellulose  
 Effect of pH and Cooking Time on  
 Pentosans  
 Effect of pH and Cooking Time on  
 Acidic Sugar  
 Effect of pH and Cooking Time  
 On Methoxyl and Acetyl Groups  
 56. UTILIZATION OF AGRICULTURAL RESIDUES  
 FOR PULP, PAPER AND BOARD  
 Rice Straw  
 Writing and Prints Paper  
 Grease Proof Paper  
 Wrapping Paper  
 Straw Board  
 Fibre Boards  
 Wheat Straw  
 Writing & Printing Paper  
 Greaseproof Paper  
 Straw Board  
 Jute Sticks  
 Writing and Printing Paper  
 Wrapping Paper Pulp Yield and Sheet Characteristics  
 Straw Board  
 Newsprint Grade Refiner Groundwood Pulp  
 Constitution of Hemicellulose  
 Greaseproof Paper, Strength Properties of Standard Sheet  
 Building Board  
 Bagasse  
 Writing and Printing Paper  
 Wrapping Papers  
 Rayon Grade Pulps  
 Greaseproof paper  
 Straw Board  
 Fiber Board  
 Newsprint

 Writing and Printing Paper  
 Miscellaneous Raw Materials  
 Arecanut Husk  
 Ground Nut Shells  
 Tea Stem  
 Caster Stems (*Ricinus Communis*, linn)  
 Sun Flower Stalk  
 Arhar Sticks (*Cajanus SP*) and Jawar Stalk (*Sorghum SP*)  
 Sugar Cane Leaves  
 Paddy Husk  
 57. PROVISION OF CAPTIVE POWER GENERATION IN  
 A 30 TPD AGRO-BASED PAPER PLANT AS A MEANS OF  
 IMPROVING CAPACITY UTILIZATION  
 Capacity Utilization

- Power Availability
- Captive Power Plant
- Recommended Scheme
- Features of the Scheme
- Fixed Costs
- Variable Costs
- Average Cost of Power Generation
- Economics and Discussion
- Conclusion
- 58. ENERGY CONSERVATION IN PULP AND PAPER INDUSTRYâ€™SOME THOUGHTS
- Paper Industry
- Deliberations
- Total Energy Concept
- In-Plant Power Generation
- Energy Distribution and Utilization
- Overdesign and Capacity Utilization of the Equipment
- Energy Audit
- Short Term-Long Term Action Programme
- Short Term Schemes
- Long Term Schemes
- Generation
- Short Term
- Long Term
- Transmission
- Short Term
- Long Term
- Utilization
- Short Term
- Long Term
- Waste Streams
- Energy Conservation Approaches
- Factor Affecting Energy Efficiency
- Research and Development
- National Energy Programme
- Summary and Conclusions

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study,

Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
