

# The Complete Book on Gums and Stabilizers for Food Industry

**Author:** H. Panda  
**Format:** Paperback  
**ISBN:** 9788178331317  
**Code:** NI231  
**Pages:** 480  
**Price:** Rs. 1,275.00 **US\$** 125.00  
**Publisher:** Asia Pacific Business Press Inc.  
Usually ships within **5** days

Gums are plant flours (like starch or arrowroot) that make foods & other products thick. Gums are used in foods for many reasons besides being used as a thickener. Gums are important ingredient in producing food emulsifier, food additive, food thickener & other gum products. The main reason for adding a gum or hydrocolloid to a food product is to improve its overall quality. India is the largest producer of gums specially guar gum products. Similarly stabilizers are an indispensable substance in food items when added to the food items, they smoothens uniform nature and hold the flavouring compounds in dispersion. Gum technology stabilizers are carefully controlled blends of various food ingredients. Most processed foods need some sort of stabilization at some point during production, transportation, storage and serving. The science and technology of hydrocolloids used in food and related systems has seen many new developments and advances over recent years. The breadth and depth of knowledge of gums and stabilizers has increased tremendously over the last two decades, with researchers in industry and academia collaborating to accelerate the growth. Gums as food constituents or as food additives can influence processing conditions in the following ways; retention of water, reduction of evaporation rates, alteration of freezing rates, modification of ice crystal formation and participation in chemical reactions.

Some of the fundamentals of the book are functions of gum, typical food applications, gums in food suspensions, rheology and characters of gums, natural product exudates, flavor fixation, ice cream, ices and sherbets, gelation of low methoxyl pectin, seaweed extracts, microbial gums, transformation of collagen to gelatin, cellulose gums, dairy food applications, bakery product applications, analysis of hydrocolloids, gums in food products, general isolation of gums from foods, identification of gums in specific foods, group analysis and identification schemes, group identification methods, qualitative group analysis etc.

This book contains rheology of gums, plant sheet gums, microbial gums, cellulose gums and synthetic hydrocolloids different stabilizers used in food industry. The book will be very resourceful to all its readers, new entrepreneurs, scientist, food technologist, food industries etc.

## Contents

## 1. FUNCTIONS OF GUM

Convenience Foods

Instant Coffee

Frozen Foods

Freeze-Dried Foods

Gum Constituents

Effect on Processing

Pertinent Processing Parameters

Function in Food Applications

Viscosity

Definition and Meaning

Factors Effecting Hydrophilic Viscosities

Typical Food Applications

Gelation

Mechanism of Gel Formation

Types of Gel Linkage

Gel Textures

Effect of Sugar on Gels

Rheological Behavior

Gel-Enhancing Effect of Other Gums

Emulsification and Stabilization

Types of Emulsions

Preparation of Emulsions

Applications of Hydrocolloids

Breaking of Emulsions

Suspensions and Dispersions

Description

Yield Value

Gums in Food Suspensions

Foams

Description

Requirements for Stability

Food Applications

Measurement of Foam Stability

Crystallization Control

Description

Types of Crystal Bonding

Effect of Hydrocolloids

Flavor Fixation

Description

Historical Background

Basic Principles

Function of Gums

Important Parameters

Advantages of Gum Arabic

Limitations of Spray-Dried Flavors

Slab Fixation

Microencapsulation (Coacervation)

Alginate Film Encapsulation

Protective Films

Description

Applications

Synergistic Effect

Syneresis Inhibition  
Selection and Application of Hydrocolloids  
2. RHEOLOGY AND CHARACTERS OF GUMS  
Background  
Definitions  
Viscosity  
Newtonian Flow  
Non-Newtonian Systems  
Bingham Plastic  
Pseudoplastic (Shear-Thinning)  
Dilatancy (Shear-Thickening)  
Thixotropic Flow  
Rheopexy  
Rheology in Foods  
Flow Curve Data  
Rheological Measurement of Liquids  
Capillary Viscometers  
Rotational Viscometers  
Brookfield Synchro-Lectric Viscometer  
Corn Industries Viscometer  
Brabender Visco-Amylograph  
Validity of Measurements  
Rheological Measurements of Solids  
Parameters of Solids  
Food Gel Systems  
Types of Gel Measurements  
Bloom Gelometer  
Exchange Ridgelimeter  
Gel Characterization Apparatus (GCA)  
Description  
Advantages  
Interpretation of Measurements  
Typical Gel Measurements  
Texturometer  
3. NATURAL PRODUCT EXUDATES  
Origin of Gums  
Physical Properties  
Gum Arabic  
Standards  
Structure  
Properties  
Confectionery  
Bakery Products  
Dairy Products  
Beverages  
Flavor Fixation  
Miscellaneous  
Gum Ghatti  
Structure and Properties  
Applications  
Gum Karaya  
Structure  
Properties

Ice Cream, Ices and Sherbets  
Meat Products  
Baked Goods  
Dairy Products  
Miscellaneous  
Gum Tragacanth  
Structure  
Properties  
Salad Dressings and Sauces  
Ice Cream, Ices and Sherbets  
Bakery Products  
Confectionery  
Miscellaneous  
4. PLANT SEED GUMS  
Locust Bean Gum  
Historical Background  
Botany  
Source  
Structure  
Properties  
Applications  
Guar Gum  
Historical Background  
Source  
Structure  
Properties  
Applications  
Psyllium Seed Gum  
Source  
Structure  
Properties  
Applications  
Quince Seed Gum  
Source  
Structure  
Properties  
Applications  
5. PECTINS  
Nomenclature  
Function in Plants  
Structure  
Properties  
Viscosity  
Low Methoxyl Pectins  
Gel Formation  
Theoretical Discussion  
Sugar  
Setting Time  
Gel Strength  
Gelation of Low Methoxyl Pectin  
Manufacture of Pectin  
Process  
Standardization

Manufacture of Low Methoxyl Pectins

Uses of Pectin

Jams, Jellies and Preserves

Critical Parameters

Canned Fruits and Fruit Juices

Confectionery Products

Dairy Products

Miscellaneous

Uses of Low Methoxyl Pectins

Dessert and Pudding Mixes

Canned Fruit Sauce Gels

Canned Tomato Aspic

Frozen Foods

Soda Fountain Fruit Toppings

Variegated Ice Cream

Fruit Pie Fillings

Beverages

Edible Protective Coatings

6. LARCH GUM

Structure

Properties

Viscosity

Surfactant Properties

Refractive Index and Specific Gravity

Adhesive and Binding Properties

Shelf-Life Stability

Food Additive Status

Food Applications

7. SEAWEED EXTRACTS

Botany

Historical Background

Structure

Agar

Historical Background

Collection of Agar Weed

Processing

Structure

Properties

Applications

Carrageenan

Background

Production

Structure

Properties

Applications

Furcellaran

Background

Structure

Properties

Applications

Alginates

Background

Sources

Processing

Structure

Properties

Applications

## 8. MICROBIAL GUMS

Dextran

Background

Production

Structure

Properties

Applications

Polysaccharide B-1459 (Xanthan Gum)

Background

Preparation

Structure

Properties

Toxicity

Food Applications

Polysaccharide B-1973

Structure

Preparation

Properties

Deacetylated Polymer

Phosphomannan Y-2448

Preparation

Structure

Properties

Rheological Behavior

Applications

Polysaccharide Y-1401

Structure

Preparation

Properties

Rheological Behavior

## 9. GELATIN

Background

Collagen

Transformation of Collagen to Gelatin

Manufacture of Gelatin

Sources

Processing

Final Products

Chemical Composition

Amino Acids

Ash

Metal Content

Sulfur Dioxide Content

Organic Additives

Physical Properties

Solubility

Viscosity

Color

Turbidity

Gel Strength (Bloom)  
Protective Colloid Action  
Emulsion Stabilizer  
Preservation  
Gelling Properties and Mechanism  
Gel Structure Hypotheses  
Gelation of Gelatin  
Phenomena Related to Gelling Mechanism  
Applications  
Gelatin Desserts  
Confections  
Ice Cream Stabilizers  
Dairy Products  
Meat Products  
Bakery Goods  
Food Coatings  
Flavor Fixation  
Miscellaneous  
10. CELLULOSE GUMS  
Cellulose Derivatives  
Microcrystalline Cellulose  
Properties  
Food Applications  
Pharmaceutical and Cosmetic Applications  
Food and Drug Administration Status  
Sodium Carboxymethylcellulose (CMC)  
Background  
Properties  
Dairy Food Applications  
Bakery Applications  
Salad Dressings, Sauces, and Gravies  
Confectionery  
Dietetic Foods  
Processed Foods  
Packaged Dry Mixes  
Food Preservation Applications  
Miscellaneous  
Legal Status  
Methylcellulose and Hydroxypropylmethyl-cellulose  
Preparation  
Properties  
Bakery Product Applications  
Dietetic Foods  
Dehydrated Foods  
Frozen Foods  
Salad Dressings  
Breading Batters  
Edible Film Applications  
Legal Status  
Hydroxypropylcellulose (Klucel)  
Properties  
Food Applications  
Food and Drug Administration Status

Methylethylcellulose  
Properties  
Applications  
Food and Drug Administration Status  
Other Cellulose Derivatives  
Hydroxyethylcellulose (HEC)  
Ethylcellulose (EC)  
Ethylhydroxyethylcellulose (EHEC)  
Carboxymethylhydroxyethylcellulose (CMHEC)  
11. SYNTHETIC HYDROCOLLOIDS  
Polyvinylpyrrolidone (PVP)  
Background  
Properties  
Food Applications  
Carboxyvinyl Polymers (Carbopol)  
Background  
Properties  
Applications  
Methyl Vinyl Ether/Maleic Anhydride Polymers (Gantrez AN)  
Background  
Properties  
Applications  
Ethylene Oxide Polymers (Polyox)  
Background  
Preparation  
Properties  
Applications  
12. ANALYSIS OF HYDROCOLLOIDS  
Examination of Industrial Gums  
Commercial Gums  
Water Solubility Properties  
Alcohol Precipitability Characteristics  
Microscopic Identification  
Flocculation Values  
Gums in Food Products  
General Isolation of Gums from Foods  
Identification of Gums in Specific Foods  
Group Analysis and Identification Schemes  
Group Identification Methods  
Qualitative Group Analysis  
Analysis by Quaternary Ammonium Salt Reactions  
Cetavlon Group Identification Scheme  
Classification by Cobalt Complex Precipitation  
Additional Analytical Methods  
Infrared Spectroscopy  
Paper Chromatography  
Electrophoresis  
X-Ray Diffraction  
Differential Thermal Analysis (DTA)  
Reagents for Gum Identification

# About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
