

# The Complete Technology Book on Chemical Industries

**Author:** NIIR Board  
**Format:** Paperback  
**ISBN:** 8178330687  
**Code:** NI89  
**Pages:** 443  
**Price:** Rs. 975.00 **US\$** 100.00  
**Publisher:** Asia Pacific Business Press Inc.  
Usually ships within **5** days

In modern age chemical industries have permeated most extensively in comparison with other industries and are progressing at a very rapid pace. Chemical Industry in India is one of the fastest growing industries under the Indian economy. The chemical industry comprises the companies that produce industrial chemicals. Central to the modern world economy, it converts raw materials into more than 70,000 different products. Chemicals have contributed in various sectors like food industry, fertilizers, perfumery, fragrance and flavour etc. Chemicals are used to make a wide variety of consumer goods, as well as thousands inputs to agriculture, manufacturing, construction, and service industries. There are numerous chemicals produced in chemical industry for example chloroform, caffeine, fertilizers, dyes, drug intermediates, herbicide, inorganic salts, copper sulphate, acetaldehyde etc. The chemical industry itself consumes 26 percent of its own output. The Chemical Industry in India is based on the idea of diversification. For example inorganic chemicals is the sector where the growth rate is near about 9% and the chemicals produced in this sector are mainly used in alkalis, fertilizers, etc. Depending on the product categories the chemical industry is divided in many other sectors like drugs and pharmaceuticals, fertilizers, fine chemicals like dyes and paints etc. The chemical industry in India which generates almost 13% of total national export is growing annually at a growth rate anywhere between 10% and 12%.

This book majorly deals with the molecular formula, raw materials, properties, laboratory testing, manufacturing process explained with flow diagrams and uses of the chemicals. The major contents of the book are inorganic salts, inorganic chemicals, industrial gas, fertilizers, alum, caffeine, ceramic chemicals etc. This book covers the production of more than 100 chemicals for example acetanilide, methylamine, butylamine, linalol, phosphorous, salicylic acid etc.

This book should be of great value to young chemical engineers and chemists who are just entering the field but those already practicing will find much of interest and use for broadening of their insight in to fields in which they are only marginally informed. It is hoped that this book will aid to young engineers, chemical, civil, mechanical and electrical as well as chemists, in understanding the value of chemical, the type of problems met in their production and method for solving these problems.

# Contents

## 1. 2-Chloro-6(Trichloromethyl)-Pyridine

Introduction

Classification

Uses and Applications

Industrial Prospect

Formulations

Process of Manufacture

Laboratory Testing

Determination of Pyridine Content

Apparatus

Test Substances

Procedure

Chart Speed

Calculation

## 2. Alkylamines

Methylamine

Ethylamine

Propylamine

Isopropylamine

Butylamine

Isobutylamine

Amylamine

Monoethanolamine

Diethanolamines

Triethanolamine

Manufacturing Process

Reaction

Uses

Grades

Toxicity

Polypropylene

Manufacturing Process

Hercules Polypropylene Process

Uses

Grades

Polyethylene

Manufacturing Process

From Ethylene by Low-Pressure Polymerization  
(Phillips Process)

Uses

Grades

Toxicity

Vinyl Acetate

Manufacturing Process

## 3. Alum

Introduction

Raw Material Requirements

Reactions

Process of Manufacture

Uses

Plant & Machinery

Market Potential

Plant Economics

Analytical Testing of Ammonium Alum

EDTA Method

Reagents

Procedure

Calculation

Gravimetric Method

Laboratory Testing of Aluminium Sulphate

Introduction

Procedure

#### 4. Bleaching Powder

Introduction

Properties

Properties

Uses

Process of Manufacture

Laboratory Testing

Glacial Acetic Acid

Calculation

#### 5. Caffeine (C<sub>8</sub>H<sub>10</sub>N<sub>4</sub>O<sub>2</sub>.H<sub>2</sub>O)

From Tea Waste

Raw Material Requirements

Process

Properties

Purity

Reagents and Apparatus

Standardization

Procedure A : (Potentiometric)

#### 6. Ceramic Chemicals

Boric Acid

Properties

Manufacturing Process

Reaction

Flow Diagram

Uses

Grades

Toxicity

#### 7. Chemical and Additive for Food Industry

Citric Acid

Properties

Lactic Acid

Molecular Formula

Manufacturing Process

Sodium Bicarbonate

Manufacturing Process

## 8. Chloroform (Trichloromethane) $\text{CHCl}_3$

Chloroform

Molecular Formula

Properties

From Methane by Chlorination

Material Requirements (Theoretical)

Process

From Acetone and Bleaching Powder

Reaction

Material Requirements

Process

Grades

Purity

Determination of Relative Density

Apparatus

Procedure

Calculation

Determination of Distillation Yield

Apparatus

Assembly of the Apparatus

Procedure

## 9. Chloram Phenicol (p)(-)-Threo-1-(Para-nitrophenyl)-

2-dichloroacetamide-1, 3-propanediol

Reaction

Raw Material Requirements

Manufacturing Process

Properties

Grades

Purity

## 10. Coumarin ( $\text{C}_9\text{H}_6\text{O}_2$ )

From Salicylaldehyde

Reaction

Properties

Grades

Use & Application

Process of Manufacture

Laboratory Testing

Apparatus

Coumarin

Procedure

Reaction with Iodine Solution

## 11. Construction Material

Lime (Calcium Oxide)

Properties

Manufacturing Process

Hydrated Lime

Chemical Lime

Reaction

Flow Diagram

Uses  
Grades  
Toxicity

12. Corrosion Inhibitor  
Sodium Dichromate  
Manufacturing Process  
From Chromite Ore  
Reaction

Toxicity

16. Ester Gum  
Field of Applications  
Classification  
Manufacture  
Laboratory Testing  
Reagents  
Driers  
Procedure  
Determination of Gel Time  
General  
Reagents  
Procedure

## 17. Fatty Acids

Properties

Manufacturing Process

Raw Material Requirement

Reaction

Flow Diagram

Uses

Grades

Toxicity

## 18. Fertilizers

Introduction

Nutrition requirements of crops

Overview of the fertilizer industry

Nitrogen Fertilizers

Miscellaneous low-volume nitrogen fertilizers

Nitrogen fertilizers from synthetic ammonia

Phosphate Fertilizers

Natural Organic Phosphate Fertilizers

Fertilizers from Mineral Phosphates

Potassium Salts

Potassium Minerals

Potassium-Magnesium Minerals

Potassium Sulfate

Potassium Nitrate

Potassium Phosphates

Mixed Fertilizers

Nongranular Mixtures

Compound Granulars

Bulk Blends

Fluid Mixtures

## 19. Gaur Gum (Galactomannan Gum)

From Guar Seeds (Dry Process)

Raw Material Requirements

Process

Other Processes

Properties

Grades

Containers

## 20. Herbicide

2, 4-Dichloro Phenoxy Acetic Acid (2, 4-D Acid)

Manufacturing Process  
Raw Material requirements  
Reaction  
Flow Diagram  
Uses  
Grades  
Toxicity

## 21. Industrial Gases

Overview  
Nitrogen  
Oxygen  
Argon  
Hydrogen  
Helium  
Carbon Dioxide - CO<sub>2</sub>  
Liquefied Natural Gas  
Acetylene  
Nitrous Oxide

## 22. Industrial Halogens

Bromine  
Manufacturing Process  
Bromine from Sea Water  
Reaction  
Raw material requirements  
Reaction  
Uses  
Grades  
Toxicity  
Chlorine  
Properties  
Manufacturing Process  
From Salt by Electrolysis  
Raw material requirements (Diaphragm cell)  
Reaction  
Uses  
Grades  
Toxicity  
Iodine  
Manufacturing Process  
From Oil-well Brines (Silver iodide process)  
Raw material requirements  
Reaction  
Uses

Grades  
Toxicity

### 23. Inorganic Chemicals - With Multipurpose end use

Activated Alumina  
Manufacturing Process  
From Alum and Caustic Soda  
Raw material requirement  
Reaction  
Uses

Grades  
Toxicity

Activated Carbon  
Properties  
Manufacturing Process  
From Charcoal  
Raw Material Requirements  
Uses

Grades  
Toxicity

Phosphorus Oxychloride  
Properties  
Manufacturing Process  
From Phosphorus Trichloride and Phosphorus  
Pentoxide  
Raw material requirements  
Reaction  
Uses

Grades  
Toxicity

Sodium Acetate  
Properties  
Manufacturing Process  
From Acetic Acid and Soda Ash  
Raw material requirements  
Reaction  
Uses

Grades  
Toxicity

Sodium Chloride  
Properties  
Manufacturing Process  
By Solar Evaporation  
Raw material requirements  
Major Engineering Problems  
Uses

Toxicity

### 24. Inorganic Salts Aluminium Chloride Properties

Manufacturing Process  
From Aluminium Metal and Chlorine  
Raw material requirements  
Reaction  
Uses  
Grades  
Toxicity  
Ammonium Chloride  
Properties  
Manufacturing Process  
From ammonium sulphate and sodium chloride  
Raw material requirements  
Reaction  
Uses  
Grades  
Toxicity  
Ammonium Nitrate  
Properties  
Manufacturing Process  
From Ammonia and Nitric Acid  
Raw Material Requirements  
Barium Carbonate  
Properties  
Manufacturing Process  
From Barium Sulphide and Carbon Dioxide  
Raw material requirements  
Reaction  
From Barium Sulphide and soda Ash  
Raw material requirements  
Reaction  
Uses  
Grades  
Toxicity  
Copper Sulphate  
Properties  
Manufacturing Process  
From Cupric Oxide and Sulphuric Acid  
Raw material requirements  
Reaction  
Uses  
Grades  
Toxicity  
Uses  
Grades  
Toxicity  
Ferrous Sulphate Heptahydrate  
Properties  
Manufacturing Process  
From Steel Pickling Liquor  
Raw material requirements  
Reaction  
Uses  
Grades

Toxicity  
Potassium Silicate  
Properties  
Manufacturing Process  
From Sodium Silicate  
Raw material requirements  
Uses

Procedure  
EDTA Method  
Reagents  
Procedure  
Economic Aspects

27. Metallic Stearates  
Aluminium Stearate  
Calcium Stearate  
Magnesium Stearate  
Lead Stearate  
Zinc Stearate  
Metallic Stearates  
Manufacturing Process  
Raw material requirements  
Aluminium Stearate

Test  
Reaction  
Uses  
Aluminium Stearate  
Calcium Stearate  
Lead Stearate  
Magnesium Stearate  
Zinc Stearate  
Grades  
Toxicity

#### 28. Metal Treatment and Degreasing chemicals

Chromic Acid  
Properties  
Manufacturing Process  
From Sodium Dichromate  
Raw material requirements  
Reaction  
Uses  
Grades  
Trichloroethylene  
Properties  
Manufacturing Process  
From Acetylene and Chlorine  
Raw material requirements  
Reaction  
Uses  
Grades  
Toxicity

#### 29. Natural Gas

Characteristics  
Occurrence of Natural Gas  
Preparing Natural Gas for Transmission and Sale  
Processing for Liquids Recovery

#### 30. Acetaldehyde

Properties  
Aceto Acetic Ester  
Properties  
Manufacturing Process  
Raw Material Requirement  
Reaction  
Uses  
Grades  
Toxicity  
Fire Fighting  
Aniline  
Properties  
Manufacturing Process  
From Nitrobenzene by reduction  
Raw Material requirements  
Benzaldehyde

Properties  
Manufacturing Process  
Oxidation of Toluene  
Raw material requirements  
Reaction  
Uses  
Grades  
Specifications for Benzaldehyde  
Toxicity  
Carboxy methyl cellulose (sodium Salt)  
Properties  
Manufacturing Process  
From Waste Cotton (or cellulose)  
Raw material requirements  
Reaction  
Uses  
Grades  
Ethylene Dichloride  
Properties  
Manufacturing Process  
From Ethylene and Chlorine  
Raw material requirements

### 32. Phosphorus and Phosphates

Introduction  
Phosphate Rock  
Resources  
Phosphate Ores  
Mining  
Beneficiation  
Elemental Phosphorus and Phosphoric Acid  
Furnace Phosphoric Acid  
Industrial Phosphates  
Wet Process Phosphoric Acid  
Dihydrate Process  
Major Dihydrate Processes  
Hemihydrate Processes for Phosphoric Acid  
Unit Operations  
Superphosphoric Acid  
Wet Process Acid by-Products  
Phosphogypsum  
Fluorine Recovery  
Uranium Recovery  
Purified Phosphoric Acid  
Environmental Aspects

### 33. Plasticiser

Chlorinated Paraffin Wax  
Molecular Formula  
Properties  
Dialkyl Phthalates  
Dimethyl Phthalates  
Properties  
Diethyl Phthalate  
Properties  
Dibutyl Phthalates  
Properties  
Dioctyl Phthalates  
Properties  
Diamyl Phthalates  
Properties

Manufacturing Process  
From Phthalic Anhydride and Alcohol by  
Esterification

Raw material requirements

Dibutyl phthalate

Reaction

Uses

42. Salt, Chlor-Alkali, and Related Heavy

Chemicals

Sodium Chloride

Soda Ash

Sodium Bicarbonate

Sodium Sulfate

Sodium Sulfides

Sodium Thiosulfate

Sodium Sulfite

Sodium Bisulfite

Sodium Hyposulfite

Sodium Phosphates

Sodium Silicate

Chlor-Alkali (Chlorine and Caustic Soda)

Hydrochloric Acid

Bromine and Brine Chemicals

Bleaches

Sodium Chlorate

43. Silicone Resin

Manufacturing Process

Laboratory Testing

Silicone Resin

Rapid Method for Determination of Silicone

Laboratory Testing

Silica Resin

Determination of Silica by the Gravimetric Method

Reagents

Procedure

Properties

Calculation

44. Solvents

Acetone

Properties

Carbon Tetrachloride

Properties

Manufacturing Process

From Carbon Disulphide and Chlorine

Raw material requirements

Chlorobenzene And Dichlorobenzene

Chlorobenzene

p-Dichlorobenzene

Properties

Ethyl Acetate

Properties

Manufacturing Process

From Ethyl Alcohol and Acetic Acid by

Esterification  
Raw material requirements  
Isopropyl Alcohol  
Properties  
Manufacturing Process  
From Propylene  
Raw material requirements  
Methyl Alcohol (Methanol)  
Properties  
Manufacturing Process  
From Carbon Monoxide and Hydrogen  
Raw material requirements  
Methyl Ethyl Ketone  
Properties  
Manufacturing Process  
From Secondary Butyl Alcohol by Dehydrogenation  
Raw material requirements  
Reaction  
Uses  
Grades  
Toxicity  
Nitrobenzene  
Properties  
Manufacturing Process  
From Benzene and Nitric Acid  
Raw material requirements  
Nitroparaffins  
Nitromethane  
Properties

#### 45. Sulfur and Sulfuric Acid

Sulfur  
Development of the Sulfur Industry  
Sulfur Production Processes  
Recovered Sulfur  
Sulfuric Acid  
Uses of Sulfuric Acid  
Manufacture of Sulfuric Acid by the Contact  
Process  
Sulfur Dioxide production  
Conversion of SO<sub>2</sub> to H<sub>2</sub>SO<sub>4</sub>  
Absorption of SO<sub>3</sub>  
Other Sources of Sulfuric Acid

#### 46. Ultramarine Blue

#### 47. Raw Material Requirements

Process  
Properties

Procedure  
Market Aspects

#### 47. Zinc Sulphate

Introduction  
Properties  
Uses  
Scope  
Manufacturing Process  
Purification  
Laboratory Testing of Zinc Sulphate  
Determination of Zinc  
Reagents  
Procedure  
Calculation

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
