

The Complete Book on Rubber Chemicals

Author: NPCS Board of Consultants & Engineers

Format: Paperback

ISBN: 9788178331218

Code: NI220

Pages: 672

Price: Rs. 1,575.00 **US\$** 42.56

Publisher: Asia Pacific Business Press Inc.

Usually ships within **5** days

Rubber Chemicals are essential additives for the manufacture and quality improvement of rubber products such as automobile tires, rubber hoses, and quake absorbing rubbers. For rubber processing and compounding certain chemicals are required which are known as rubber chemicals. The primary requirement of adding different compounding ingredients to develop the different grades of rubber compounds to meet various service needs at an economic price and to provide certain desired physical properties to a considerable extent. Some of the examples of rubber chemicals are waxes, amines, thiazoles, silicone resins, alcohol, sulphuric acids, dithiocarbamates, phosphoric acid etc. They are mostly applicable for white and coloured rubber. They are generally used in rubber tubing, conveyor belt cover balloons, hot water bottles injection bottle caps, footwear related items etc. Indian rubber chemical industry has high growth potential triggered by increased consumption and steady growth in tyre and rubber industries. The speciality chemicals industry in India is projected to grow at 15-17 % per year to reach \$ 80-100 billion by 2020. The demand for rubber chemicals is on the rise. All major manufacturers have raised the prices of their products substantially. Massive investment is expected to flow into the rubber chemicals manufacturing sector in India in the coming years from both domestic and global players.

The book covers different types, physical and chemical properties, applications of different rubber chemicals like waxes, synthetic organic chemicals, amines, silicones resins, releasing agents, stabilizers, solvents and many more. Some of the fundamentals of the book are synthetic hydrocarbon waxes, uses of amines in polymers, synthetic organic chemicals, analysis of specific anti-degradants, stabilization of halogenated polymers, anaerobic fermentations, the manufacture of sulfuric acid, analysis of dithiocarbamate esters, sodium hyposulfite (hydrosulfite), citric acid, gluconic acid, acetic acid, itaconic acid, kojic acid etc. Rubber chemicals have a huge potential growth in future and considering the importance of the chemical we have brought out this book which will be an invaluable resource to rubber chemical manufacturers, technocrats, researchers, consultants and new entrepreneurs.

Contents

1. Waxes

Petroleum Waxes

Paraffin Waxes

Microcrystalline Waxes

Uses

Test Methods

Safety

Natural Waxes

Vegetable Waxes

Animal Waxes
Mineral Waxes
Synthetic Waxes
Synthetic Hydrocarbon Waxes
Miscellaneous Synthetic Waxes
2. Amines
Physical Properties
Chemical Properties
Manufacture
Uses of Amines in Polymers
Catalysts
Solvents
Emulsifiers
Compounding and Finishing
3. Thiazoles
Antifungal Activity
4. Synthetic Organic Chemicals
Chemicals Derived from Methane
Synthesis Gas
Chlorinated Methanes
Acetylene
Carbon Disulfide
Chemicals Derived from Ethylene
Polyethylene
Ethylene Oxide
Chlorinated Hydrocarbons
Ethanol
Ethylbenzene
Acetaldehyde, Acetic Acid, Vinyl Acetate
Ethylene Oligomers
Chemicals Derived from Propylene
Isopropyl Alcohol
Polypropylene
Acrylonitrile
Propylene Oxide
Dodecene, Nonene, Cumene
Oxochemicals
Glycerine
Butanes, Butylene, LPG and Higher Aliphatic Hydrocarbons
LPG and n-Butane
Isobutane
n-Butylenes
Isobutylene
n-Pentane and Cyclopentane
Isopentane
n-Paraffins, Monoolefins, Primary and Secondary Higher Alcohols
Aromatic Chemicals
Benzene Products
Toluene Products
Chemicals from Xylene
Naphthalene Chemicals
Other Polymethylbenzenes
5. Silicone Resins

Manufacture
 Surfactants and Specialties
 Emulsions
 Greases and Compounds
 Surfactants
 Primers and Adhesion Promoters
 6. Silicone Fluids
 Silicone Elastomers
 Azine and Related Dyes
 Methods of Manufacture
 Commercial Grade and Specifications
 Methods of Analysis
 Identification
 Assay Methods
 Application Methods
 Determination of Impurities
 7. Antioxidants and Antiozonants
 Testing and Evaluation Methods
 Antioxidants
 Antiozonants
 General Methods of Analysis
 Separation and Identification
 Gas Chromatography
 Paper Chromatography
 Adsorption Chromatography
 Thin-Layer Chromatography
 Color Tests for Antidegradants
 Spectrophotometric Identification of Antidegradants
 Quantitative Determination
 Analysis of Specific Antidegradants
 N-Phenyl-2-Naphthylamine
 Separation and Identification
 Assay Methods
 Determination in Mixtures
 Acetone-diphenylamine Reaction Products
 Separation and Identification
 Assay Methods
 Determination in Mixtures
 1,2-Dihydro-2,2,4-trimethyl-6-ethoxyquinoline
 N-1,3-Dimethylbutyl-N-phenyl-p-phenylenediamine
 Separation and Identification
 Assay Methods
 Determination in Mixtures
 N,N-Di-(3-(5-methylheptyl)-p-phenylenediamine
 Separation and Identification
 Assay Methods
 Determination in Mixtures
 2,6-Di-tert-butyl-p-cresol
 Separation and Identification
 Assay Methods
 Determination in Mixtures
 Polygard
 Separation and Identification

- Assay Methods
- Determination in Mixtures
- Release Agents
- Properties Required
- Methods of Application
- Industrial Fields using Abherents
- Classes of Release Agents
- 8. Stabilizers
 - Methods
 - Stabilization of Polyolefin Resins
 - Stabilization of Halogenated Polymers
 - Commercial Stabilizer Materials and Mixtures
 - Epoxides
 - Miscellaneous Special-Purpose Stabilizers
- 9. Alcohol
 - Fermentation
 - Anaerobic Fermentations
- 10. Nitrogen Compounds
 - Ammonia Synthesis
 - Uses of Ammonia
 - Storage and Transport
 - Nitric Acid
 - Production
 - Uses of Nitric Acid
 - Ammonium Nitrate
 - Hexamethylenetetramine
 - Hydrazine
 - Manufacture
 - Stabilization
 - Urea
 - Uses of Urea
 - Hydrogen Cyanide
 - Acrylonitrile
 - Melamine
 - Amines
 - Aniline
 - Isocyanates
 - Other Nitrogen Compounds
- 11. Sulfuric Acid
 - Uses of Sulfuric Acid
 - Kinds of Acid
 - The Manufacture of Sulfuric Acid
 - Development of the Sulfuric Acid Industry in the United States
 - The Chamber Process for Making Sulfuric Acid
 - The Contact Process
 - Sulfur
 - Uses
 - Sources
- 12. Dithiocarbamates
 - Dithiocarbamic Acid Salts
 - Analysis of Dithiocarbamate Salts
 - Dithiocarbamate Esters
 - Analysis of Dithiocarbamate Esters

Thiuram Disulfides
Analysis of Thiuram Disulfides
13. Other Chemicals
Sodium Chloride
Soda Ash, The Commercial Sodium Carbonate
Solvay Process
Soda Ash from Other Sources
Soda Ash-related Products
Sodium Sulfate
Salt Cake
Glauber Salt
Hydrochloric Acid
Sodium Silicate
Bromine and Bromides
Sodium Sulfides
Sodium Thiosulfate
Sodium Bisulfate, Anhydrous
Sodium Hyposulfite (Hydrosulfite)
Caustic Soda and Chlorine
Electrolysis of Brine
Concentration of the Caustic Liquor
The Mercury Cell
Hydrogen Disposal
Other Processes for the Production of Chlorine
Liquid Chlorine
Bleaches
14. Organic Acids
Citric Acid
Gluconic Acid
Acetic Acid
Itaconic Acid
Kojic Acid
Other Ketogenic Fermentations
Sorbitol
2-Ketogluconic Acid
Nonionic Surfactants
Ampholytic Surfactants
15. Phosphoric Acid
Production of Elemental Phosphorus and Phosphoric Acid
Industrial Phosphates
Sodium Pyrophosphate
Wet-Process Phosphoric Acid
Potassium Salts
Soluble Potassium Salts
Potassium Nitrate
Types of Volatile Solvents

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

NIIR PROJECT CONSULTANCY SERVICES , 106-E, Kamla Nagar, New Delhi-110007, India. **Email:** npcs.india@gmail.com **Website:** NIIR.org
